

Muhammad Haider Akbar

Software Engineer

+923420299229 • haiderakbar69420@gmail.com • [GitHub](#) • [LinkedIn](#) • Islamabad, Pakistan

I am a Software Engineer with a background in Full-Stack development (**MERN & Python**). I am experienced in web applications through my internships at **Systems Ltd and 10Pearls**. I pickup things quickly and am driven to compete at the highest level.

EDUCATION

COMSATS University Islamabad
Bachelors of Computer Science

Islamabad, Pakistan
February 2026 - February 2030

SKILLS

Languages: JavaScript, Python, C++, SQL, HTML5/CSS3.

Databases: MongoDB, MySQL, Firebase, Redis (Caching).

Frameworks: React.js, Node.js, Express.js, Redux, Tailwind CSS.

Tools: Git/GitHub, VS Code, Nvim, Postman.

Cloud & DevOps: Microsoft Azure, Docker, GitHub Actions, Vercel.

Architecture: Microservices, RESTful APIs, TDD, Design Patterns.

EXPERIENCE

Software Engineering (Intern) | Systems Limited, Islamabad

June 2027 - August 2027

- Created scalable backend services with **Python (FASTAPI)**, managed to improve API response latency by **25%**.
- Designed real-time alert system that can support more than 1,000 concurrent user sessions (**Firebase and Redis**).

Junior Full-Stack Developer (Remote) | 10Pearls, Karachi

January 2028 - May 2028

- Created responsive front-end interfaces using **React.js and Tailwind CSS**.
- Created secure user authentication and data storage using **Express.js and MongoDB**
- Simplified intricate **SQL queries**, which increased client's response generation speed by 40%.

PROJECTS

Nexus Stream: Real-Time Analytics Engine

December 2028 - Feb 2030

- Apache Kafka and FASTAPI** were used to develop a data pipeline that processes 10,000 events/second .
- Used **Docker** to containerize microprocesses for increased efficiency.
- Used **React.js and Socket.io**, to make a live dashboard for monitoring and data visualization.

Secure Vault: End-to-End Encrypted File Management

August 2027 - May 2028

- AES-256 encryption** was used to create a safe cloud storage solution.
- Using **Redis-based temporary caching** and multipart uploading, file upload speed was increased substantially (35%).

Python SDK for Microsoft: Open Source Contributor

June 2028 - Present

- Found and fixed critical bug that affected the asynchronous credential handling module
- Enhanced onboarding of new contributors by improving documentation and API workflows
