

Lab Manual

CSC417- E-Commerce & Digital Marketing

Department of Computer Science
Islamabad Campus

CUI

Lab Contents:

The topics include: HTML; CSS; Creating a Digital Portfolio; Design an E-Store with Shopify; Create an E-Store Using WordPress; Canva as a design tool; SMART goals and Customer Personas; Search Engine Optimization (SEO)

Student Outcomes (SO)

S.#	Description
2	Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines
3	Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations
4	Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations

Intended Learning Outcomes

Sr.#	Description	Blooms Taxonomy Learning Level	SO
CLO -4	Implement E-commerce & Digital Marketing Concepts, using tools and technologies.	<i>Applying</i>	2-4
CLO -5	Develop a customized E-Store.	<i>Creating</i>	2-4

Lab Assessment Policy

The lab work done by the student is evaluated using Psycho-motor rubrics defined by the course instructor, viva-voce, project work/performance. Marks distribution is as follows:

Assignments	Lab Mid Term Exam	Lab Terminal Exam	Total
25	25	50	100

Note: Midterm and Final term exams must be computer based.

Table of Contents

Lab #	Main Topic	Page #
Lab 01	HTML Basics	4
Lab 02	CSS (Cascading Style Sheet) Basics	19
Lab 03	Creating a Digital Portfolio	37
Lab 04	Design an E-Store with Shopify	50
Lab 05	Create an E-Store Using WordPress	80
Lab 06	Canva as a design tool	100
Lab 07	SMART goals and Customer Personas	116
Lab 08	Search Engine Optimization (SEO)	129
Lab 09	Mid Term Exam	
Lab10	Search Engine Optimization (SEO)	129
Lab 11	Search Engine Marketing (SEM)	155
Lab 12	Social Media Marketing	186
Lab 13	Email Marketing	204
Lab 14	Final Term Exam	

Lab 01

HTML Basics

Objective:

To familiarize the students with the markup language “**HTML**”, its basic tags and forms.

Activity Outcomes:

The activities provide hands - on practice with the following topics

1. Design basic web page using HTML Tags
2. Text formatting tags and lists
3. Images and videos tags
4. Internal & External links and In-page references
5. Use of tables in a web page
6. HTML input tags
7. HTML Forms

Instructor Note:

As pre-lab activity, read:

- Chapter 1, 2 from the textbook “Web Design Playground: HTML & CSS the Interactive Way 1st Edition, April 2019 by Paul McFedries”
- Chapter 3 from the textbook “Web Design Playground: HTML & CSS the Interactive Way 1st Edition, April 2019 by Paul McFedries”

1) Useful Concepts:

Some Basic Tags:

TAG	Description
<!DOCTYPE>	Defines the document type
<html>	Defines an HTML document
<head>	Contains metadata/information for the document
<title>	Defines a title for the document
<body>	Defines the document's body
<h1> to <h6>	Defines HTML headings
<p>	Defines a paragraph
 	Inserts a single line break
<hr>	Defines a thematic change in the content
<!--...-->	Defines a comment
	Inserts an image
<video src="abc.mp4">	Inserts Video
	Order list
	Adding list items
	Unordered list
<dl>	tag defines a description list.
<dt>	defines terms/names
<dd>	describes each term/name
<iframe>	An inline frame is used to embed another document within the current HTML document
<a>	Defines a hyperlink, which is used to link from one page to another
href	This attribute specifies the URL of the page the link goes to
<table>	HTML tables allow web developers to arrange data into rows and columns
<tr>	This element defines a row of cells in a table
<th>	Defines a header cell in an HTML table.
<td>	Defines a standard data cell in an HTML table.
<thead>	Used to group header content in an HTML table
<tbody>	Used to group the body content in an HTML table
<tfoot>	Used to group footer content in an HTML table.

HTML Basic Structure:

```
<html>
<head>
<title> Page Title Goes Here </title>
</head>
<body>
content goes here
</body>
</html>
```

Adding audio,image and video files:

```
<html>
<head>
<title>adding video</title>
</head>
<body>

<video src="abc.mp4">
</body>
</html>
```

How To Create basic web page

1. Open Notepad
2. Click on File -> Save as...
3. In the File name pull-down box, type in webpage.html
4. Click on Save
5. Type in content for your file
6. Once you finished the content, click on File -> Save

HTML Forms

HTML forms are used to pass data to a server. A form can contain input elements like text fields, checkboxes, radio-buttons, submit buttons and more. A form can also contain select lists, textarea, fieldset, legend, and label elements. The **<form>** tag is used to create an HTML form.

```
<form>
input elements
</form>
```

The <form> tag

The <form arguments> ... </form> tag encloses form elements (and probably other elements as well). The arguments to form tell what to do with the user input.

- **action="url"** (required)
Specifies where to send the data when the Submit button is clicked
- **method="get"** (default)
Form data is sent as a URL with form_data info appended to the end
- **method="post"**
Form data is sent in the body of the URL request
- **target="target"**
Target tells where to open the page sent as a result of the request.

Input Tags

There are many input tags in the forms.

Text input

Text field:

```
<input type="text" name="textfield" value="with an initial value" />
```

Multi-line text field:

```
<textarea name="textarea" cols="24" rows="2">Hello</textarea>
```

Password field:

```
<input type="password" name="textfield3" value="secret" />
```

Buttons

Submit button:

```
<input type="submit" name="Submit" value="Submit" />
```

Reset button:

```
<input type="reset" name="Submit2" value="Reset" />
```

Plain button:

```
<input type="button" name="Submit3" value="Push Me" />
```

Radio Buttons:

```
<input type="radio" name="radiobutton" value="myValue1" /> male<br>
```

```
<input type="radio" name="radiobutton" value="myValue2" checked="checked" />female
```

Checkboxes

```
<input type="checkbox" name="checkbox" value="checkbox" checked="checked">
```

Drop-down menu:

```
<select name="select">
<option value="red">red</option>
<option value="green">green</option>
<option value="BLUE">blue</option>
</select>
```

HTML 5 forms elements:

HTML5 is the current version of THML and still under development. HTML5 enhances HTML form not only by providing new attributes to existing elements and but also provide new elements which can be added to the HTML forms.

HTML5 attributes for existing elements:

- **Required:** make an input field must to fill
- **Pattern:** used to validate user's input
- **Readonly:** makes an element read-only
- **Disabled:** is used to make an input field disabled
- **Autocomplete:** adds autocomplete functionality to input fields

HTML5 new form elements:

Datalist: an input field with predefined autocomplete options

My favorite color:

```
<input type="text" list="color">
<datalist id="color">
<option>red</option>
<option>black</option>
</datalist>
```

Email input field: checks user's input for valid email address

```
<input type="email" name="email">
```

Date input field: shows a calendar to choose a data

```
<input type="date" name="dob">
```

Color input field: displays color window to choose a color

```
<input type="color" name="favcolor">
```

Number input field: makes an input field to accept only numeric values

```
<input type="number">
```

2) Solved Lab Activities

Sr.No	Allocated Time	Level of Complexity	CLO Mapping
1	30 Minutes	Low	CLO-4
2	30 Minutes	Low	CLO-4
3	20 Minutes	Low	CLO-4
4	20 Minutes	Low	CLO-4
5	20 Minutes	Low	CLO-4
6	30 Minutes	Medium	CLO-4
7	30 Minutes	Medium	CLO-4

Activity 1:

1. Create a basic page of COMSATS University as given below
2. Add text about COMSATS and apply text formatting solution

Solution:

```
<html>
<head>
<title>Home</title>
</head>
<body bgcolor="#98E0F0">
<h1><font color="#1322D6"> COMSATS University Islamabad</font>
</h1>
<hr width="100%" color="#030303" size="4" />

<Center><p><h2><b><pre> Home      Department      Admissions      Academics Exams</pre></b></h2> </p> </center>
<hr width="100%" color="#030303" size="4" />
<br />

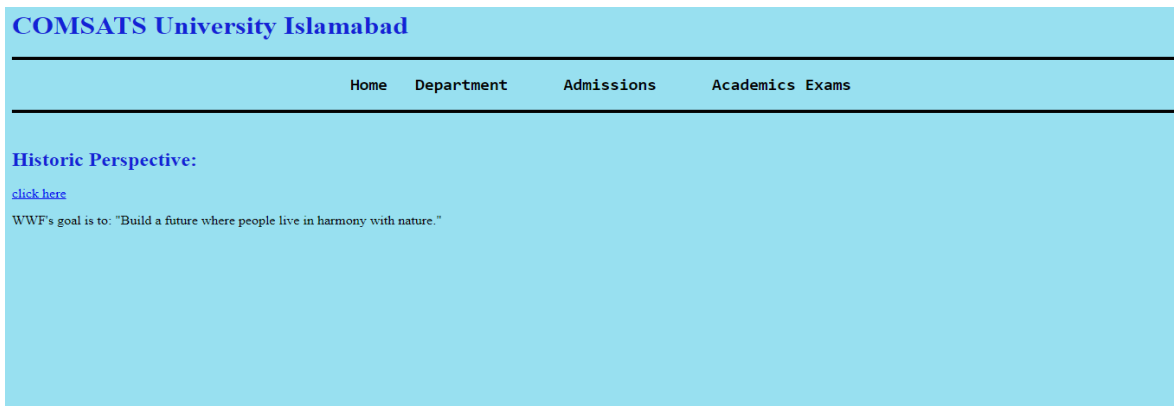

<p> <h2><font color="#1322D6"> Historic Perspective:</font> </h2> </p>

<a href="lol.html"> click here </a><!-- Write your comments here -->

<p>WWF's goal is to: <q>Build a future where people live in harmony with nature.</q></p>

</body>
</html>
```

Output:

Activity 2:

Add list of topics, images and videos to your website

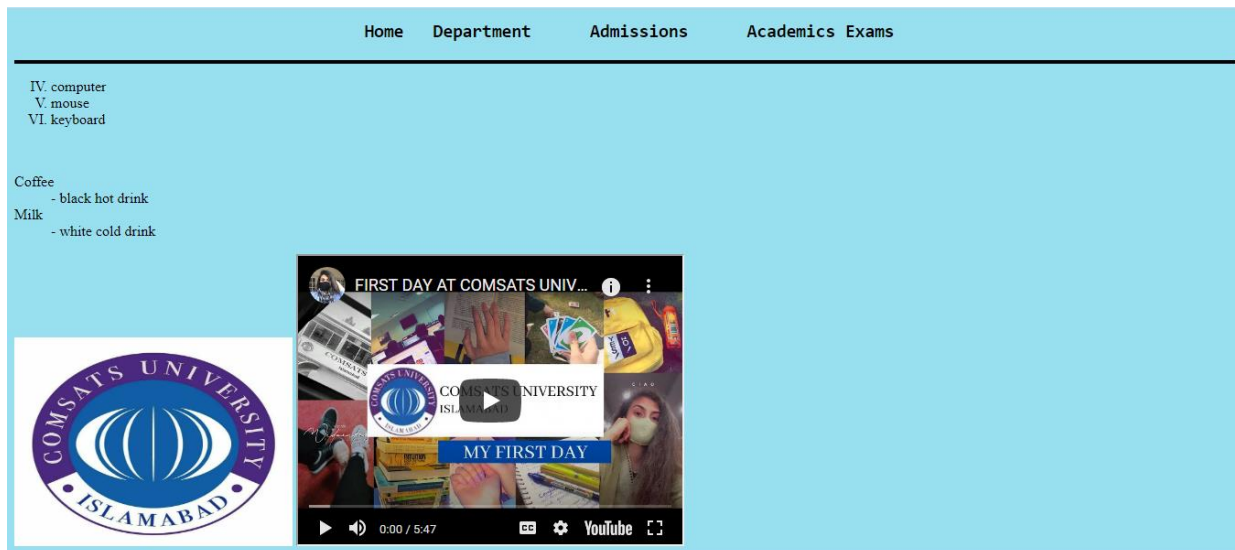

Solution:

```
<html>
<head>
<title>Home</title>
</head>
<body bgcolor="#98E0F0">
<h1><font color="#1322D6"> COMSATS University Islamabad </font>
</h1>
<hr width="100%" color="#030303" size="4" />
<Center><p><h2><b><pre> Home      Department      Admissions      Academics Exams</pre></b></h2> </p> </center>
<hr width="100%" color="#030303" size="4" />
<ol type="I" start="4">
<li> computer </li>
<li> mouse </li>
<li> keyboard </li>
</ol>
<br />
<dl>
<dt>Coffee</dt>
<dd>- black hot drink</dd>
<dt>Milk</dt>

<dd>- white cold drink</dd>
</dl>

<iframe width="420" height="315" src="https://www.youtube.com/embed/ joriayTNmwQ?autoplay=1">
</iframe>
</body> </html>
```

Output:

Activity 3:

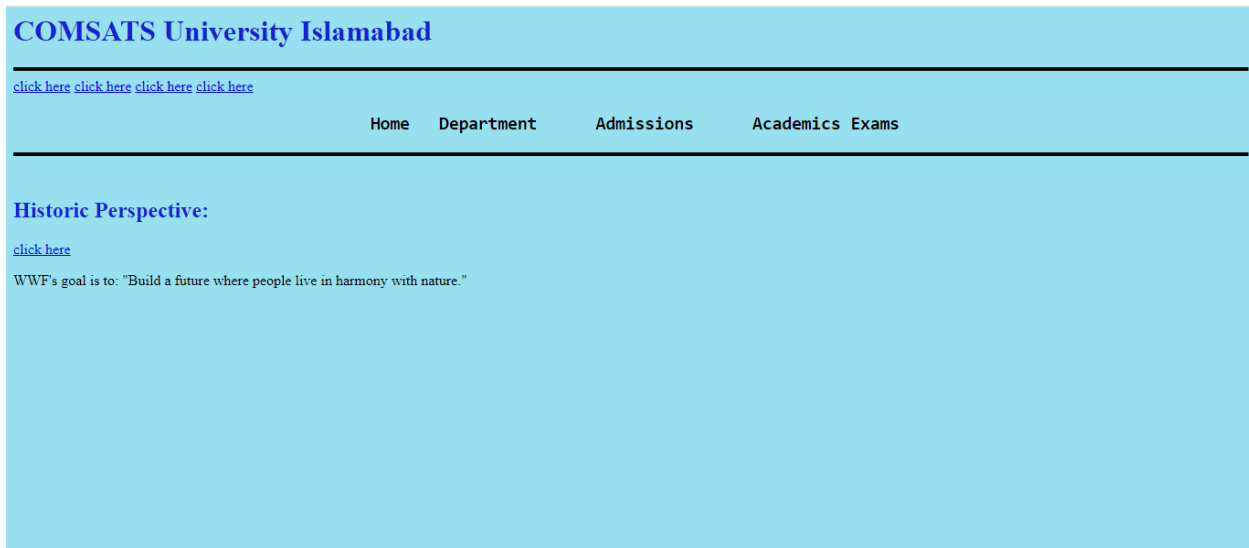

*Use the page you created in “Activity 1” and add the following linking information:
Create links to home, departments, admission and exams pages of CUI Islamabad campus*

Solution:

```
<html>
<head>
<title>Home</title>
</head>
<body bgcolor="#98E0F0">
<h1><font color="#1322D6"> COMSATS University Islamabad </font>
</h1>
<hr width="100%" color="#030303" size="4" />

<a href="home.html"> click here</a>
<a href="departments.html"> click here</a>
  <a href="admissions.html"> click here</a>
<a href="exam page.html"> click here</a>
<Center><p><h2><b><pre> Home      Department      Admissions      Academics Exams</pre></b></h2> </p> </center>
<hr width="100%" color="#030303" size="4" />
<br />
<p> <h2><font color="#1322D6"> Historic Perspective:</font> </h2> </p>
<a href="lol.html"> click here </a><!-- Write your comments here -->
<p>WWF's goal is to: <q>Build a future where people live in harmony with nature.</q></p>
</body>
</html>
```

Output:

Activity 4:

Create a table to add the add basic html table including the details of Company, Contact, and Country

Solution:

```
<!DOCTYPE html>
<html>
<style>
table, th, td {
  border:1px solid black;
}
</style>
<body>
<h2>A basic HTML table</h2>
<table style="width:100%">
  <tr>
    <th>Company</th>
    <th>Contact</th>
    <th>Country</th>
  </tr>
  <tr>
    <td>Alfreds Futterkiste</td>
    <td>Maria Anders</td>
    <td>Germany</td>
  </tr>
  <tr>
    <td>Centro comercial Moctezuma</td>
    <td>Francisco Chang</td>
    <td>Mexico</td>
  </tr>
</table>
</body>
</html>
```

Output:

A basic HTML table

Company	Contact	Country
Alfreds Futterkiste	Maria Anders	Germany
Centro comercial Moctezuma	Francisco Chang	Mexico

Activity 5:

Create a table as shown in the figure given below:

OCTOBER		NOVEMBER	
Sales	Profit	Sales	Profit
\$200,00	\$50,00	\$300,000	\$70,000
NOVEMBER WAS MORE PRODUCTIVE			

Solution:

```
<table>
  <thead>
    <tr>
      <th colspan="2">October</th>
      <th colspan="2">November</th>
    </tr>
  </thead>

  <tbody>
    <tr>
      <td>Sales</td>
      <td>Profit</td>
      <td>Sales</td>
      <td>Profit</td>
    </tr>
    <tr>
      <td>$200,00</td>
      <td>$50,00</td>
      <td>$300,000</td>
      <td>$70,000</td>
    </tr>
  </tbody>

  <tfoot>
    <tr>
      <th colspan="4">November was more productive</th>
    </tr>
  </tfoot>
</table>
```

Output:

OCTOBER		NOVEMBER	
Sales	Profit	Sales	Profit
\$200,00	\$50,00	\$300,000	\$70,000
NOVEMBER WAS MORE PRODUCTIVE			

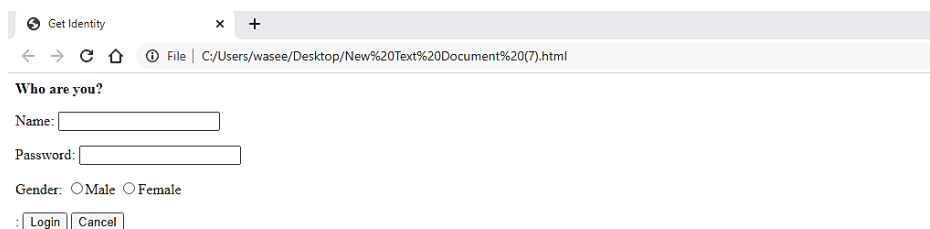

Activity 6:

Make a form with name, gender (use radio buttons) , password and submit form option. Use text box for input fields and buttons for submit option.

Solution:

```
<html>
<head>
<title>Get Identity</title>
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
</head>
<body>
<p><b>Who are you?</b></p>
<form method="post" action="">
<p>Name:
<input type="text" name="name">
</p>
<p>Password:
<input type="password" name="password">
</p>
<p>Gender:
<label><input type="radio" name="gender" value="m" />Male</label>
<label><input type="radio" name="gender" value="f" />Female</label>
</p>
<p>:
<input type="submit" name="submit" value="Login" />
<input type="reset" name="reset" value="Cancel" />
</p>
</form>
</body>
</html>
```

Output:

The screenshot shows a web browser window with the title 'Get Identity'. The address bar shows the file path 'C:/Users/wasee/Desktop/New%20Text%20Document%20(7).html'. The form content is as follows:

Who are you?

Name:

Password:

Gender: ☐ Male ☐ Female

:

Activity 7:

Creating a Signup/Registration form

Solution:

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width, initial-scale=1">
</head>
<body>
<form>
  <h1>Register</h1>
  <p>Please fill in this form to create an account.</p>
  <hr>

  <label for="email"><b>Email</b></label>
  <input type="text" placeholder="Enter Email" name="email" id="email" required>

  <label for="psw"><b>Password</b></label>
  <input type="password" placeholder="Enter Password" name="psw" id="psw" required>

  <label for="psw-repeat"><b>Repeat Password</b></label>
  <input type="password" placeholder="Repeat Password" name="psw-repeat" id="psw-repeat" required>
  <hr>

  <p>By creating an account you agree to our <a href="#">Terms & Privacy</a>.</p>
  <button type="submit" class="registerbtn">Register</button>
</form>
</body>
</html>
```

Output:

Register

Please fill in this form to create an account.

Email	Enter Email	Password	Enter Password	Repeat Password	Repeat Password
--------------	--	-----------------	---	------------------------	--

By creating an account you agree to our [Terms & Privacy](#).

3) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab.

Lab Task 1

Learn and try different tags and formatting options on your webpage of Comsats.

Lab Task 2

Create a webpage for Comsats library. Add lists and apply text formatting to your page. use videos and images of the library and then add them to your page.

Lab Task 3

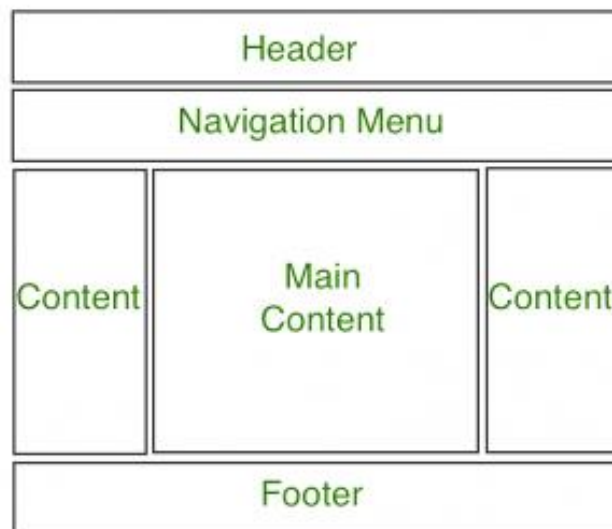

Use inline styling to make the webpage created in lab task 2, more aesthetic.

Lab Task 4

Create in-page reference to the list created in the body and marks the locations accordingly. Add tables to department and admission pages.

Lab Task 5

Use tables to create a page layout given below that displays your profile (Persional Homepage)

Lab Task 6

Write the HTML code for JOB application form of CUI (find the complete job application form from CUI web site)

		Non Faculty Job Application Form		Affix a recent photograph 3cm x 5cm	
COMSATS University Islamabad					
1.	Post applied for (mention only one position)				
2.	Department (mention department, if required)				
3.	Campus (Please tick only one choice)	Sahival ☐ Attock ☐			
4.	Name in full (Use CAPITAL LETTERS)				
5.	Father Name (Use CAPITAL LETTERS)				

Lab Task 7

Design the web template given below using Tables and forms concept in HTML. Moreover add colors to the fields and tables as mentioned below. Add links to connect face book, twitter, and terms & conditions.

Grey	
Black	 Connect with Facebook  Connect with Twitter Dark Blue Light blue Or sign up with
	First Name Last Name
	your@email.com White fields

	By creating an account, you agree to our Terms & Conditions
	Create account Green button
	Template by w3layouts

Lab 02

HTML CSS Fundamentals

Objective:

To familiarize the students with the use of **div**, Cascading Style Sheet (**CSS**) and the use of CSS for designing page layout cascading style sheets.

Activity Outcomes:

After this lab, the students should be able to

1. Apply CSS to the web pages.
2. Use the DIV tag
3. Use CSS for page layout designing

Instructor Note:

As pre-lab activity, read Chapter 4 from the textbook “Web Design Playground: HTML & CSS the Interactive Way 1st Edition, April 2019 by Paul McFedries”.

1. Useful Concepts:

CSS (Cascading Style Sheet)

CSS stands for Cascading Style Sheets. It is a way to style HTML webpages. A style sheet is the presentation of an HTML document. CSS is a style language that defines layout of HTML documents. For example, CSS covers fonts, colours, margins, lines, height, width, background images, advanced positions and many other things.

CSS can be written either inside the html tags (i.e. Inline), in the **<head></head>** section of an HTML document (i.e. Internal) or in a separate CSS File (i.e. External).

CSS Basic Structure

For **Inline styling** CSS is written inside the style attribute of a tag. For example,

```
<tag style="property:value"></tag>
```

For **Internal styling**, CSS is written into the head section of the HTML document. For example,

```
<style>
.class {
property:value;
}
</style>
```

For **External styling**, CSS is written as a separate file and the file is saved with an extension **.css**. In external style sheets the style tags are not necessary. Whereas, external CSS follow the same structure as the Internal CSS does.

Basic CSS Properties:

Font Properties

- Font Family
- Font Style
- Font Variant
- Font Weight
- Font Size Font Color

Background Properties

- Color Background
- Color Background Image
- Background Repeat
- Background Position

Text Properties

- Word Spacing
- Letter Spacing
- Text Decoration
- Vertical Alignment
- Line Height

Box Properties

- Margin
- Padding
- Border Width
- Border Color
- Border Style
- Width
- Height
- Float

Examples:

Inline CSS

```
<table style="width:200px; background-color: #000000;"> Table element with Inline Style</table>
```

Internal CSS

```
<html>

<head>
<title>Internal CSS</title>
<style>
h1{color:#FF0000; font-family:Calibri; font-size:36px
}
</style>
</head>

<body>
<h1>This heading is styled with CSS</h1>
</body>

</html>
```

External CSS

CSS file: (mystyle.css)

```
h1{color:green; font-size:36px; font-family:calibri
}
```

DIV Tag

The div tag is used to define a division or section in an HTML document. It visually, allows us to make containers that can be formatted.

It can be declared as: `<div>.....</div>`.

We use div and CSS to design a page layout. The div tag is used to represent sections in a page and CSS is used to style these sections.

We can describe the process of designing a page as:

- Determine the requirements of the site
- Group the required information
- Make a site map
- Identify key elements for each page
- Decide about the arrangement of information on each page
- Translate the design into code

2) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
<i>1</i>	<i>15 Minutes</i>	<i>Low</i>	<i>CLO-4</i>
<i>2</i>	<i>45 Minutes</i>	<i>High</i>	<i>CLO-4</i>
<i>3</i>	<i>30 Minutes</i>	<i>Medium</i>	<i>CLO-4</i>
<i>4</i>	<i>30 Minutes</i>	<i>Medium</i>	<i>CLO-4</i>

Activity 1:

Apply border and padding properties on the different paragraphs of an HTML document.

Solution:

```
<!DOCTYPE html>
<html>
<head>
<style>
p {
  border: 2px solid powderblue;
  padding: 30px;
}
</style>
</head>
<body>
<h1>This is a heading</h1>
<p>This is a paragraph.</p>
<p>This is a paragraph.</p>
<p>This is a paragraph.</p>
</body>
</html>
```

Output:

This is a heading

This is a paragraph.

This is a paragraph.

This is a paragraph.

Activity 2:

Use the HTML page created in Lab 1 (Signup page) and create an external style sheet that styles the elements of the page including the style for

- 1. apply font and text properties*
- 2. control the background color with CSS*
- 3. style different states of links*
- 4. paragraphs and headings*

Solution:

External Stylesheet.css

```
body {
background-color: lightblue;
}
h1 {
color: navy; margin-left: 20px; font-family: verdana;

font-size: 50px;
}
#para1 {
text-align: center; color: red;
}
.center {
text-align: center; color: yellow;  }

<!DOCTYPE html>
<html>
<style>
body {font-family: Arial, Helvetica, sans-serif;}
* {box-sizing: border-box}

/* Full-width input fields */
input[type=text], input[type=password] {
width: 100%;
padding: 15px;
margin: 5px 0 22px 0;
display: inline-block;
border: none;
background: #f1f1f1;
}
```

```

input[type=text]:focus, input[type=password]:focus {
    background-color: #ddd;
    outline: none;
}

hr {
    border: 1px solid #f1f1f1;
    margin-bottom: 25px;
}

/* Set a style for all buttons */
button {
    background-color: #04AA6D;
    color: white;
    padding: 14px 20px;
    margin: 8px 0;
    border: none;
    cursor: pointer;
    width: 100%;
    opacity: 0.9;
}

button:hover {
    opacity:1;
}

/* Extra styles for the cancel button */
.cancelbtn {
    padding: 14px 20px;
    background-color: #f44336;
}

/* Float cancel and signup buttons and add an equal width */
.cancelbtn, .signupbtn {
    float: left;
    width: 50%;
}

/* Add padding to container elements */
.container {
    padding: 16px;
}

/* Clear floats */
.clearfix::after {
    content: "";
    clear: both;
    display: table;
}

/* Change styles for cancel button and signup button on extra small screens */
@media screen and (max-width: 300px) {
    .cancelbtn, .signupbtn {
        width: 100%;
    }
}
</style>

```

```

<body>
<form action="/action_page.php" style="border:1px solid #ccc">
  <div class="container">
    <h1>Sign Up</h1>
    <p>Please fill in this form to create an account.</p>
    <hr>

    <label for="email"><b>Email</b></label>
    <input type="text" placeholder="Enter Email" name="email" required>

    <label for="psw"><b>Password</b></label>
    <input type="password" placeholder="Enter Password" name="psw" required>

    <label for="psw-repeat"><b>Repeat Password</b></label>
    <input type="password" placeholder="Repeat Password" name="psw-repeat" required>

    <label>
      <input type="checkbox" checked="checked" name="remember" style="margin-bottom:15px"> Remember me
    </label>

    <p>By creating an account you agree to our <a href="#" style="color:dodgerblue">Terms & Privacy</a>.</p>

    <div class="clearfix">
      <button type="button" class="cancelbtn">Cancel</button>
      <button type="submit" class="signupbtn">Sign Up</button>
    </div>
  </div>
</form>
</body>
</html>

```

Output:

Activity 3:

Use div and CSS properties to design a responsive form that contains First name, Last Name, Country (dropdown), Subject and submit button.

Solution:

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width, initial-scale=1">
<style>
* {
    box-sizing: border-box;
}

input[type=text], select, textarea {
    width: 100%;
    padding: 12px;
    border: 1px solid #ccc;
    border-radius: 4px;
    resize: vertical;
}

label {
    padding: 12px 12px 12px 0;
    display: inline-block;
}

input[type=submit] {
    background-color: #04AA6D;
    color: white;
    padding: 12px 20px;
    border: none;
    border-radius: 4px;
    cursor: pointer;
    float: right;
}

input[type=submit]:hover {
    background-color: #45a049;
}

.container {
    border-radius: 5px;
    background-color: #f2f2f2;
    padding: 20px;
}

.col-25 {
    float: left;
    width: 25%;
    margin-top: 6px;
}

.col-75 {
    float: left;
    width: 75%;
    margin-top: 6px;
}
```

```

/* Clear floats after the columns */
.row:after {
    content: "";
    display: table;
    clear: both;
}

/* Responsive layout - when screen is less than 600px wide, make two columns stack
on top of each other instead of next to each other */
@media screen and (max-width: 600px) {
    .col-25, .col-75, input[type=submit] {
        width: 100%;
        margin-top: 0;
    }
}
</style>
</head>
<body>

<h2>Responsive Form</h2>
<p>Resize the browser window to see the effect. When the screen is less than 600px wide,
make the two columns stack on top of each other instead of next to each other.</p>

<div class="container">
    <form action="/action_page.php">
        <div class="row">
            <div class="col-25">
                <label for="fname">First Name</label>
            </div>
            <div class="col-75">
                <input type="text" id="fname" name="firstname" placeholder="Your name..">
            </div>
        </div>
        <div class="row">
            <div class="col-25">
                <label for="lname">Last Name</label>
            </div>
            <div class="col-75">
                <input type="text" id="lname" name="lastname" placeholder="Your last name..">
            </div>
        </div>
        <div class="row">
            <div class="col-25">
                <label for="country">Country</label>
            </div>
            <div class="col-75">
                <select id="country" name="country">
                    <option value="Pakistan">Pakistan</option>
                    <option value="Canada">Canada</option>
                    <option value="usa">USA</option>
                </select>
            </div>
        </div>
    </form>
</div>

```

```

<div class="row">
  <div class="col-25">
    <label for="subject">Subject</label>
  </div>
  <div class="col-75">
    <textarea id="subject" name="subject" placeholder="Write something.." style="height:200px"></textarea>
  </div>
</div>
<div class="row">
  <input type="submit" value="Submit">
</div>
</form>
</div>

</body>
</html>

```

Output:

Responsive Form

Resize the browser window to see the effect. When the screen is less than 600px wide, make the two columns stack on top of each other instead of next to each other.

First Name	Your name..
Last Name	Your last name..
Country	Pakistan
Subject	Write something..
<input type="submit" value="Submit"/>	

Activity 4:

Use div and CSS properties to design a page layout that contains

- 1. a header section to display the title, style this title with CSS*
- 2. a form container that contains a registration form, use CSS to style the elements of the form*
- 3. a footer section*

Solution:

External CSS:

```
body {
background-color: lightblue;
}
h1 {
color: navy; margin-left: 20px; font-family: verdana;
font-size: 50px;
}
#para1 {
text-align: center; color: red;
}
.center {
text-align: center; color: yellow;
}
<html>
<head>
<title>Using divs</title>
</head>
<body>
  <div>
<div style="width:100px;background-color:gray">First</div>
<div style="width:100px;background-color:red">second</div>
</div>
</body>
</html>
```

```

<!DOCTYPE html>
<html>
<style>
body {font-family: Arial, Helvetica, sans-serif;}
* {box-sizing: border-box}

/* Full-width input fields */
input[type=text], input[type=password] {
  width: 100%;
  padding: 15px;
  margin: 5px 0 22px 0;
  display: inline-block;
  border: none;
  background: #f1f1f1;
}

input[type=text]:focus, input[type=password]:focus {
  background-color: #ddd;
  outline: none;
}

hr {
  border: 1px solid #f1f1f1;
  margin-bottom: 25px;
}

/* Set a style for all buttons */
button {
  background-color: #04AA6D;
  color: white;
  padding: 14px 20px;
  margin: 8px 0;
  border: none;
  cursor: pointer;
  width: 100%;
  opacity: 0.9;
}

button:hover {
  opacity:1;
}

/* Extra styles for the cancel button */
.cancelbtn {
  padding: 14px 20px;
  background-color: #f44336;
}

/* Float cancel and signup buttons and add an equal width */
.cancelbtn, .signupbtn {
  float: left;
  width: 50%;
}

```

```

/* Add padding to container elements */
.container {
    padding: 16px;
}

/* Clear floats */
.clearfix::after {
    content: "";
    clear: both;
    display: table;
}

/* Change styles for cancel button and signup button on extra small screens */
@media screen and (max-width: 300px) {
    .cancelbtn, .signupbtn {
        width: 100%;
    }
}
</style>
<body>

<form action="/action_page.php" style="border:1px solid #ccc">
    <div class="container">
        <h1>Sign Up</h1>
        <p>Please fill in this form to create an account.</p>
        <hr>

        <label for="email"><b>Email</b></label>
        <input type="text" placeholder="Enter Email" name="email" required>

        <label for="psw"><b>Password</b></label>
        <input type="password" placeholder="Enter Password" name="psw" required>

        <label for="psw-repeat"><b>Repeat Password</b></label>
        <input type="password" placeholder="Repeat Password" name="psw-repeat" required>

        <label>
            <input type="checkbox" checked="checked" name="remember" style="margin-bottom:15px"> Remember me
        </label>

        <p>By creating an account you agree to our <a href="#" style="color:dodgerblue">Terms & Privacy</a>.</p>

        <div class="clearfix">
            <button type="button" class="cancelbtn">Cancel</button>
            <button type="submit" class="signupbtn">Sign Up</button>
        </div>
    </div>
</form>

</body>
</html>

```

Output:

The screenshot displays a web browser window with a single tab titled 'Home Page'. The address bar shows the file path: `file:///C:/Users/Administrator/Desktop/VU%20project/index.html`. The main content area features a large blue header with the text 'COMSATS UNIVERSITY ISLAMABAD' in white, bold, uppercase letters. Below this header is a 'User Registration' form. The form has a blue title bar and contains the following fields and controls:

- 'Your Full Name:' followed by a text input field.
- 'Your Email Address:' followed by a text input field.
- 'Your Password:' followed by a text input field.
- 'Your Picture:' followed by a 'Choose File' button and the text 'No file chosen'.
- A 'Register' button located at the bottom right of the form.

At the bottom of the page, there is a blue footer bar with the text '© all rights reserved'.

3) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 4

Design the web page for Comsats Alumni using External CSS.

Lab 03

Creating a Digital Portfolio

Objective:

The aim is to equip students with essential skills in website creation and customization using Google Sites and Wix. For Google Sites, objectives include mastering content creation, customization, integration with Google Workspace tools and analytics interpretation. On the other hand, Wix objectives focus on navigating the platform, content creation and design customization, integration of apps for enhanced functionality, mobile responsiveness, and security measures. These objectives provide a structured approach for users to learn and apply key concepts, empowering them to build professional and engaging websites tailored to their needs and preferences.

Activity Outcomes:

After this lab, the students should be able to:

1. Understand the functionality of Wix & Google sites along with different uses.
2. Partially complete an e-commerce portfolio with at least one example of your work.

Instructor Note:

1. <https://support.google.com/sites/?hl=en#topic=7184580>
2. <https://wixtoolset.org/docs/intro/>

1) Useful Concepts:

Google sites:

Google Sites can be integrated with other Google Workspace tools. Google Sites seamlessly incorporates features like Google Drive, Calendar, Maps, and Forms, allowing users to embed content directly from these applications into their websites. This integration enhances collaboration and productivity, as users can easily share documents, schedule events, display location maps, and gather information through forms without leaving the site. Leveraging these interconnected tools within Google Sites streamlines workflow processes and fosters efficient communication among team members or website visitors. This concept not only simplifies content management but also enriches the overall functionality and user experience of Google Sites.

Another valuable concept within Google Sites is its intuitive and user-friendly interface, which empowers users of all skill levels to create professional-looking websites with ease. The platform offers a drag-and-drop editor and customizable templates that simplify the website-building process, eliminating the need for coding knowledge. Additionally, Google Sites provides real-time collaboration features, allowing multiple users to edit and contribute to a site simultaneously. This fosters teamwork and facilitates the creation of dynamic and engaging web content. With its straightforward design and collaborative capabilities, Google Sites enables users to quickly bring their ideas to life and share them with audiences, making it an invaluable tool for individuals, businesses, and educational institutions alike.

Wix:

One of the most beneficial concepts within Wix is its extensive collection of customizable templates. Wix offers a vast array of professionally designed templates across various industries and purposes, catering to the diverse needs and preferences of users. These templates serve as a foundation for building stunning websites, providing users with pre-designed layouts and elements that they can easily modify to suit their branding and content. Furthermore, Wix employs a user-friendly drag-and-drop editor, allowing users to customize every aspect of their site with ease, from colors and fonts to layout and functionality. This concept of customizable templates streamlines the website creation process, enabling users to create visually appealing and functional websites in a fraction of the time it would take with traditional web design methods. Additionally, Wix's template selection ensures that users have access to modern and responsive designs that are optimized for various devices, enhancing the overall user experience.

Another invaluable concept within Wix is its extensive App Market. The App Market offers a wide range of third-party applications and integrations that users can easily add to their websites to enhance functionality and user experience. These apps cover diverse functionalities such as e-commerce, booking systems, social media integration, analytics, and more. By leveraging these apps, users can add advanced features to their websites without the need for coding or technical expertise. This concept empowers users to create highly customized and interactive websites that meet their specific needs and goals. Additionally, the App Market constantly updates with new apps and features, ensuring that users have access to the latest tools and technologies to optimize their websites. Overall, the App Market is a key aspect of Wix that enables users to extend the capabilities of their websites and create truly unique online experiences for their visitors.

2) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
<i>1</i>	<i>45</i>	<i>Medium</i>	<i>CLO-5</i>
<i>2</i>	<i>45</i>	<i>Medium</i>	<i>CLO-5</i>

Activity 1:

Create a digital portfolio in Google Sites

Solution:

Log in to your Gmail account or create a new account for free at accounts.google.com.

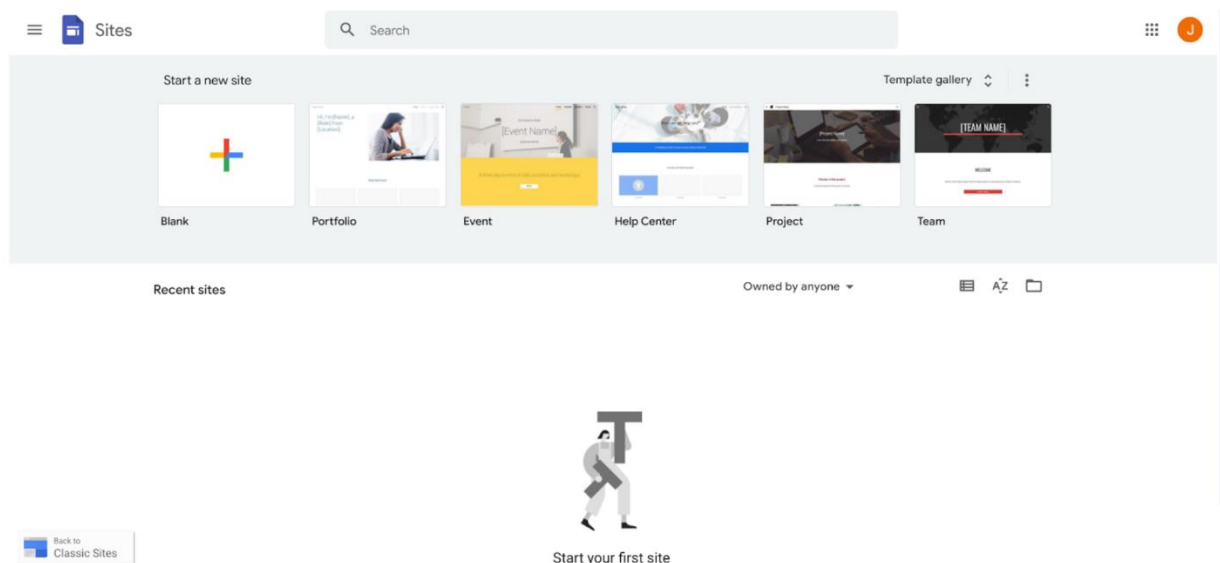

Once you are logged in, navigate to sites.google.com.

Note: If you are using the alternative option, skip to the alternative set of directions below the Google Sites instructions.

From the **Start a new site** menu, select the *Portfolio* template.

Add a page

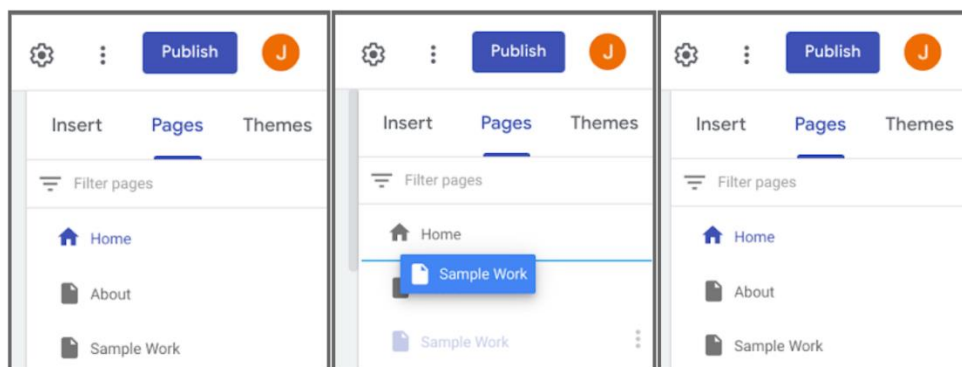

1. On a computer, open a site in [new Google Sites](#).
2. At the right, click **Pages**.
3. At the bottom right, hover over Add **+**.
4. Click New page .
5. Enter the page name.
6. Click **Done**.
7. To publish your changes, at the top right, click **Publish**.

Step 3: Structure your portfolio site

From the **Pages** menu, select the third webpage labeled *Project Page*. Change the title to “Sample Work”.

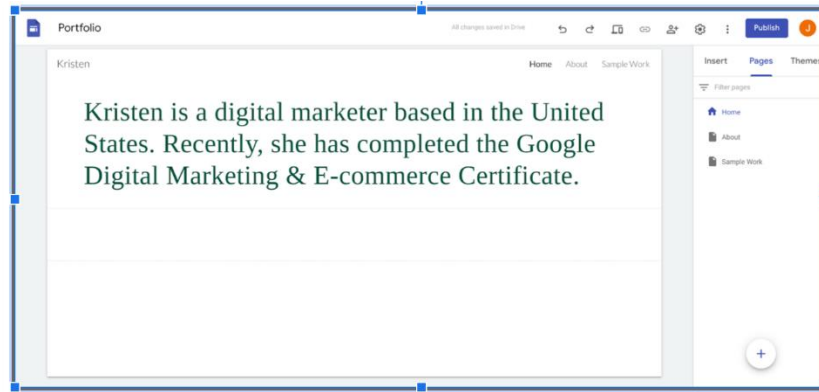

On the **Pages** menu, click and drag the *Sample Work* page to the second position on the list.

Step 4: Edit your homepage

Your homepage will be the first page your website visitors experience when visiting your site. In the text box, add a short description of who you are, including your job title.

To remove the template's image, select the image and then click *Remove* (trash can icon).

Step 5: Edit your Sample Work page

Select the *Sample Work* page from the **Pages** menu. Select the *Project Name* title text and replace it with "**Design front end websites using HTML/CSS.** " activity.

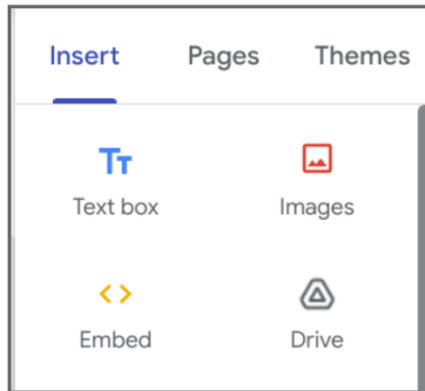

In the text box below the title, write a brief description of the project, including why you created it and what it demonstrates. For example:

- *I completed this activity as part of the E-commerce & Digital Marketing course at Comsats University Islamabad. This completed activity demonstrates my ability to write, design, and repurpose engaging front end websites using HTML/CSS. It also demonstrates my knowledge of front end technologies.*

Be sure to create your own original sentences for this section.

Step 6: Add your work sample link

To add a link to your work sample, select the **Insert**, then select **Images**.

Take images of your two mini projects that were given to you as practicing HTML & CSS on Assets provided for YTS & PDF Candy. Take snapshots using sniping tool(shift+ windowskey+s) Use Images to add your work

Navigate through the options and upload the images for your projects.

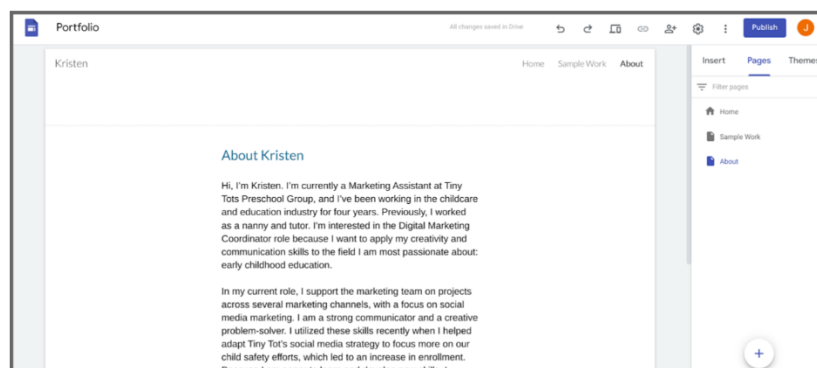

Step 7: Edit your About page

Next, select the *About* page from the **Pages** menu. In the page, replace the heading with “About” and your first name.

Write at least three sentences about you to let employers know who you are. Include the following information:

- Your first name
- Your desired position
- Your previous experience with digital marketing or e-commerce

Then, remove any unnecessary template elements that you did not use, including images and text boxes.

Step 8: Preview your website

Select the **Preview** icon to view your unpublished website.

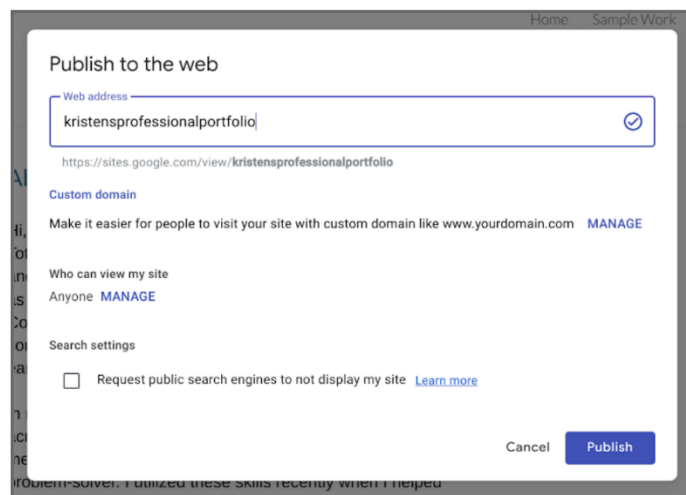

Review your website to see how it will appear to your digital portfolio's viewers. When you're finished, select the **Exit preview** icon to return to the editor.

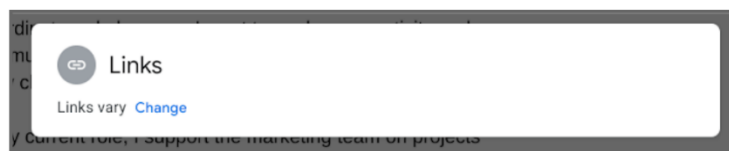

Step 9: Publish your portfolio website

When you're ready to publish your website, click **Publish**. Then, create a web address. The URL that appears in gray below the web address box is your portfolio's URL.

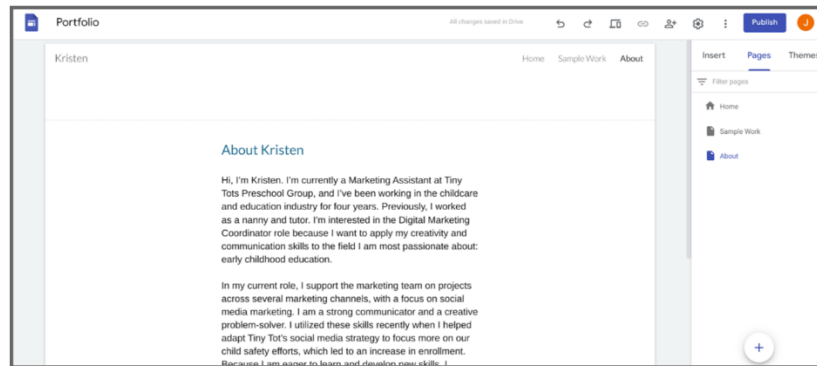

Next, click *Manage* under the heading **Who can view my site**. Under the heading titled Links, click *Change*. Ensure that **Published site** is set to *Public* so that your peers can view your website.

When you are ready, click **Publish** to publish your portfolio.

Note: You can always unpublish your website at any time. To unpublish your website, click the arrow next to **Publish** and click **Unpublish**.

Output:

Activity 2:

Create a digital portfolio in Wix

Solution:

Step-By-Step Assignment Instructions

Step 1: Create a Wix account

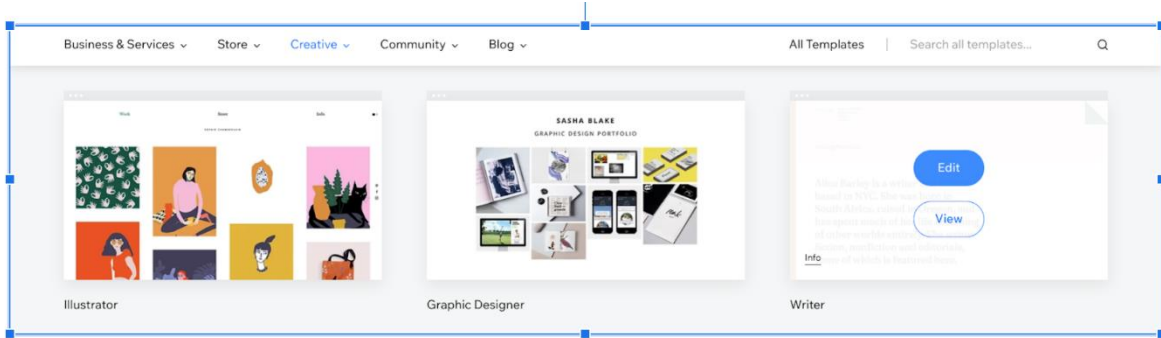

To create a new Wix account:

- Go to the [Wix.com signup page](https://www.wix.com/sign-up).
- Register with your email address, Facebook account, or Google credentials.
- Click *Sign Up*.
- Follow the sign up steps.

Step 2: Select a template

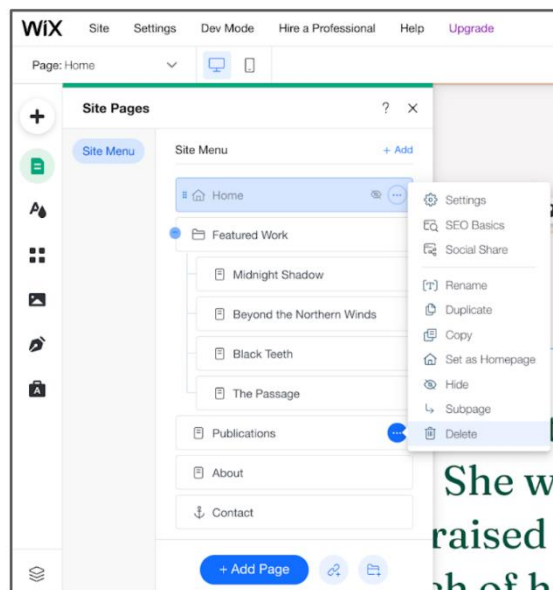

From the **All Templates** menu, select the *Portfolios* templates.

Select the *Writer* template and click *Edit*.

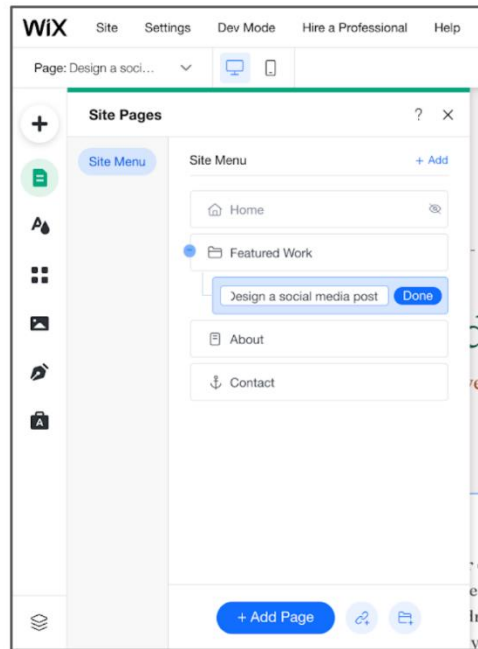

Step 3: Structure your portfolio site

From the **Pages** menu, delete all the pages except Home, Featured Work, About, and Contact. To delete a page, select the page and click the three dots menu, then click *Delete*.

Delete all but one subpage under **Featured Work**.

Rename the **Featured Work** text with "Sample Work". Rename the subpage "**Design front end websites using HTML/CSS**"

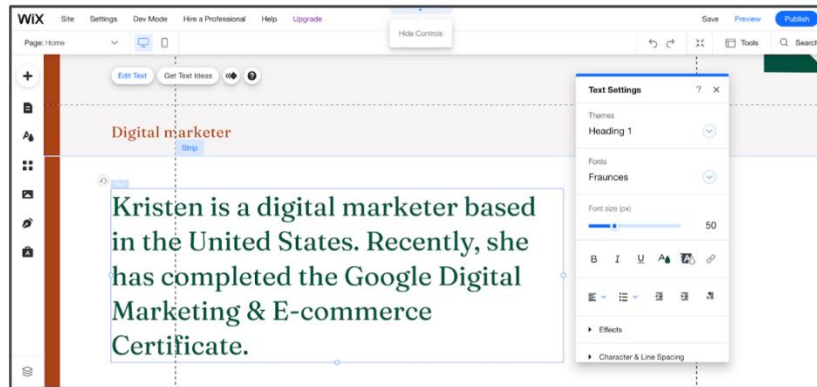

Step 4: Edit your homepage

Your homepage will be the first page your website visitors experience when visiting your site.

Return to your homepage and replace the large text box sentences with a short description of who you are, including your and professional title. Be sure to keep your personally identifiable information (PII) to a minimum to protect your privacy.

Update the name at the top of the page. Change *Writing Portfolio* to "Portfolio."

E.g

A completed homepage on Wix that has the following text: **Your Name** is a digital marketer based in Pakistan. Recently, He/ she has completed the E-commerce & Digital Marketing Course from Comsats University Islamabad.

Step 5: Edit your “Design front end websites using HTML/CSS” page

From the **Site** menu, select the **Design front end websites using HTML/CSS** sub page under the Sample Work folder. Once on the page, select the header and replace it with the name of your work sample: **" Design front end websites using HTML/CSS " activity**.

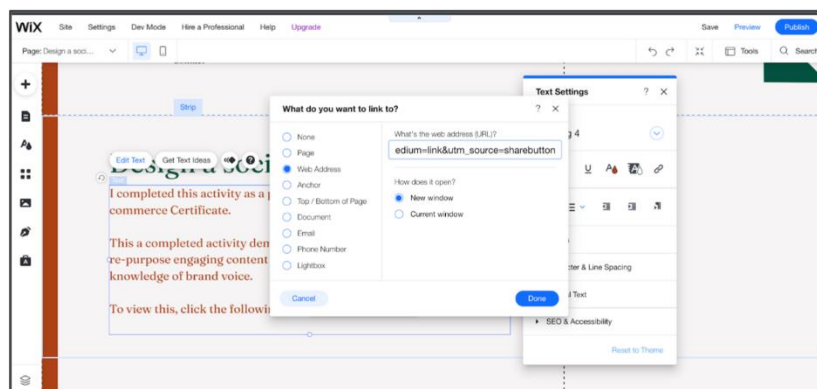

Write a brief description of the project, including why you created it and what it demonstrates. For example:

- I completed this activity as part of the E-commerce & Digital Marketing. This completed activity demonstrates my ability to write, design, and development using **front end websites using HTML/CSS**. It also demonstrates my knowledge of brand voice.

Step 6: Add your work sample

Add your project pictures to demonstrate your work.

Open a new tab in your browser. Navigate to the work you completed for the **front end websites using HTML/CSS**.

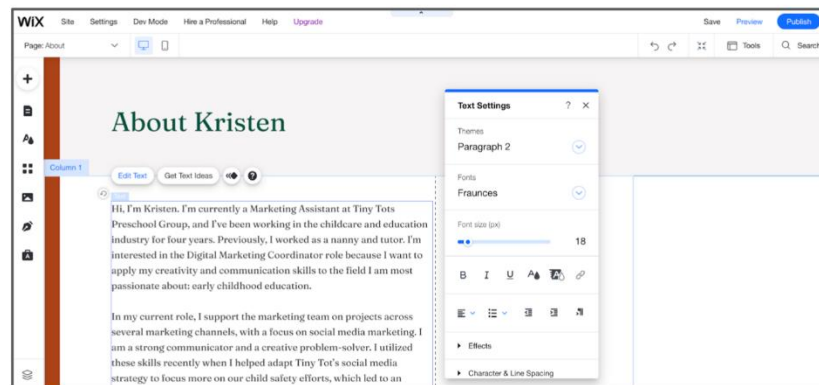

Step 7: Edit your “About” page

Next, select the *About* page from the pages menu. Replace the heading with “About” and your first name.

Write at least three sentences about you to let employers know who you are. Include the following information:

- A first name
- Your desired position
- Your previous experience with digital marketing or e-commerce

Then remove any unnecessary template elements that you did not use, including images and text boxes.

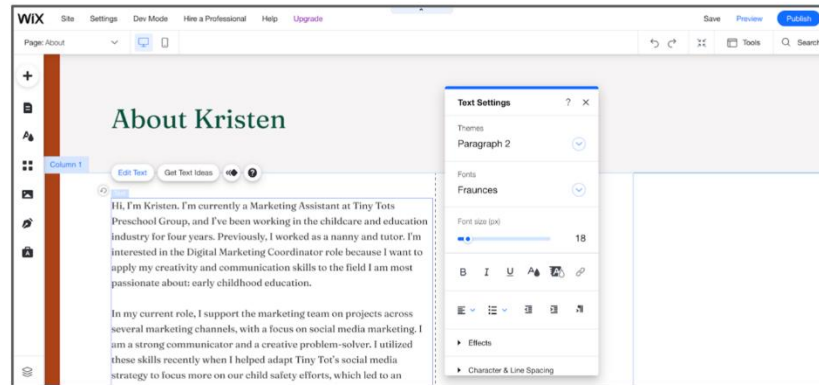

Step 8: Preview your website

Select **Preview** to view your unpublished website.

Review your website to see how it will appear to your digital portfolio's viewers.

Step 9: Publish your portfolio website

Output:

3) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1

Crafting a Personal Portfolio Website using Google Sites

In this task, you'll embark on a journey to initiate your portfolio website, considering various templates to best represent your professional identity. Your planning stage will involve meticulous structuring, determining sections like an engaging "About Me," a project showcase, and a comprehensive resume or CV. Throughout the process, customization and design play pivotal roles as you tailor the layout, colors, and fonts to align with your personal brand while ensuring responsiveness across diverse devices.

Lab Task 2

Create a simple e-tailer website on wix.com for a free trial period.

1. Following is required from you:
2. Create a website.
 - a. Pages Including a home page, product page, shopping cart, and contact page etc.
 - b. Add 10 Products per page.
 - c. Extra credit will be given for additional complexity and creativity.

Lab 04

Design an E-Store with Shopify.

Objective:

To design a fully functional online store using the Shopify platform, incorporating visually appealing layouts, user-friendly navigation, and seamless integration of product listings and checkout processes.

Activity Outcomes:

After this lab, the students should be able to design a store with Shopify:

1. Create a visually appealing and user-friendly online store interface with integrated product listings.
2. Implementation of a secure checkout process and configuration of store settings and policies.
3. Customization of store design elements and navigation menus for easy browsing.

Instructor Note:

As pre-lab activity, visit “<https://www.shopify.com/blog/topics/guides>”, and go to [Shopify features](#): To learn about the features available on the Shopify e-commerce platform.

1) Useful Concepts:

E-Commerce

E-commerce, short for electronic commerce, refers to the buying and selling of goods or services using the internet as the primary medium. It enables individuals and businesses to conduct transactions online, providing a platform for listing products or services and facilitating online payments. It is often referred to as "e-comm."

Basic e-commerce terms

Here are some basic terms that are helpful to know for getting started in e-commerce:

- **E-commerce (or e-comm):** The buying and selling of goods or services using the internet
- **E-commerce store:** A store that sells its products online
- **E-commerce platform:** A software application that allows you to sell products or services online
- **Responsive website:** A website that is designed to work on all types of devices, including computers, mobile phones, and tablets
- **Domain:** The core part of a website's URL, or internet address, such as google.com.
- **Landing page:** The first page a visitor encounters when they go to a website
- **Call-to-action:** The instruction provided to the customer that tells them what to do next
- **Conversion:** The completion of an activity that contributes to the success of a business
- **Digital shopping cart:** The virtual equivalent of a physical shopping cart
- **Payment service provider:** A secure way to process transactions online

E-commerce platforms

As you learned, an e-commerce store is typically built on an e-commerce platform, which is a software application that allows you to sell products or services online. Using a platform makes it easier to get started selling online, because you don't need to have any software development skills. E-commerce platforms often include built-in tools for marketing, analytics, inventory management, fulfillment, and other aspects of your business.

Here is a list of some of the most popular e-commerce platforms:

- [Shopify](#)
- [Wix](#)
- [BigCommerce](#)
- [Squarespace](#)
- [WooCommerce](#)
- [Magento Open Source](#)

Shopify, Wix, BigCommerce, and Squarespace are **Software-as-a-Service (SaaS) platforms**, which feature web-based software available on a subscription basis. With a SaaS platform, you don't need to know HTML or have any web development skills. You can simply choose from the options available in the platform.

WooCommerce and Magento Open Source are two examples of **open-source platforms**, which feature software that allows the user to access and edit the original source code. This means you can customize the website in almost any way you want. Just keep in mind that making these types of changes in an open-source platform often requires web development skills—or the ability to hire someone to make these changes for you.

Types of Products in E-Commerce

E-commerce encompasses a variety of products falling into distinct categories.

- 1. Physical Goods:** Examples include shoes, books, appliances, or phone cases—tangible items that can be touched and held.
- 2. Digital Goods:** Digital products like e-books, photos, music files, or online courses, which are downloaded to devices.
- 3. Services:** Online services such as tutoring lessons, health coaching, business consulting, or professional services like graphic design.
- 4. Software:** Products like Adobe Photoshop, software programs purchased online and downloaded to users' computers.

Basic elements of an e-commerce store

Most e-commerce stores contain certain elements that customers expect to find whenever they're shopping online. Here are some of the basic elements you might find in an e-commerce store:

Home page

The **home page** is the main page of a website. It helps customers understand what types of products a company sells, helps them find the information or products they need, and serves as a main hub that connects to other pages on the website.

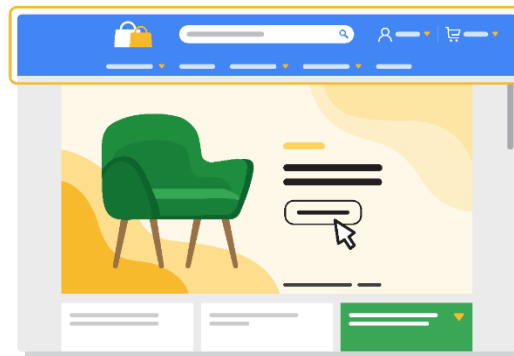

Navigation bar

The **navigation bar** is a collection of links to other pages within the website. It helps customers find the department, category, or section of the website that will be most useful for them. The navigation bar is typically at the top or left-hand side of the page. It's a fixed element, which means that it stays in place even when a customer navigates to a different page on the website.

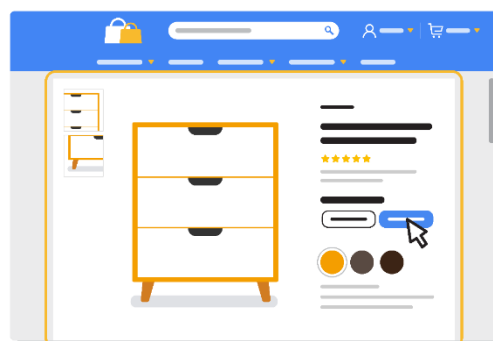

The navigation bar usually includes a search function and a navigation menu to help customers find what they need. It may also include a link to the shopping cart and the customer's account, as well as other helpful links. If the company has physical locations, the navigation bar may include a store locator.

The navigation bar also includes a menu with links to department or category pages. For example, an online store that sells furniture might include links to the kids' furniture category or office furniture category. Within these categories, a customer would be able to find desks.

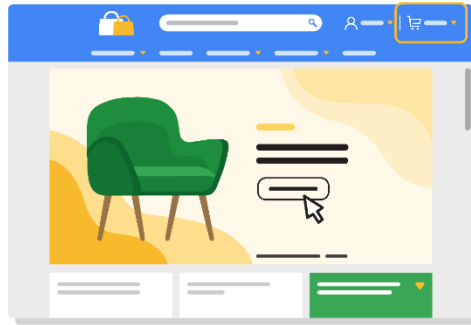

Product detail pages

Product detail pages—sometimes called **PDPs**—are pages on an e-commerce site that provide information about a specific product. They typically include a product description, specifications or technical details, product images or videos, customer reviews, and any other relevant information about the product.

Shopping cart

A **digital shopping cart** is the virtual equivalent of a physical shopping cart. It holds all of the products a customer is planning to buy. The customer can add multiple products to their cart or remove products at any time. After the customer is finished shopping, they can click on their shopping cart and begin the checkout process.

Checkout

During the checkout process, the customer enters their billing and shipping information. E-commerce stores use a **payment service provider**, which is a secure way to process transactions online.

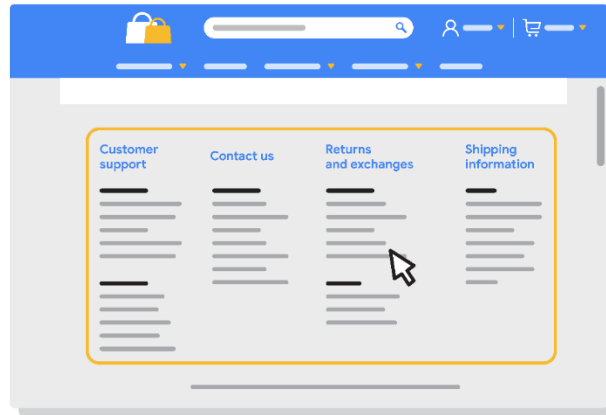

If the customer has already created an account with the store, they can sign in to their account before checkout. This offers a faster checkout option, since the customer's address and other information automatically populates in the required fields.

Help and support

E-commerce stores also include options for customers who may need help or support during or after the buying process. For example, the store might include a chat function so that customers can ask questions and receive answers online. There are often multiple ways to contact customer service and find self-help resources.

Typically, the store's website also includes links to helpful information, such as frequently asked questions (FAQs), return and exchange policies, shipping policies, contact information, and details about the company and their values.

Links to these pages are often included in the **footer**, which is a navigation section at the bottom of the website. It includes a collection of links to other pages within the website. These are often supporting pages, such as customer support and services, policies, and information about the company.

Domains

Whether you end up using an open-source or SaaS platform for an e-commerce store, you'll need to register a domain. A **domain** is the URL (or web address) for your website—it can be found in the address bar at the top of your browser window. For example, when you learn about Shopify later in this course, you'll notice the domain name we are using in our example store is www.bathecoshop.com. Your domain must be unique, which means that no one else has registered the same domain name.

***Note:** Purchasing a domain requires an upfront cost and then an annual fee to keep it active.*

Some SaaS platforms, like Shopify, allow you to purchase domains through the platform. For open-source solutions, you can register your domain through a site such as [GoDaddy](https://www.godaddy.com). You can find a list of accredited open-source solutions on [Google Registry](https://www.google.com/registry).

Shopify

Most customers expect to be able to purchase a company's products online. That's why it's important for businesses to have an online store. Building an online store takes time and effort, but with an e-commerce platform like Shopify, the process is easier.

Shopify is a **Software-as-a-Service (SaaS)** platform, which is web-based software available on a subscription basis. In this reading, you'll learn more about the benefits of using Shopify to build an online store.

Benefits of using Shopify

Shopify is an e-commerce platform that allows companies to sell their products online to customers anywhere in the world. It offers multiple plans designed to work for businesses of all sizes, from self-employed entrepreneurs to huge corporations.

Built-in features and tools

Shopify offers multiple features and tools that make it easier to build and manage an online store. Here are a few of these features and tools:

Online store builder: Shopify makes it easy to build an e-commerce store with free website themes. Design or coding skills aren't required. All Shopify themes are fully responsive, so they're mobile-friendly and provide a consistent experience across all devices.

E-commerce capabilities for existing websites: If you already have a website or blog, you can add e-commerce capabilities to it by adding a Shopify buy button that allows customers to purchase products on your existing site.

Buy Button

Free to add. Buy Button fees may apply.
Sell your products on any website or blog.

Secure checkout: Shopify provides a built-in shopping cart and checkout solution that protects customers' information. It's also mobile-friendly for customers shopping on their smartphones.

Payment processing: Shopify offers credit card payment processing for online and in-person sales with Shopify Payments. They also support third-party payment options, such as Paypal.

Let your customers pay their way with Shopify Payments

- ✓ Competitive credit card rates
- ✓ Better checkout conversion with Shop Pay
- ✓ Easy chargeback management
- ✓ Payouts and cashflow tracking

Shipping platform: You can get products to customers easily with Shopify's built-in shipping options. Plus, you can keep track of inventory levels.

Integration with third-party shopping channels: Shopify makes it easy to save product details in one place and sell on multiple channels, such as Facebook, Google, Amazon, eBay, Pinterest, and TikTok.

Marketing tools: You can manage your email marketing, content marketing, SEO, and ad campaigns all in one place with Shopify's marketing tools.

Blog: A built-in blogging platform makes it easy to share valuable information with customers and keep your content fresh.

How to Choose Eco-Friendly Bath Towels

APRIL 7, 2022

🔗 Share

You can have bath towels that feel luxurious—and are kind to the earth. We'll give you some tips on how to choose bath towels that are soft, absorbent, and eco-friendly.

Eco-friendly materials

There are several eco-friendly materials you can choose for your bath towels. One of the most

Analytics and reporting tools: You can stay up to date on how the store is performing with real-time analytics and reports you can share with stakeholders.

24/7 customer service: If you need help, you can visit Shopify's help center online or contact their customer support team any time, day or night.

Resources for more information

Learn more about all the features available in Shopify that make it easier to build and manage an e-commerce store.

Learn more about working in Shopify

Previously, you learned the essentials for creating a functional Shopify store.

In this reading, you will learn about more ways to improve your customers' shopping experience on your mock Shopify store. These include: adding your brand's voice to your site, choosing the right theme, and optimizing essential information.

Add your brand voice

Expressing your brand's voice on your store's website is a great way to attract customers and get them interested in your brand. As a reminder, **brand voice** is the distinct personality a brand takes on in a company's communications. This includes the messaging and imagery on your store's website. Two ways to display brand voice on your site are creating "about us" pages and blog sections.

"About us" pages offer a great way for customers to learn about your business and who you are as a brand. Use this section to tell customers about your brand's journey and mission.

Blog sections are a thoughtful and deliberate strategy to connect with customers. Adding a blog section to your store also helps improve its SEO by adding more searchable keywords. The blog posts can include information about your brand’s products, announcements, and compelling narratives about your company or a related topic.

You can add these sections to your site by using the sales channel menu on your admin dashboard.

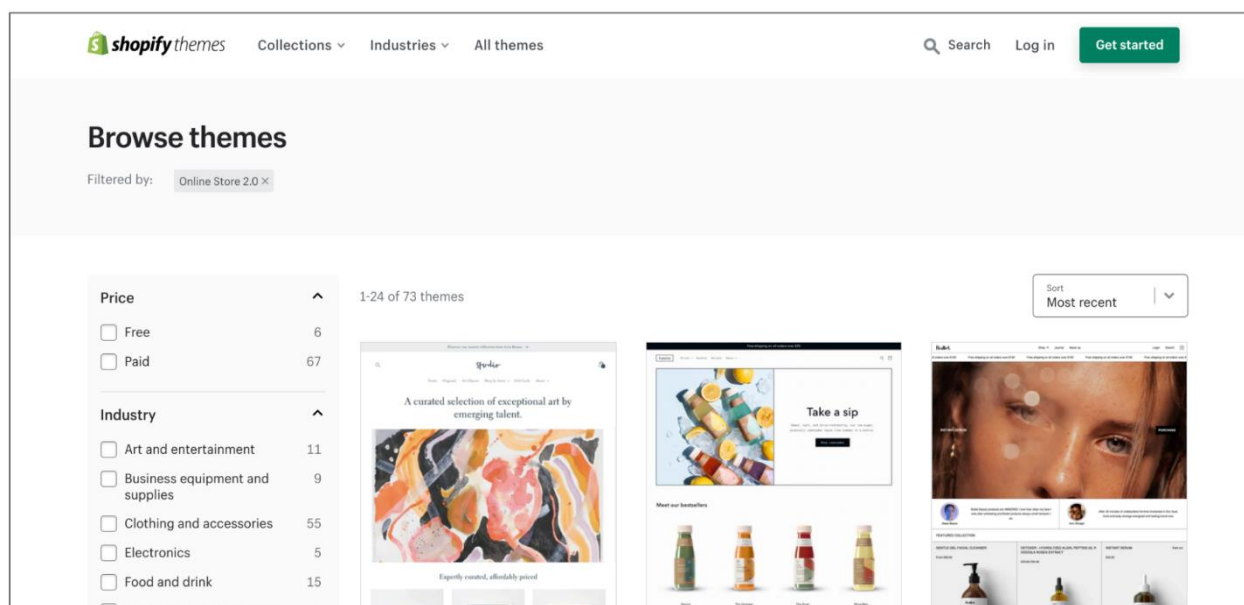

While honing your brand voice with “about us” pages or blog posts, decide how you want your audience to perceive your brand. Then practice developing your tone of voice and implement it into all communications. **Tone of voice** is how the character of your business is perceived in written and spoken communication. It's not about what you say, but rather the way you say it.

Choose the right theme

Earlier, you learned that a **theme** is a pre-built website template that creates the design and layout of your store. Themes form the organization, features, and style details—like fonts and colors—of your online store. Shopify applies a default theme to your store when it is created.

Choosing the right theme with specific layouts, colors, and fonts helps you tailor your brand’s identity so that your store is recognizable and distinctive. Choosing the right theme can also complement your product photos, making customers interested in what you are selling.

Select the **Themes** tab on your Shopify profile to view your live theme, explore the theme library for free and paid themes, or upload a theme you purchased elsewhere.

If you cannot find the right theme template for your store, you have the option to build your own theme or adjust an existing theme—but use caution. Themes are created using code, which takes time and skill to perfect without errors. To avoid making coding mistakes, some merchants hire

web developers. You are not expected to purchase a theme or hire a web developer for your mock Shopify store.

Optimize essential information

Customers expect to be able to find important shopping information when they visit an online store. When important information is missing or inaccurate, it can cause the customer to lose trust in your brand—and even leave your site—costing you a possible conversion.

When optimizing your store, pay close attention to your contact information, product details, and return policy.

You should also include **terms of service**, which are legal agreements between a business and customers, and a **privacy policy**, which is a legal document that discloses some or all the ways a business gathers, uses, discloses, and manages a customer's data.

Google requires that all e-commerce businesses include this information for customer review. Shopify offers templates for these items. Review the provided templates to ensure that they align with your business.

Contact information

A **contact page** is a common web page on a website for visitors to contact the organization or individual providing the website. Most templates include a contact page that has the option to add your business's name, customer support email address, and phone number, if available.

Contact Us

If you have any questions or comments for us, fill out the form below with all of your details and we'll get back to you within 48 hours. Or feel free to call us at 1-855-816-3857. We're available to take your call between 9am to 5pm EST.

Name

Email *

Phone Number

Message

SEND

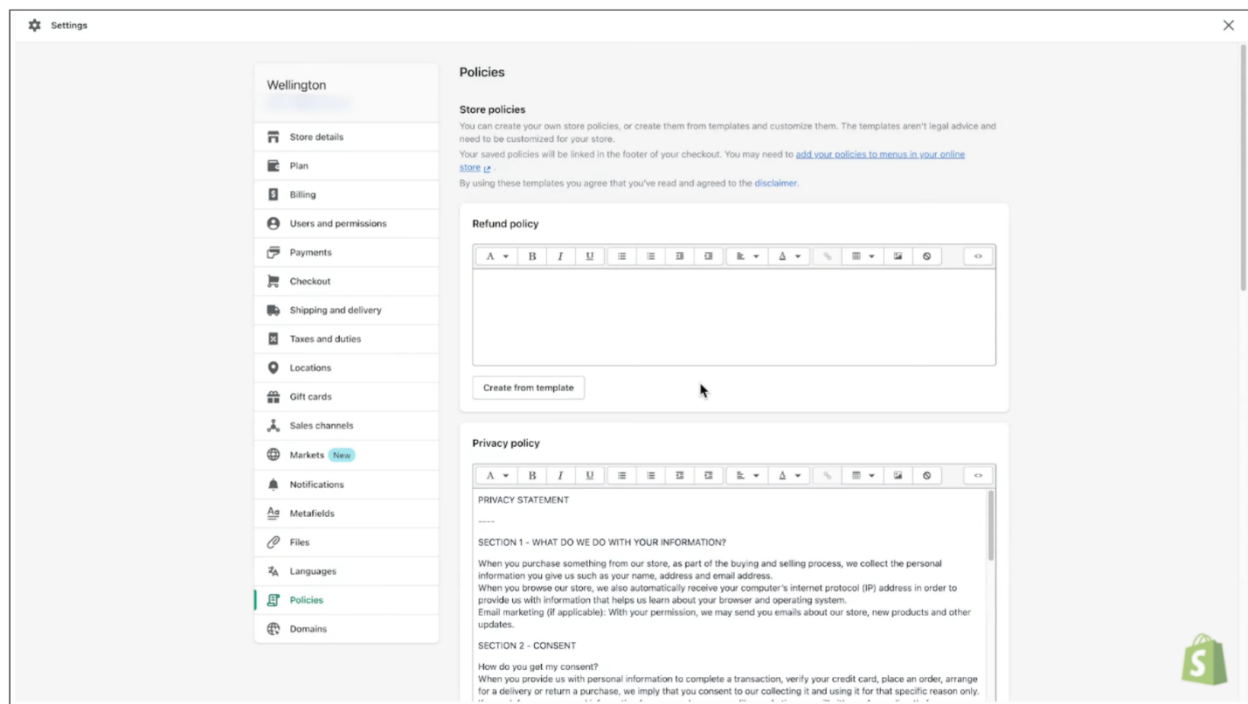

You can also add a “contact us” feature on your store’s contact page to let customers get in touch with you. All Shopify themes have a built-in contact form that you can add to the pages you create so that customers can contact you directly with a message. This helps you build trust with your customers, as they feel that your brand is more accessible.

Product details

You learned earlier that you can update your product details on your Google Merchant Center account. When you link your Shopify and Google accounts, the products are added to your site. The details that you provide for a product affect the way that the product is displayed to customers, make it easier for you to organize your products, and help customers find the product. Be sure to check that your product details are accurate and to your liking. If necessary, edit your product details using the admin menu.

Return policy

A **return policy** is a document that describes, in detail, your business's process and requirements for accepting returns. Having these policies stated helps your customers make informed buying decisions. You can edit your return policy under the policies tab of your admin dashboard.

Shopify has return policy templates for you to work from. If you choose to use a template, be sure to edit specific details to match your business model.

Your return policy should answer two basic questions:

- **How can customers make a return?** Most businesses offer customers the option to exchange their purchases for another product of equal value or return their purchase for a full cash refund.
- **How long do customers have before they can make a return?** Typically, most websites offer a 30 to 60-day return window.

Once complete, these policies will be easily accessible at the bottom of your store's website, in accordance with Shopify guidelines.

Adding Sales Channels in Shopify

Why Add Sales Channels?

While we've covered the process of adding products to your website, it's crucial to recognize the benefits of selling products through various channels. This includes social media, mobile apps, and popular marketplaces. Shopify facilitates this expansion by allowing you to seamlessly integrate multiple sales channels.

List products on multiple shopping channels

As you learned earlier, if you want to attract more customers to your e-commerce store, it's important to list your products on multiple channels—also called **multichannel e-commerce**. This reading will help you understand the benefits of listing products on multiple channels and how this process works in Shopify.

Benefits of listing on multiple channels

Listing your products on multiple channels can help you reach more customers with your products and services. Customers often have a preference for shopping on specific channels, such as Amazon or Google Shopping. If your products aren't listed on their preferred channel, they won't be as likely to find or purchase your products.

If customers research and compare products on multiple channels, they might come across your brand more than once. That's a good way to increase brand awareness and build trust with potential customers. Plus, your products might show up higher in the search results for some sales channels versus others. That's another reason why it's important to list your products on multiple channels.

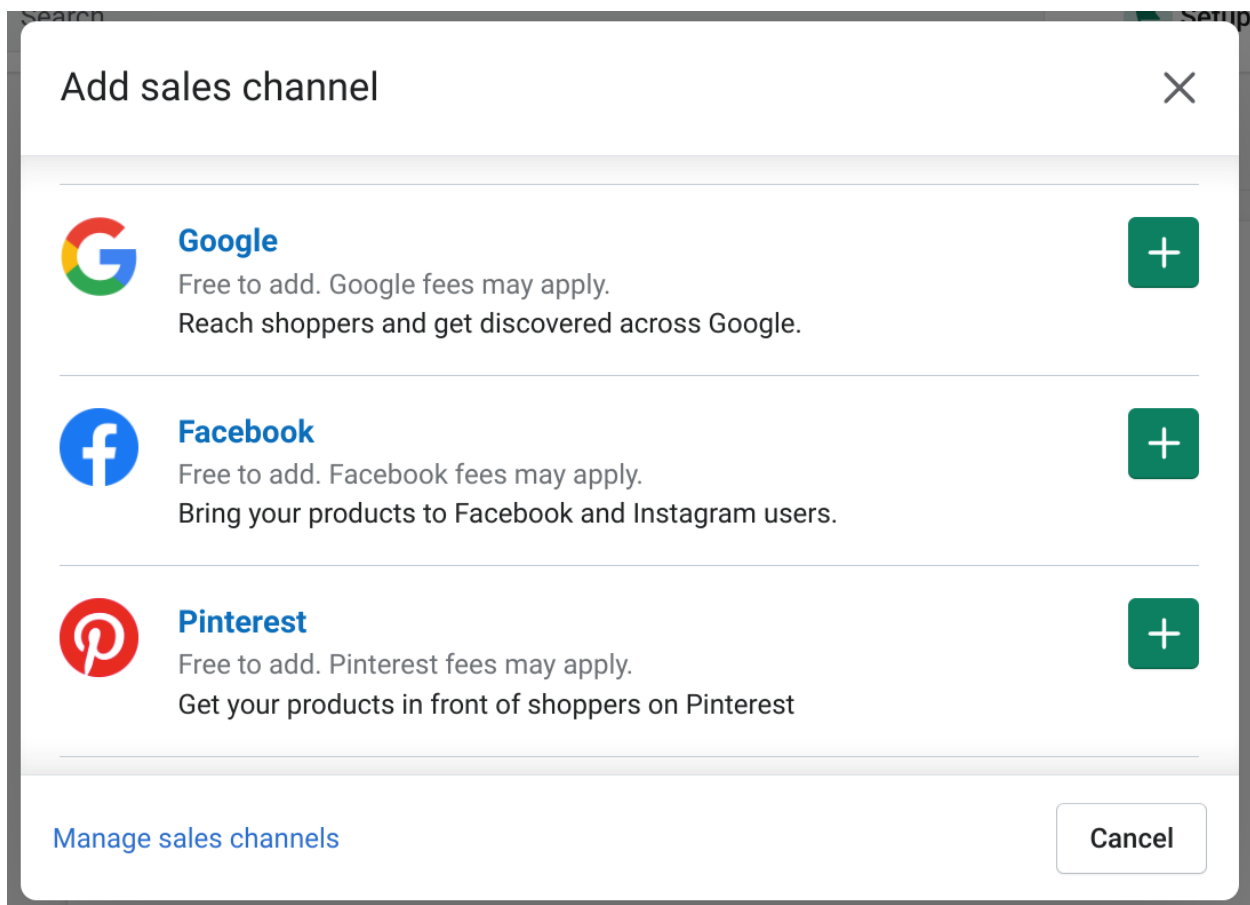

How to list products on multiple channels in Shopify

Shopify's e-commerce platform allows you to list products not only in your online store but also on other sales channels. This means you can upload and manage your products all in one place but list them on multiple channels. You can sell your products on your website and list them on Google, Facebook, Instagram, Amazon, eBay, Walmart Marketplace, and other channels. You can

also create a mobile app, or add a channel to sell products in person. For example, Shopify's point of sale (POS) app enables you to sell products in person. The app accepts payments and processes transactions.

To add a new sales channel in Shopify, follow these steps:

1. Log in to your account at Shopify.com.
2. Click the plus sign next to the channel you want to add. To access more sales channels, visit the Shopify App Store.
3. Connect to an existing account for the sales channel or create a new account.
4. Complete any additional steps needed to complete the setup process.

Troubleshooting

Occasionally, you may run into an issue where your product gets flagged or marked with an item disapproval. Disapprovals can occur when policies or product data requirements aren't satisfied. For instance, a refund policy could be missing, a price mismatch could exist between landing and product pages, or promotional text could be present in product images. Some healthcare products may be disapproved due to online sales restrictions in certain locales.

If a disapproval happens, you'll need to follow the process to get the item reapproved. This process may be different for each sales channel. To resolve the issue, you may need to visit the sales channel's help center to access troubleshooting information or connect with their customer support team.

Step 5: Edit the store name

Follow these steps to edit the name of your e-commerce store:

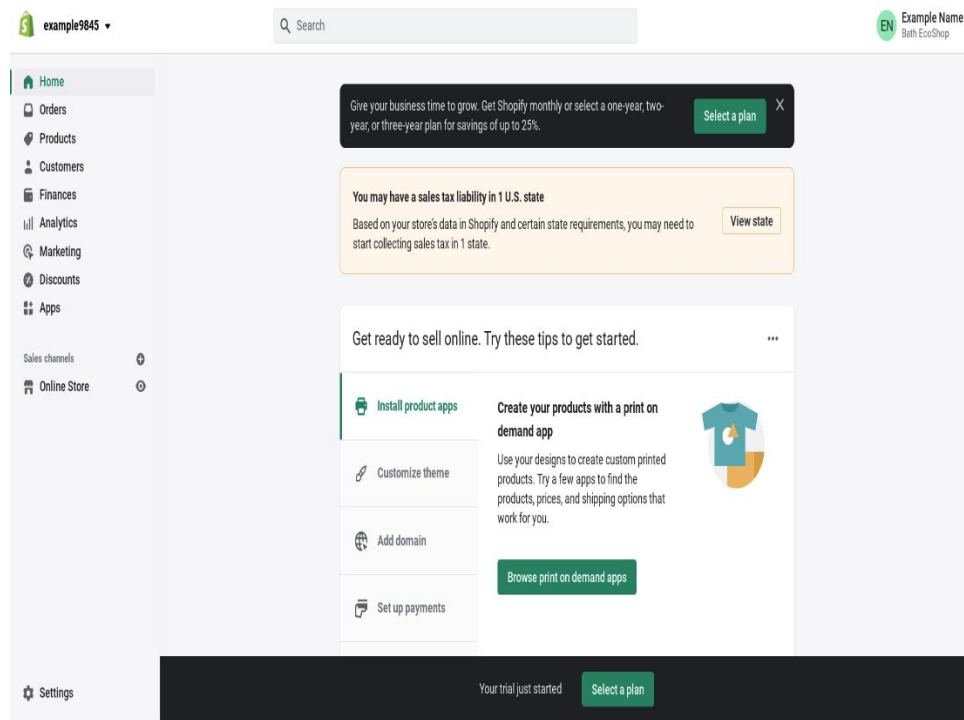

1. Click *Settings* at the bottom of the navigation menu.
2. In the *Store details* tab, click *Edit* in the *Profile* box.
3. Enter “Bath EcoShop” in the *Store name* field.
4. Click *Save* in the toolbar.

5. Click the X to return to the main dashboard in Shopify.

Step 6: Verify your email address

A verification email will be sent to the email address you used to sign up for your Shopify account. To keep your account secure, click the link in the verification email.

Output:

Activity 2:

Begin adding product listings to a Shopify store

Remember: Shopify currently offers a **3-day free trial**. If you'd like to follow along and create your own e-commerce store, we recommend completing this module's learning material first. Then, when you're ready, make sure you have the time available to work through each of the three main activities described in the review readings during the 3-day trial.

Learning how to add a product listing to your Shopify store will help you become more comfortable working with an e-commerce platform. If you would like to follow along and create your own Shopify store, you will also practice adding products to an e-commerce store. As an e-commerce specialist, you may be asked to add or update products within an e-commerce platform.

Scenario

For the past year, you've been working for an e-commerce company that manages multiple online stores. The company specializes in home goods. Recently, the company has identified an opportunity in the market for eco-friendly bath products. They are planning to launch a new e-commerce store, called Bath EcoShop, that sells sustainable bath products to customers worldwide. The products are made of organic or sustainable materials and manufactured in fair trade factories.

The company needs your help creating this new e-commerce store. As an e-commerce specialist, you've been asked to add product listings on Shopify's e-commerce platform. The two product listings you've been asked to create are for bath towels and bath rugs.

Your manager has provided two product specification sheets with the information you'll need, including pricing, specifications, and other details. Your task will be to create two product listings in Shopify using the details provided in the product specification sheets.

Solution:

***Note:** The following steps may be different from the current process on the Shopify platform. Even if the software has changed, the high-level concepts to set up a store still apply.*

Step 1: Access supporting materials

If you would like to follow along with adding products to a Shopify store, the following supporting materials will help you. Keep them open as you proceed to the next steps.

To use the supporting materials for this course item, click the links below and select "Use Template."

Link to supporting materials:

If you don't have a Google account, you can download the supporting materials directly from the attachments below.

Click on the docx file: Product specification sheet_ Bamboo cotton blend bath towel

Product Bamboo
Cotton Blend

Product 2 Organic
Cotton Bath.

Click on the docx file: Product specification sheet_ Organic cotton bath rug :

Step 2: Log in to your Shopify Store

If you created a Shopify store in the previous review reading ([Set up a mock e-commerce store using Shopify](#)), log into that e-commerce store now.

Note: You will have a 3-day Shopify trial to follow along with the three review readings.

Step 3: Add a new product to your store

Select *Products* in the navigation menu. Then click *Add product*.

Step 4: Add the product title

Enter the product title in the **Title** field in Shopify. You'll find the product title in the product specification sheet.

Step 5: Write a product description

Write a description for the product and enter it in the **Description** field in Shopify. Make sure the product description describes how the product will benefit the customer. You can reference the features and technical specifications listed in the product specification sheet to learn more about the product.

The product description should include the following:

- A short paragraph of at least one or two sentences that describes the product and its benefits.
- A list of the product's features, which are listed in the product specification sheet.
- A list of the product's technical specifications, which are listed in the product specification sheet

To get a refresher on how to write product descriptions, you can revisit this reading: [Learn more about creating a product detail page](#).

Here is an example of a title and product description for a shower curtain:

Title

Organic Cotton Shower Curtain

Description

Paragraph | B I U A | | | | | | | | | | </>

Brighten up your bathroom with this organic shower curtain, available in three earth-tone colors. The split-ring hookless design makes it easy to hang the shower curtain in seconds.

Features

- Split-ring hookless design
- Easy to hang
- Soft earth-tone colors
- Machine washable

Specifications

- 100% organic cotton
- Size: 72 x 74 inches
- Made in India

Note: Some information may be included in both the product description and the features or specifications section. For example, you might write about the organic cotton material in the product description and mention it again in the specifications section. This is fine, since customers often scan the product page to find the information they want, rather than reading the entire page.

Step 6: Add the product image

Below are the product images you'll need to follow along with this review. One image is bath towels, and the other image is a bath rug. You'll use the bath towels image for your first product listing. Then, when you repeat these steps to add your second product listing, you'll use the bath rug image.

To copy the image URL, right-click the image below and select *Copy image address* (or *Copy image location* or *Copy image link*, depending on your browser).

Note: In your role as an e-commerce specialist, you will likely be asked to add multiple images and videos. For this activity, however, one image for each product will be enough.

Then scroll to the **Media** section in Shopify to add the product image.

To add an image from the URL, follow these instructions:

1. Click *Add from URL*.
2. Paste the image URL into the URL field.
3. Click *Add file*.

Step 7: Save the product

Click *Save* in the toolbar at the top of the window.

Step 8: Preview the product and save it as a webpage or HTML file

Click *Preview*. Or, click *More actions* and then select *Preview*. A new tab will open with a preview of your product, as it would appear in your e-commerce store.

Review your product listing. If you would like to make any changes, return to the previous tab and update your product listing. Then click *Preview* again.

When you are satisfied with your product listing, save the preview page as a webpage or HTML file. It's a good idea to save your work in case you would like to reference it after your Shopify trial has ended. To save as, press Control+S for Windows or Chromebook (or Command+S for Mac). Choose the location where you want to save the file. Then click *Save*.

Step 9: Repeat Steps 3–8

If you'd like to add the second product listing, repeat **Steps 3–8**.

Output:

Brighten up your bathroom with this organic shower curtain, available in three earth-tone colors. The split-ring hookless design makes it easy to hang the shower curtain in seconds.

Features

- Split-ring hookless design
- Easy to hang
- Soft earth-tone colors
- Machine washable

Specifications

- 100% organic cotton
- Size: 72 x 74 inches
- Made in India

Activity 3:

Finish adding product listings to a Shopify store

Learning how to add product listings to your Shopify store will help you become more comfortable working with an e-commerce platform. If you're following along, you will also practice adding products to an e-commerce store. As an e-commerce specialist, you may be asked to add or update products within an e-commerce platform.

Scenario

For this review reading, we'll follow a scenario:

For the past year, you've been working for an e-commerce company with multiple online stores. The company specializes in home goods. Recently, the company has identified an opportunity in the market for eco-friendly bath products. They are planning to launch a new e-commerce store that sells sustainable bath products to customers worldwide.

The company needs your help creating this new e-commerce store. As an e-commerce specialist, you've been asked to add product listings on Shopify's e-commerce platform. The two product listings you've been asked to create are for bath towels and a bath rug.

Your manager has provided the information you'll need about the products, including pricing, specifications, and other details.

Solution:

Step 1: Access supporting materials

If you would like to follow along and finish adding products to a Shopify store, the following supporting materials will help you. Keep them open as you proceed to the next steps.

To use the supporting materials for this course item, click the links below and select "Use Template."

Link to supporting materials:

- [Bath towel product specification sheet](#)
- [Bath rug product specification sheet](#)

OR

If you don't have a Google account, you can download the supporting materials directly from the attachments below.

Product Bamboo
Cotton Blend

[Product specification sheet Bamboo cotton blend bath towel](#)

[DOCX File](#)

Product 2 Organic
Cotton Bath.

[Product specification sheet Organic cotton bath rug](#)

[DOCX File](#)

Step 2: Log in to your Shopify store

If you're following along with the review readings, [log in to the Shopify e-commerce store](#). If you haven't yet created a Shopify store, you can begin here: [Set up a mock e-commerce store using Shopify](#).

***Note:** The following steps may be different from the current process on the Shopify platform. Even if the software has changed, the high-level concepts to set up a store still apply.*

Step 3: Navigate to the product listing you want to edit

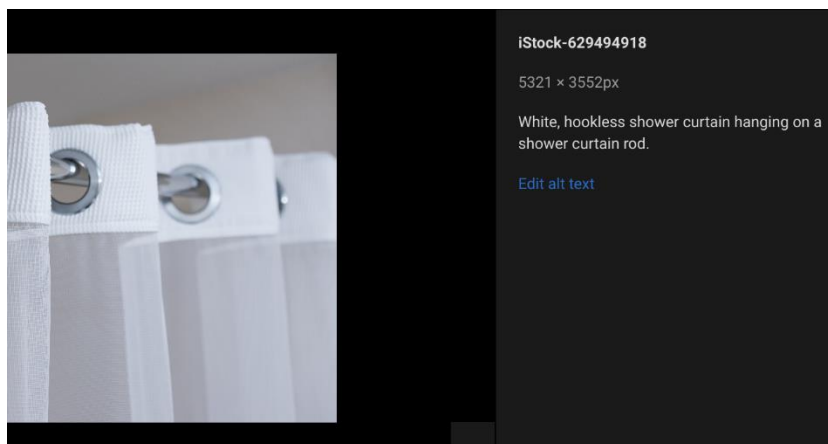

Select *Products* in the navigation menu. Then click the title of the product you want to update. You will be finishing the two product listings that you began adding to your Shopify store in the previous review reading: [Begin adding product listings to your Shopify store](#).

Step 4: Add alt text to the product image

Alt text is a brief written description of an image. It helps screen readers and search engines understand what's in the image.

Scroll to the **Media** section to add alt text to the image you uploaded in the previous activity.

1. Click the image in the **Media** section. A new window will appear.
2. Click *Add alt text*.
3. Enter alt text that describes the image. The alt text should be short and only include essential details about the image. For example, “White, hookless shower curtain hanging on a shower curtain rod” (as referenced in the screenshot).
4. Click *Save alt text*.
5. Click the *X* to close the window.

Step 5: Add options

Scroll to the **Options** pane. Skip the **Pricing**, **Inventory**, and **Shipping** panes. This information will be filled in later for each variant.

1. Select the checkbox in the **Options** pane (as referenced in the screenshot).
2. Click in the **Option name** box.
3. In the **Option name** list, select the option name (*Color* or *Size*) that matches the information in the product specification sheet.

4. In the **Option values** box, enter the color or size variants, which are listed in the product specification sheet. As an example, for the bath towels, you would type “White,” hit enter or click in the box that appears below (**Add another value**), and type “Beige.”
5. Click *Done*.

Options

☒ This product has options, like size or color

Option name

Option values

[+ Add another option](#)

Step 6: Add variant details

After you add options in Step 5, a new pane called **Variants** will appear below the **Options** pane. Scroll to the **Variants** pane, which lists the option values (also called variants) that you entered earlier. For bath towels, the variants listed are *White* and *Beige*.

1. Click *Edit* for the first variant (as referenced in the screenshot).
2. In the **Variant** dialog, enter the price, cost per item, SKU, barcode, quantity available, and HS (Harmonized System) code for the variant. Use the product specification sheet to find this information.
3. Click *Done*.
4. Repeat this process for the second variant.

Variants

Select [All](#) [None](#) [Color](#) ▼

☐	Variant	Price	Quantity	
☐	 White	\$ 0.00	0	Edit
☐	 Beige	\$ 0.00	0	Edit

Step 7: Edit the page title and meta description

Scroll to the **Search engine listing preview** section.

1. Click *Edit Website SEO* to edit the page title and meta description. The page title and meta description will automatically populate based on the title and description you entered earlier.
2. Edit the page title by adding a hyphen followed by the store name at the end of the page title.
3. Edit the meta description down to two or three sentences or phrases. Include information that might encourage customers to explore the product listing in more detail.

The page title and meta description appear in search engine results. The URL handle will be at the end of the URL for the product detail page. It will also appear in search engine results.

Save

Step 10: Preview the product and save it as a webpage or HTML file

Click *Preview*. Or, if *Preview* is hidden, click *More actions* and then select *Preview*. A new tab will open with a preview of your product as it would appear in your e-commerce store.

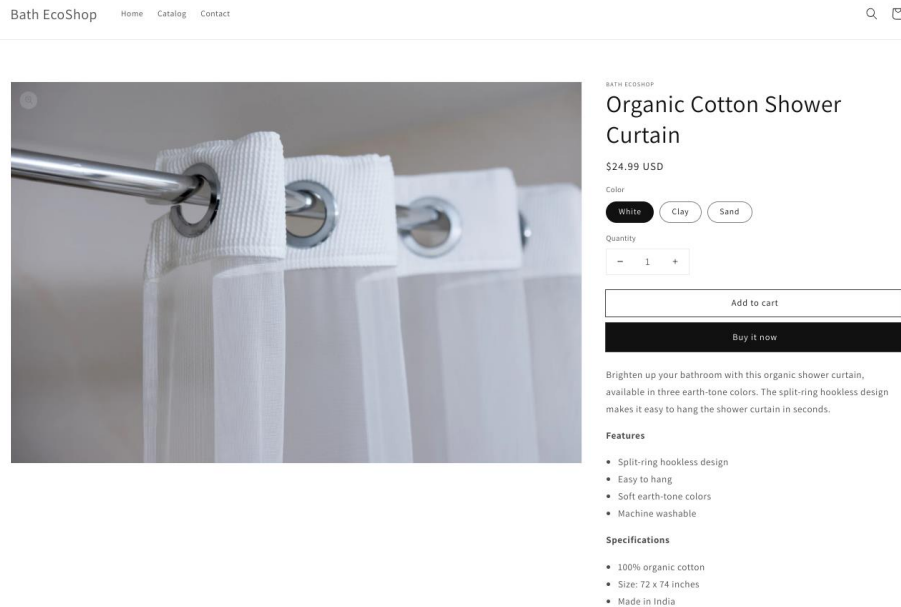

Review your product listing. If you would like to make any changes, return to the previous tab and update your product listing. Then click *Preview* again.

When you are satisfied with your product listing, save the preview page as a webpage or HTML file. It's a good idea to save your work in case you would like to reference it after your Shopify trial has ended. To save as, press Control+S for Windows or Chromebook (or Command+S for Mac). Choose the location where you want to save the file. Then click *Save*.

Step 11: Repeat Steps 3–10

If you'd like to add the second product listing, repeat **Steps 3–10**.

Output:

3) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Graded Lab Activity 1: Design Your Dream Online Store

Imagine you're starting your own online business selling products of your choice. Using the Shopify platform, create a mock-up of your dream online store. Consider the following aspects in your design:

1. Choose a niche or theme for your store.
2. Customize the store layout, colors, and branding to reflect your chosen theme.
3. Add at least five products to your store, including detailed descriptions and high-quality images.

Lab 05

Create an E-Store Using WordPress

Objective:

To familiarize and empower students to design and launch their own e-commerce store using WordPress (a world-renowned CMS), equipping them with practical experience in web design, product listing, and online sales management.

Activity Outcomes:

After this lab, the students should be able:

- To successfully create a basic e-commerce website using WordPress.
- To effectively manage and list products on their e-commerce store.
- To select and install appropriate themes and plugins to enhance the functionality and appearance of their e-commerce store.

Instructor Note:

As pre-lab activity, read <https://learn.wordpress.org/tutorials/> and courses related to wordpress are available at <https://learn.wordpress.org/courses/>.

2) Useful Concepts:

WordPress

WordPress is a popular open-source content management system (CMS) that allows users to create and manage websites easily. It started as a blogging platform but has evolved into a versatile tool for various types of websites.

WordPress Dominance

WordPress stands out as the predominant **blogging platform**, commanding an impressive **43% of the internet**.

It's dominance is due to its diverse applications

Diverse Applications

Website Construction

WordPress transcends its origins as a blogging tool, evolving into a robust platform for **constructing websites**. Its flexibility enables users to build diverse web entities, from simple blogs to sophisticated business websites.

Complex Portals and Applications

With its expansive features, WordPress is not limited to static sites. It excels in handling **complex portals and applications**, showcasing its adaptability to diverse digital needs.

Key Features

User-Friendly Interface

WordPress provides a user-friendly interface, making it accessible for both beginners and experienced users. The dashboard is intuitive and allows easy content management.

Themes and Templates

One of the significant strengths of WordPress is its vast collection of themes and templates. These pre-designed layouts enable users to change the look and feel of their websites without extensive coding knowledge.

Content Management

Managing content on WordPress is straightforward. Users can create, edit, and organize content using a WYSIWYG (What You See Is What You Get) editor. This makes it easy for non-technical users to publish content without dealing with code.

Flexibility and Customization

WordPress.org, the core software, is a haven for coders due to its **free and open-source** nature. This empowers developers to delve into the code, customize functionalities, and tailor websites according to specific requirements.

Community-driven Innovation

The strength of WordPress lies not only in its code but also in its **thriving community**. A vast network of developers and users constantly contributes to the ecosystem. This active involvement results in the creation of new **plugins, widgets, themes, and other enhancements**, enriching the overall user experience.

How to Install WordPress on Localhost in 6 Steps

1. Download XAMPP
2. Install and Run XAMPP on Your Computer
3. Download WordPress
4. Create a Local Database
5. Install WordPress on Localhost
6. Check the Local Site You Built.

1. Download XAMPP

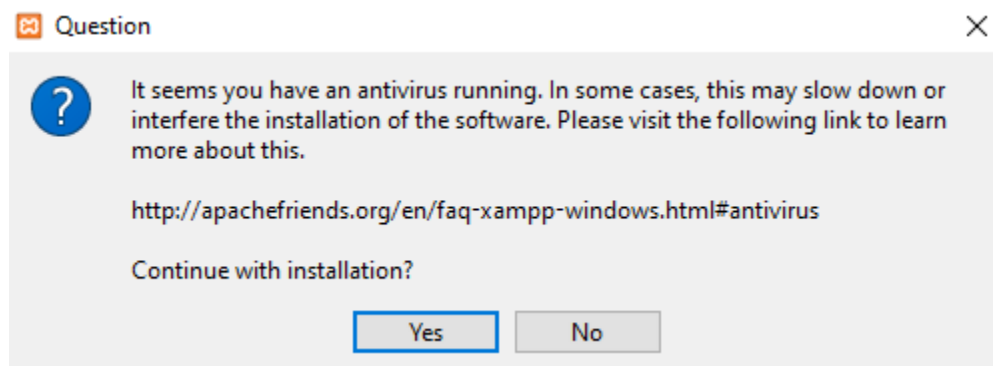

Go to the official Apache Friends website and download the correct XAMPP software version based on your operating system.

Output:

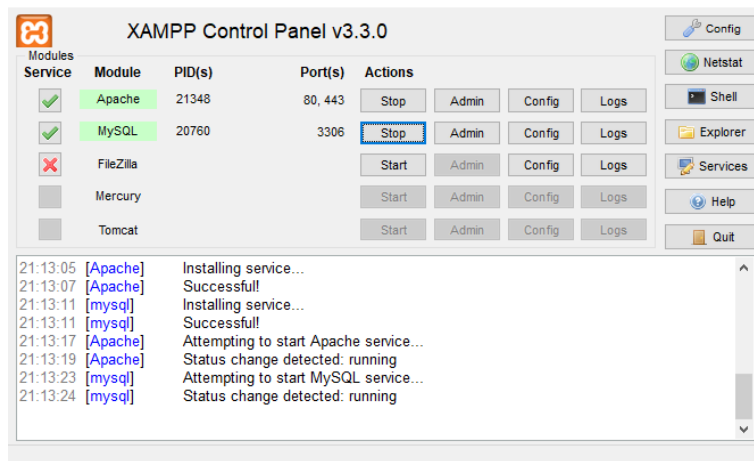

2. Install and Run XAMPP on Your Computer

Run the XAMPP installer and follow the installation instructions using the default settings. If you see a pop-up indicating that your antivirus software might affect the installation process, click Yes to continue.

After installing XAMPP, run the application and configure the environment. In the XAMPP control panel, start Apache and MySQL modules to perform the WordPress localhost installation.

3. Download WordPress

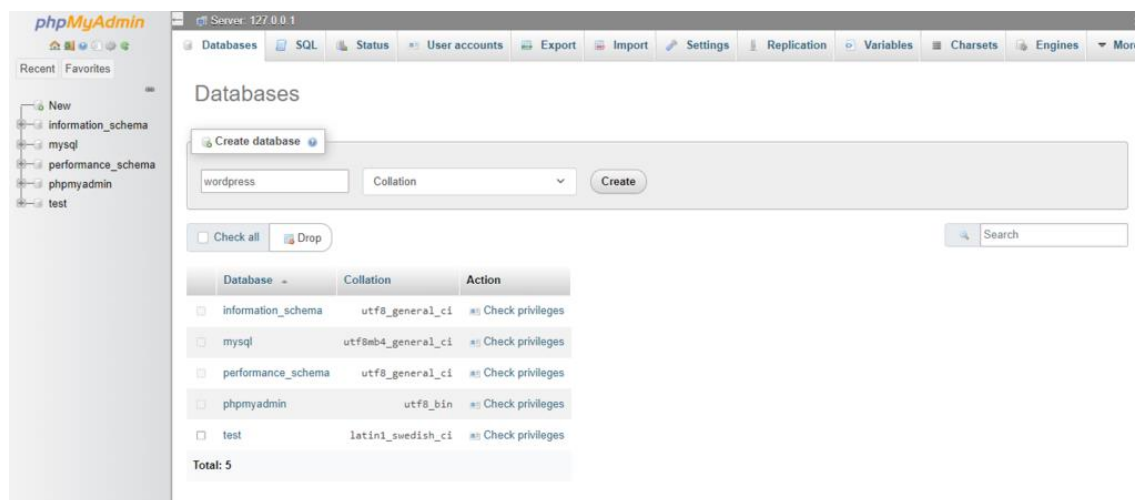

Once the server is up and running, the next step is installing WordPress. Download the [latest WordPress version](#), then extract the ZIP file.

Navigate to your XAMPP folder in the D drive (D:\xampp) and locate the htdocs folder. Upload the extracted WordPress files there. We recommend renaming the new folder with your website's name to make web development on the XAMPP server easier.

4. Create a Local Database

Go back to your XAMPP control panel and select the Admin button of the MySQL module to launch phpMyAdmin – an administration tool for managing MySQL and MariaDB databases. It will help you create a local MySQL database for the new website.

Open the Databases tab and enter the database name into the Create database section. Set the dropdown menu's value to Collation and hit the Create button. Your new MySQL database should appear on the left sidebar of the web page.

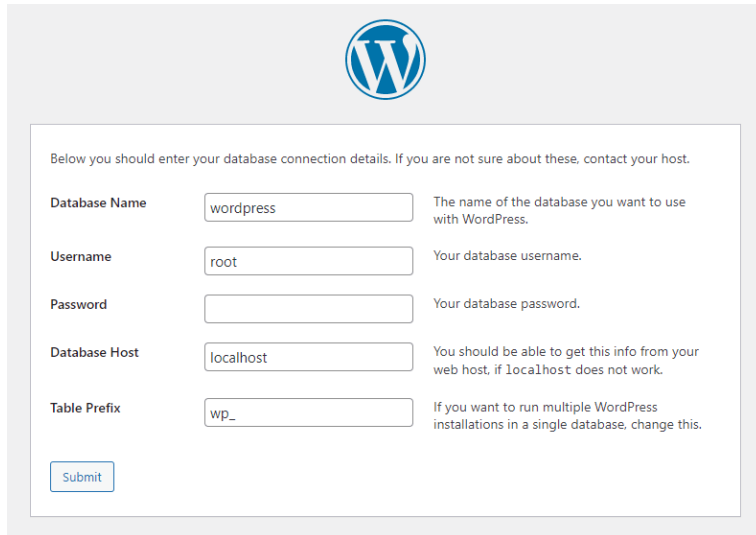

5. Install WordPress on Localhost

Finish installing WordPress locally by visiting **http://localhost/foldername** via your browser. Don't forget to change the "foldername" placeholder with the folder name you chose in the third step.

WordPress requires a list of information to build the localhost site. Fill in the database information as follows:

1. Database name – the name of the database you created in phpMyAdmin.
2. Username – enter "root" as the default username.
3. Password – leave the MySQL database password field blank.
4. Database host – keep the default "localhost."
5. Table prefix – keep the default "wp_."

The image shows the WordPress installation screen for database configuration. At the top is the WordPress logo. Below it is a heading: "Below you should enter your database connection details. If you are not sure about these, contact your host." There are five input fields with labels and descriptions to their right: "Database Name" with the value "wordpress" (description: "The name of the database you want to use with WordPress."), "Username" with the value "root" (description: "Your database username."), "Password" (empty field, description: "Your database password."), "Database Host" with the value "localhost" (description: "You should be able to get this info from your web host, if localhost does not work."), and "Table Prefix" with the value "wp_" (description: "If you want to run multiple WordPress installations in a single database, change this."). At the bottom left is a "Submit" button.

Once done, hit Submit -> Run the installation. Fill in the additional information needed, like the site name and login credentials, and click on the Install WordPress button.

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

Information needed

Please provide the following information. Do not worry, you can always change these settings later.

Site Title	
Username	 Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol.
Password	O0j)!D&&wg\$Wx)tXYa Strong  Hide Important: You will need this password to log in. Please store it in a secure location.
Your Email	 Double-check your email address before continuing.
Search engine visibility	☐ Discourage search engines from indexing this site It is up to search engines to honor this request.
Install WordPress	

6. Check the Local Site You Built

That's it – your local test site is now ready. Go to <http://localhost/foldername/wp-admin> and use the login credentials you created in the previous step to access the WordPress dashboard.

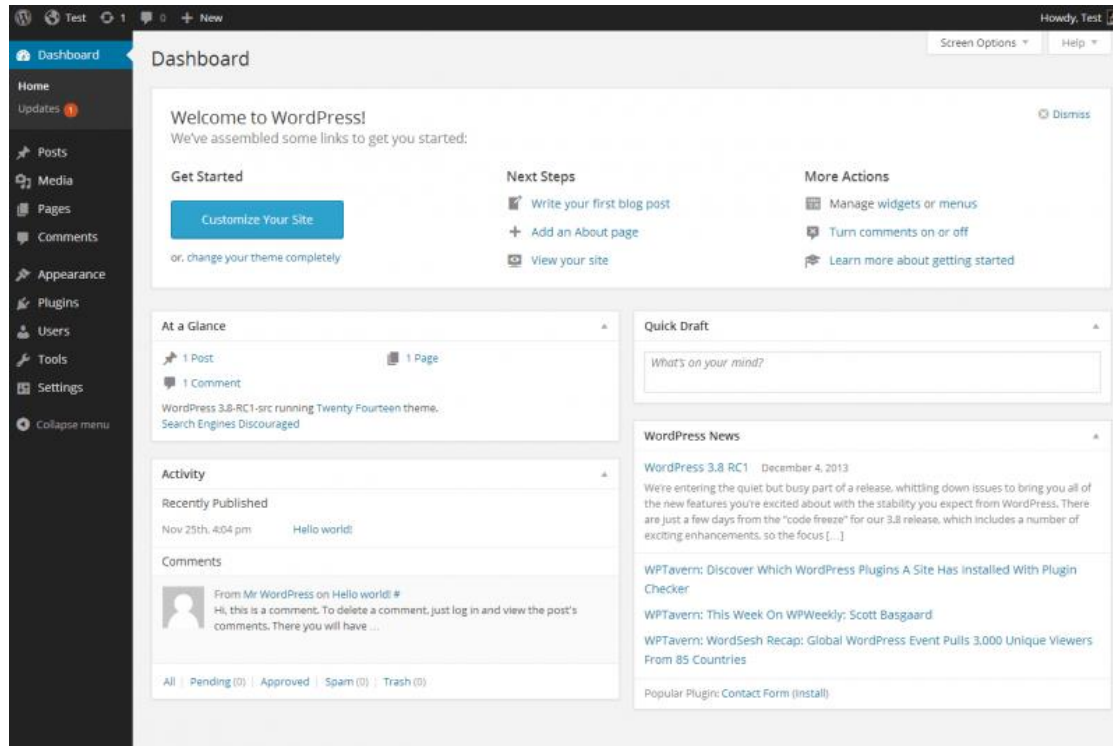

Conclusion

Running a WordPress installation requires a hosting plan and a domain name. However, if you only need it for testing or learning purposes, installing the CMS on localhost and storing all the data locally should meet your needs just fine.

Here's a recap on how to install WordPress on a localhost environment:

1. Download XAMPP.
2. Install XAMPP on your computer.
3. Download the latest version of WordPress.
4. Create a local database in phpMyAdmin.
5. Install WordPress on localhost.
6. Check the local test site via your browser.

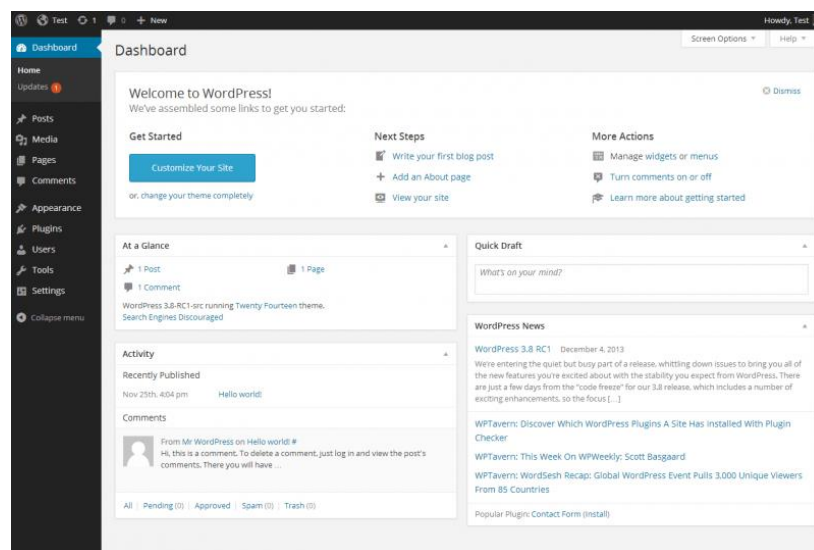

Output:

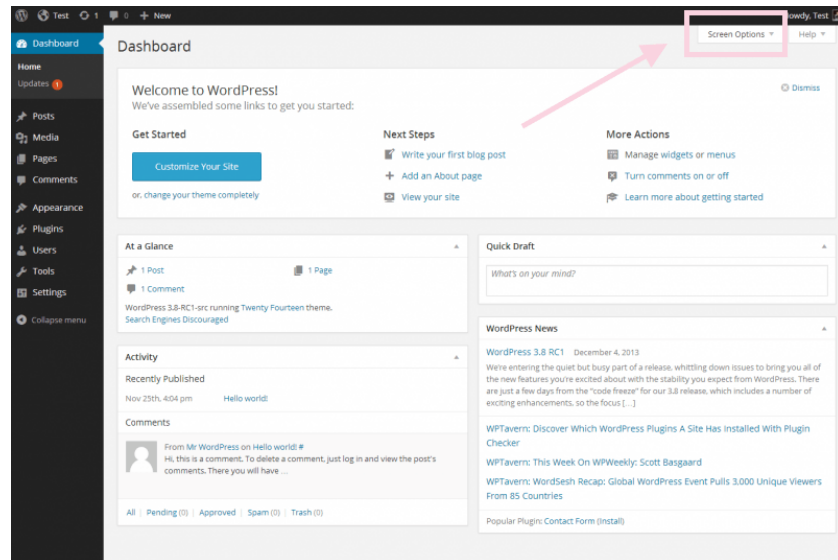

Activity 2:

Understanding The WordPress Admin Dashboard:

Logging in <http://localhost/foldername>

When you first log into WordPress, your dashboard will look similar to the screenshot above. This is your WordPress dashboard. You can edit what is on your dashboard by clicking on screen options at the top.

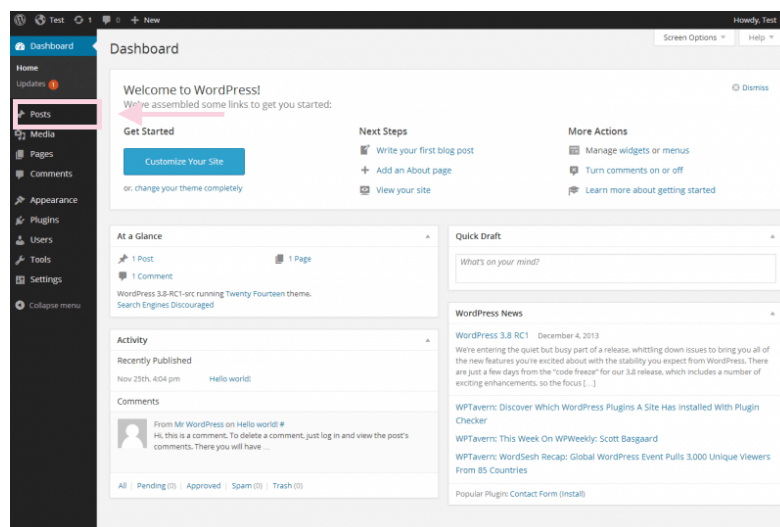

Then, a dropdown will appear where you can select what you want to see on your dashboard.

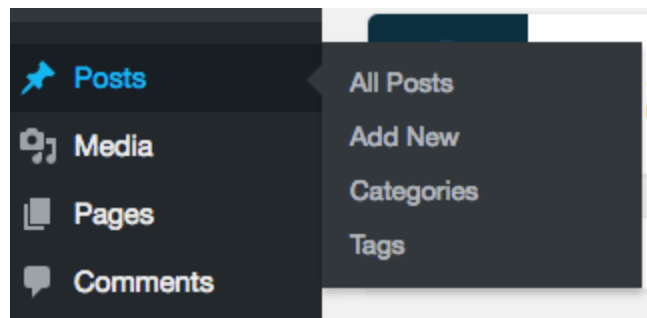

Some of the options above won't be included on yours because you may not have the plugins installed, but it will look similar to this.

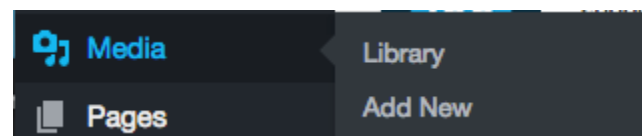

Posts:

Posts are where your blog posts will be located. You can select to view all posts, add a new post, view categories or tags.

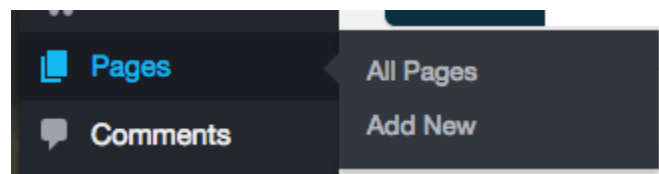

Media

Next up is media. This is where any of your photos, videos, PDFs, and more are located. If you are just starting out, your library will be empty.

Pages:

Pages are next after media. Pages are the main anchors of your website. Here are a few of our pages:

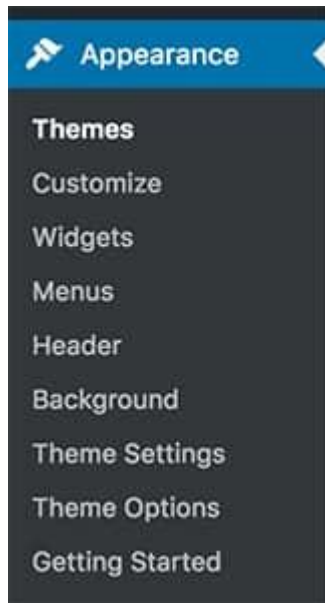

Comments:

Then you will see comments. These include all of the comments that have been left on your blog. If you are brand new, you won't have any comments yet.

Appearance:

The appearance option is where people can start to get confused. This is where any of your themes and anything related to the appearance of your website is hosted.

Themes will include the standard WordPress theme options as well as any other themes you have uploaded.

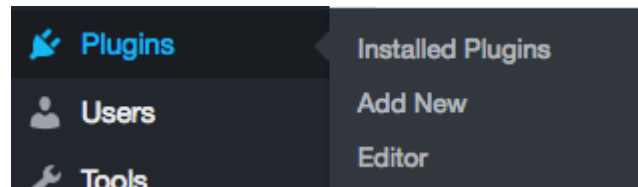

Customize is where you can edit the details of the current theme that is activated on your WordPress account.

Widget, menus, header, and background can be accessed both through the appearance option or once you click Customize.

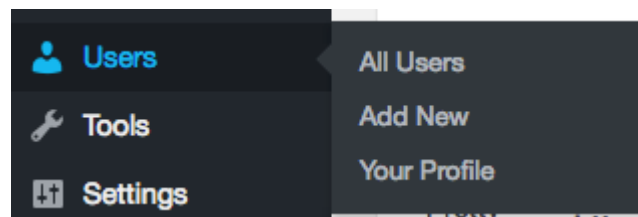

Theme settings is where the XML format is located for your theme. You most likely won't need to use that for anything.

Theme editor is where all of the style sheets and backend code is for your site. This is where you wouldn't want to edit anything, unless if you have experience with coding because you could run into trouble.

Plugins

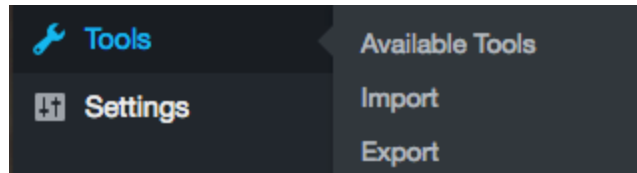

Plugins are ways to extend and add to the functionality that already exists in WordPress. You can learn more about plugins

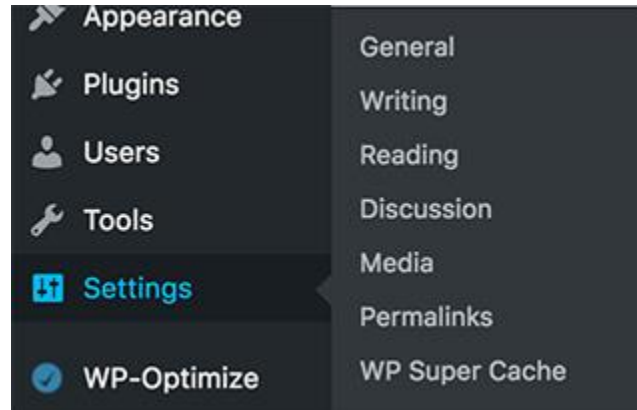

If you need to have multiple users with various login permissions, users is where you can add new or edit your own profile.

Tools

Tools contain options to perform some non-routine management tasks. As a beginner, you most likely won't need to use this option.

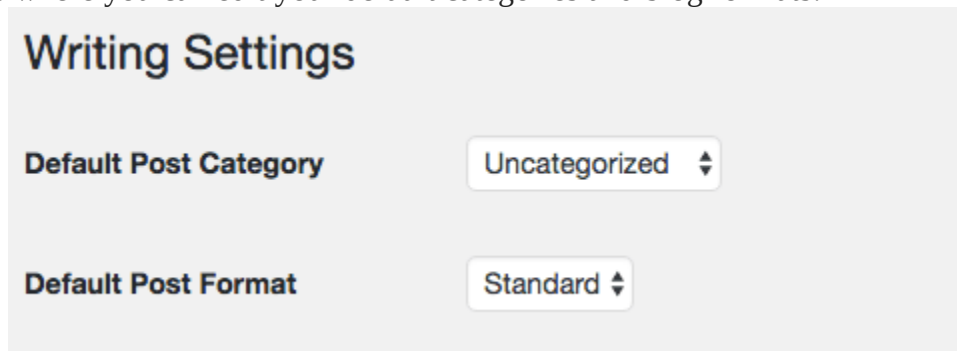

Settings

Your settings options may look different from the above, depending on the plugins that you have downloaded. You should at the very least have general, writing, reading, discussion, media, and permalinks.

General settings is where you can edit your site title, tagline, URL, contact email address, timezone and more.

Writing is where you can edit your default categories and blog formats.

Discussion settings is where you can edit the settings for comments.

Discussion Settings

Default article settings

- ☒ Attempt to notify any blogs linked to from the article
- ☒ Allow link notifications from other blogs (pingbacks and trackbacks) on new articles
- ☒ Allow people to post comments on new articles

(These settings may be overridden for individual articles.)

Other comment settings

- ☒ Comment author must fill out name and email
- ☐ Users must be registered and logged in to comment
- ☐ Automatically close comments on articles older than days
- ☒ Enable threaded (nested) comments levels deep
- ☐ Break comments into pages with top level comments per page and the page displayed by default

Comments should be displayed with the comments at the top of each page

Email me whenever

- ☒ Anyone posts a comment
- ☒ A comment is held for moderation

Before a comment appears

- ☐ Comment must be manually approved
- ☒ Comment author must have a previously approved comment

Reading is where you can edit what the front page displays (either your latest posts or a static page), how many blog posts are shown, and how much of each blog article you want to be shown.

Reading Settings

Front page displays

☐ Your latest posts

☒ A static page (select below)

Front page:

Posts page:

Blog pages show at most posts

Syndication feeds show the most recent items

For each article in a feed, show

☒ Full text

☐ Summary

Search Engine Visibility

☐ Discourage search engines from indexing this site

It is up to search engines to honor this request.

[Save Changes](#)

Media is where you can determine the maximum dimensions in pixels to use when adding an image to the Media Library.

Finally, **permalinks** is where you can customize the URL structure for your blog posts. Settings is a place where many plugins will also be listed as well.

Activity 3:

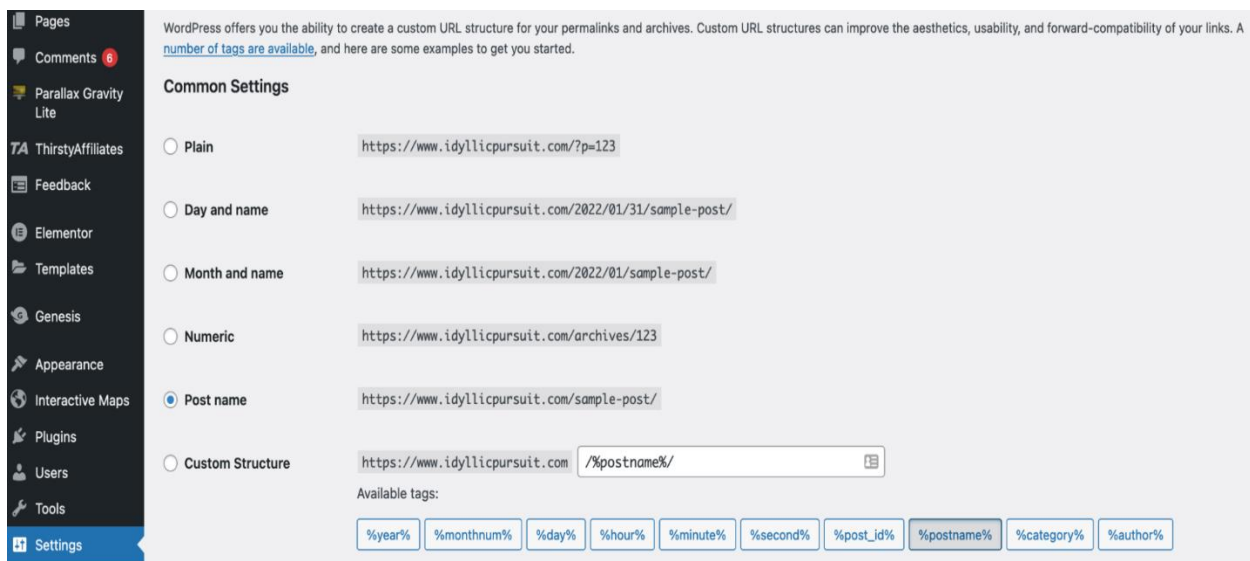

Setting up Configurations

Solution:

Step 1: Configure WordPress Settings

Before you begin customizing web pages and building out site content, you need to configure your settings, such as indicating your home page and blog posts page, as well as updating your site's name, tagline, and the site icon.

- **Logo:** Go to “appearance” > “customize” > “site identity” > “change logo” > upload your logo
- **Site title:** Go to “appearance” > “customize” > “site identity” > input site title (a.k.a. your business name)
- **Site tagline:** Go to “appearance” > “customize” > “site identity” > input site tagline (or simply delete the default WordPress tagline)
- **Site icon:** Go to “appearance” > “customize” > “site identity” > under “site icon” click “change image” > upload the image you want to display as your site icon (a.k.a. favicon).
- **Homepage:** Go to “appearance” > “customize” > “homepage settings” and select the webpage you want to set as your homepage.
- **Blog:** Go to “appearance” > “customize” > “homepage settings” and under “posts page” select the page you want to set as your blog.
- **Permalink settings:** Go to “settings” > “permalinks” then choose your preferred structure (typically “post name”) and save changes.

Activity 4:

Start creating pages and menus:

Step 1: Create Pages

Here's how to create and/or customize pages in WordPress:

- From the WordPress dashboard, go to **“pages”** from the left-hand vertical menu.
- To create a new page, click **“add new”**
- To customize an existing page, go to **“all pages”** and then find the page from the list of pages, and click **“edit.”**
- If you installed a page builder plugin, select the option at the top to edit with the page builder (e.g., **“edit with Elementor”**).
- Write your site copy and customize your pages.
- When you're finished, click **publish**.
- Repeat these steps for any other pages you want to create.

The screenshot shows the WordPress dashboard with the 'Pages' menu item selected in the left-hand sidebar. The main content area displays a list of pages under the 'Pages' heading. At the top right of the dashboard, there is a greeting 'Well, hello, Dolly', a 'Screen Options' dropdown, and a 'Help' link. Below the 'Pages' heading, there is a search bar and a 'Search Pages' button. The page list includes columns for 'Title', 'Author', and 'Date'. The pages listed are: 'Add Listing', 'Blog Post Page — Elementor', 'Cart — Cart Page', 'Checkout — Checkout Page', 'Component — Elementor', 'Contact Us — Elementor', and 'Dashboard'. Each page entry has a checkbox on the left, the page title, the author name 'insidercrm_dw4gn', a status icon, and the publication date and time.

☐	Title	Author		Date
☐	Add Listing	insidercrm_dw4gn	—	Published 2022/02/11 at 4:12 pm
☐	Blog Post Page — Elementor	insidercrm_dw4gn	—	Published 2020/05/11 at 4:35 am
☐	Cart — Cart Page	insidercrm_dw4gn	—	Published 2022/02/11 at 4:11 pm
☐	Checkout — Checkout Page	insidercrm_dw4gn	—	Published 2022/02/11 at 4:11 pm
☐	Component — Elementor	insidercrm_dw4gn	—	Published 2020/05/11 at 4:39 am
☐	Contact Us — Elementor	insidercrm_dw4gn	—	Published 2020/05/11 at 4:39 am
☐	Dashboard	insidercrm_dw4gn	—	Published 2022/02/11 at 4:12 pm

Step 2: Set Up Your Menu

Now that you’ve set up your pages, create and configure your menu.

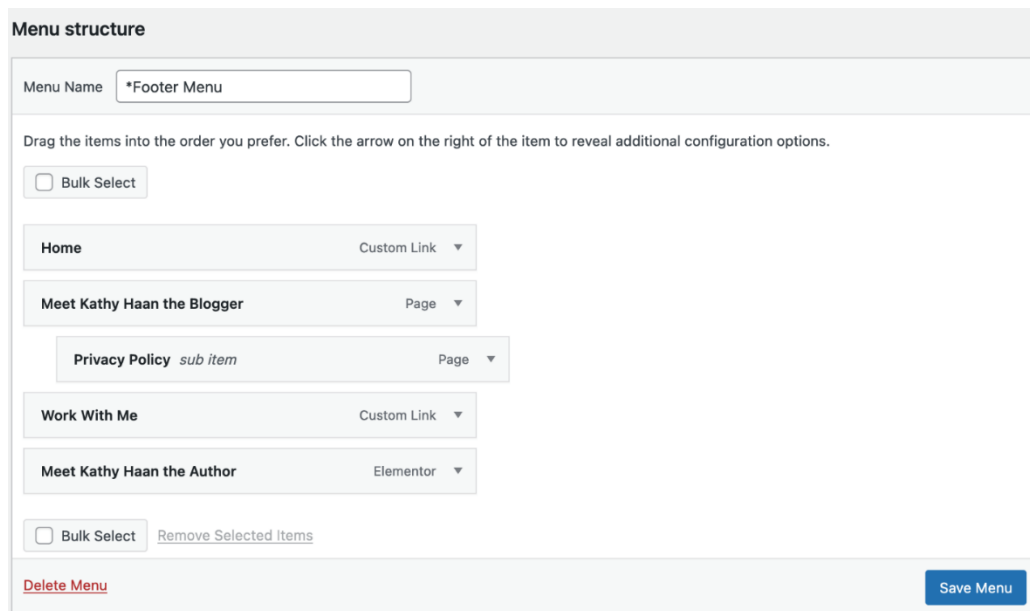

This is how visitors navigate through your site, and so depending on your theme, you may have more than one menu (such as a menu at the top of the site and one in the footer).

Here’s how to configure your site menu:

- From your dashboard, go to “appearance” > “menus.”
- To add pages, select the page from the left-hand list.
- Click and hold pages to re-order your menu or to nest pages as sub-pages below others.
- Click save changes.

Once you have set up your menu, scroll down on the same page and find the section called “**menu settings.**”

Under “**display location**” check the box next to “**primary.**” This will set the menu as your site’s main menu that will display in your header.

The screenshot shows the 'Menu structure' editor in WordPress. At the top, the 'Menu Name' is set to '*Footer Menu'. Below this, a drag-and-drop interface allows users to organize menu items. A list of items is shown on the left, including 'Home', 'Meet Kathy Haan the Blogger', 'Privacy Policy' (marked as a sub-item), 'Work With Me', and 'Meet Kathy Haan the Author'. Each item has a dropdown arrow indicating its type: 'Custom Link', 'Page', 'Page', 'Custom Link', and 'Elementor' respectively. At the bottom, there are checkboxes for 'Bulk Select' and 'Remove Selected Items', a 'Delete Menu' link, and a 'Save Menu' button.

Step 3: Write Your First Blog Post (Optional)

In addition to web pages, many businesses also opt to add blog posts to help improve their likelihood of getting found in search engines, such as Google.

To write a blog post, go to “**posts**” from the left-hand vertical menu and click “**add new.**” From there, you can edit the blog post the way you would a web page.

One difference is that, unlike a page, you can write a blog post and then schedule it to publish at a later date.

Here's how to create a blog post in WordPress:

- Select **“posts”** from the left panel of your dashboard and click **“add new.”**
- Type in the post's name.
- Choose the category you want to put it in.
- Write your content.
- When you're finished, click publish.

Output:

The screenshot displays the WordPress dashboard's 'Pages' section. On the left is a dark sidebar with navigation links: Dashboard, Posts, Pricing Plan, Reveal, Listings, Subscription, Media, Pages (highlighted), All Pages, Add New, Comments (17), Contact, WooCommerce, Products, Analytics, and Marketing. The main content area is titled 'Pages' with an 'Add New' button. Below the title, it shows 'All (25) | Published (22) | Drafts (3) | Trash (13)'. There are filters for 'Bulk actions' (Apply), 'All dates', and a 'Filter' button. A search bar and 'Search Pages' button are also present. A pagination bar indicates '25 items' and shows '1 of 2' pages. The main table lists pages with columns for Title, Author, and Date. The listed pages are: Add Listing, Blog Post Page — Elementor, Cart — Cart Page, Checkout — Checkout Page, Component — Elementor, Contact Us — Elementor, and Dashboard. All pages are published by 'insidercrm_dw4gn'.

☐ Title	Author	Date
☐ Add Listing	insidercrm_dw4gn	Published 2022/02/11 at 4:12 pm
☐ Blog Post Page — Elementor	insidercrm_dw4gn	Published 2020/05/11 at 4:35 am
☐ Cart — Cart Page	insidercrm_dw4gn	Published 2022/02/11 at 4:11 pm
☐ Checkout — Checkout Page	insidercrm_dw4gn	Published 2022/02/11 at 4:11 pm
☐ Component — Elementor	insidercrm_dw4gn	Published 2020/05/11 at 4:39 am
☐ Contact Us — Elementor	insidercrm_dw4gn	Published 2020/05/11 at 4:39 am
☐ Dashboard	insidercrm_dw4gn	Published 2022/02/11 at 4:12 pm

Activity 5:

Adding a Wordpress Theme & Install Plugins

1. Install Theme

In the world of WordPress, a theme is a website template.

It controls how your site looks, as well as how it functions and what it comes out of the box capable of. There are thousands to choose from, with sites such as **ThemeForest.net** where you can browse and buy premium templates.

It's worth investing the time upfront to find one that best matches the site you want to build. Once you find the best theme for you, purchase it, and then download the theme files.

Here's how to install a premium WordPress theme:

1. Navigate to your WordPress dashboard by signing in to your account (<http://localhost/foldername/wp-admin>).
2. From the left panel, select "appearance" and then "themes" from the menu.
3. Select a new theme and activate it

2. Install Plugins

After installing your theme, next, you need to install and activate all required plugins, which help expand the functionality of WordPress.

In addition to the plugins that come with your theme, there are thousands to choose from, that can do anything from enhancing site security to adding live chat or turning your page editor into a drag-and-drop editor.

However, try to limit the number of plugins you use as too many can slow down your website or cause other plugins to break.

For example, following plugins are recommend for every business website:

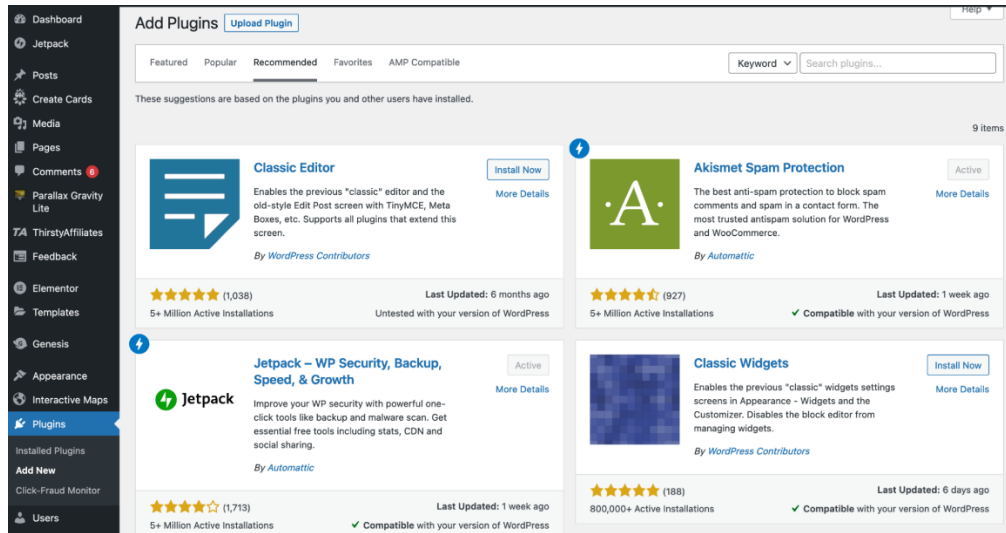

- Yoast SEO: This plugin helps you optimize your posts for search engines.
- Google Analytics: Track your website traffic and activity. If you're a blogger, this is a necessity as most brands won't work with you if you don't have this installed.
- Jetpack: This plugin provides security, maintenance and performance enhancements for your website.
- Akismet: Protect your site from spam comments on your blog posts.
- Elementor: Use a page builder plugin, such as Elementor to transform your page editor into a more beginner-friendly drag-and-drop editor.

Install Plugins:

Here's how to install WordPress plugins:

- From your WordPress dashboard, select “plugins” from the left-hand vertical menu.
- Click “add new” from the drop-down.
- Type in the plugin's name you want to install.
- Click “install now” and then click “activate.”

Output:

4) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1

Students are required to demonstrate their ability to effectively manage product listings, organize product categories, and optimize product pages for online sales conversion.

Prior to implementing this graded task Select from the service business model and complete product sheets of 10 products to use in product pages (PDPs).

1. *Theme Selection and Installation:*
 - a. *Task: Choose a suitable e-commerce theme from the WordPress theme library.*
2. *Plugin Integration and Customization:*
 - a. *Task: Install and configure essential e-commerce plugins such as WooCommerce, payment gateways, and product management tools.*
3. *Product Listing and Management:*
 - a. *Task: Add products to the e-commerce store, including product descriptions, images, and pricing.*

Lab Task 2

Imagine you are starting a service-based business offering your expertise in a specific field. Using WordPress as your platform, outline the steps you would take to set up and launch your online presence.

Consider factors such as :

1. *Service description,*
2. *Pricing,*
3. *Appointment scheduling,*
4. *Client testimonials.*

Lab 06

Canva as a design tool

Objective:

To familiarize students with basic design skills required for websites and marketing purposes using a design tool that can cover all the different aspects related to ecommerce presence and marketing. The design tool, Canva, makes designing easy for everyone and for any purpose from social media images, videos and gifs to posters, websites, booklets, multimedia presentations, and more.

Activity Outcomes:

After this lab, the students should be able:

- To brainstorm ideas for designing different sections of there website or ads/posts related to marketing.
- To effectively transform ideas into publishable designs e.g. flyers, posters, infographics, posts, etc.

Instructor Note:

As pre-lab activity, read Canva comprehensive design school tutorials, articles, and video courses on various design topics available on Design School homepage (<https://www.canva.com/designschool/>)

Useful Concepts:

Design tools

Graphic design tools are software applications used to create visual content. They can be used for a variety of purposes, such as creating logos, illustrations, marketing materials, and web graphics.

There are many different graphic design tools available, each with its own strengths and weaknesses. Some of the most popular tools include:

- **Adobe Photoshop** is the industry standard for photo editing and manipulation. It offers a wide range of tools for editing photos, creating graphics, and working with text.
- **Adobe Illustrator** is a vector graphics editor that can be used to create logos, illustrations, and icons. Vector graphics are made up of lines and shapes, which can be scaled infinitely without losing quality.
- **InDesign** is a page layout program that is used to create magazines, brochures, and other multi-page documents.
- **Canva** is a web-based graphic design tool that is easy to use for beginners. It offers a wide range of templates and tools for creating social media graphics, presentations, and other marketing materials.
- **GIMP** is a free and open-source image editor that offers many of the same features as Photoshop.

The best graphic design tool for you will depend on your needs and experience level. If you are a beginner, you may want to start with a user-friendly tool like Canva. If you are a professional designer, you may need a more powerful tool like Photoshop or Illustrator.

Canva

Canva is an online graphic design tool used to create social media graphics, presentations, posters, documents, and other visual content, including videos. As opposed to other graphic design tools that require some level of expertise, Canva is specifically laid out for ease of use, which means novice users can feel more comfortable starting out with the tool. Canva offers a large number of pre-built templates so that digital marketers can create on-brand posts at an expert design level. Here are some key points about Canva:

- **Focus:** Creating social media graphics, presentations, posters, flyers, and other basic visual content.
- **Strengths:**
 - **User-friendly:** Drag-and-drop interface with pre-made templates, fonts, and stock photos makes it perfect for beginners.
 - **Variety:** Offers a vast library of templates and design elements to jump-start your creations.
 - **Collaboration:** Allows team collaboration on designs.
 - **Affordability:** Provides a free plan with paid options for access to more features and assets.
- **Weaknesses:**
 - **Limited editing capabilities:** Compared to professional design software like Photoshop, it offers less flexibility for in-depth editing.
 - **Template-driven:** While offering a great starting point, heavy reliance on templates can limit creative freedom for complex designs.

Canva's interface is designed to be user-friendly, especially for those new to graphic design. Here's a breakdown of the key areas:

Workspace:

- This is the central area where you create your designs. You can choose from pre-sized templates or custom dimensions to get started.

Templates:

- Canva offers a vast library of templates for various purposes like social media posts, presentations, posters, flyers, and more. These templates provide a great starting point with pre-designed layouts and elements.

Design Elements:

- On the left side of the workspace, you'll find a panel with various design elements. This includes:
 - **Photos:** Millions of free and premium stock photos are categorized for easy browsing. (Free plan offers limited selection).
 - **Graphics:** A collection of icons, illustrations, shapes, and lines to add visual interest to your designs.

- **Text:** Choose from a variety of fonts and customize text styles like color, size, and weight.

Editing Tools:

- At the top of the workspace, you'll find basic editing tools for:
 - **Arranging elements:** Drag and drop to position and layer elements on your design.
 - **Resizing and cropping:** Easily resize or crop photos and graphics.
 - **Text editing:** Change fonts, size, color, and alignment of your text.
 - **Backgrounds:** Choose from solid colors, gradients, or image backgrounds.

Other Features:

- **Navigation bar:** Located at the top, it provides access to your projects, templates, uploads, and brand kit (Canva Pro only).
- **Search bar:** Search for specific design elements or templates.
- **Sharing and Downloading:** Share your designs directly to social media or download them in various formats (JPG, PNG, PDF) depending on your plan.

4) Solved Lab Activities

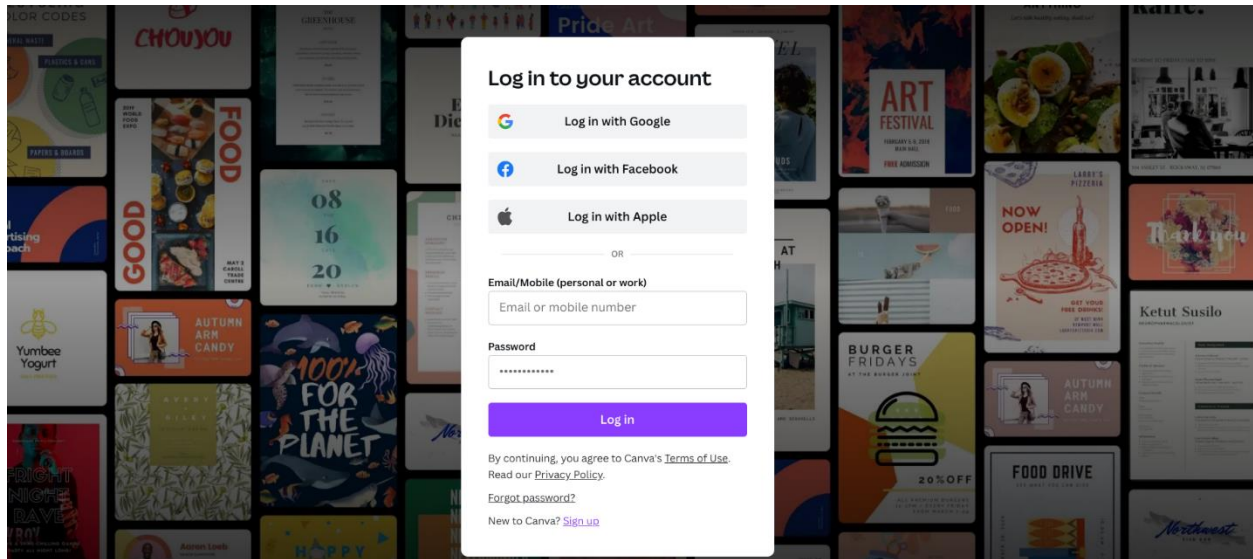

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
1	10min	Low	CLO5
2	30min	Medium	CLO5
3	30min	Medium	CLO5
4	30min	Medium	CLO5

Activity 1: Getting started with Canva

Solution:

Navigate the Canva interface

To create a new social media asset in Canva, you'll need to **log in** or **create a new account**. To begin, navigate to [Canva.com](https://www.canva.com) and complete one of those steps. You will be directed to provide your email address and create a password, or log in via your Google, Facebook, or Apple account.

You can also choose to download Canva desktop app if you **prefer to work offline or want potentially smoother performance for editing complex designs.**

Activity 2: Create a design

Solution:

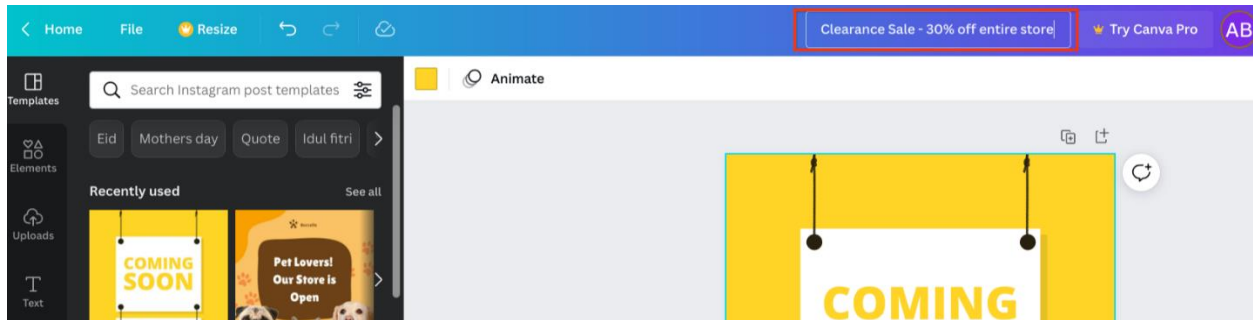

Select **create a design**. Select the type of post you want to create. You'll have the option to create a video, presentation, Instagram post or story, poster, Facebook post, logo, flyer, infographic, resume, and other types of content. For now for an example, select an **Instagram post**.

Design tip: Sketching a rough outline of your design on paper before you begin can help you bring your vision to life. It doesn't need to be perfect. Consider what you'd like to include in the design, and where it might look best.

1. Choose the right dimensions for your design

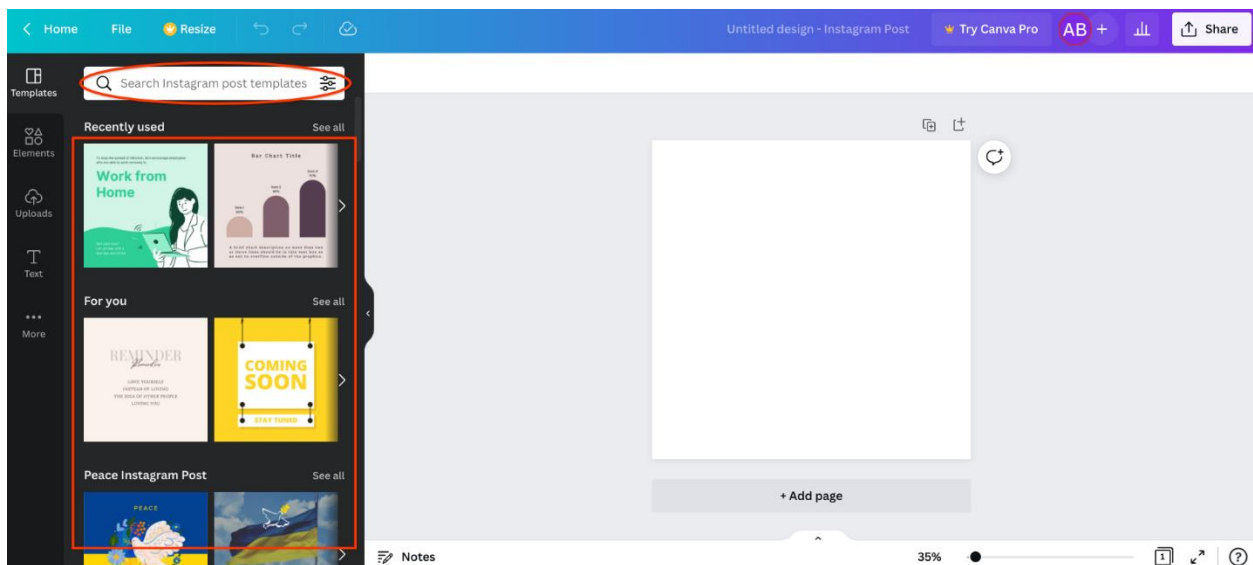

To begin, choose your design type from the Canva homepage. These are set to the optimal dimensions for each graphic, whether it's a social media post, flyer or more. Or you can use custom dimensions by searching for "custom size". You can choose from pixels, millimetres or inches.

Now, title your post in the bar at the top of the page. Make sure to give your post a descriptive title. For example, your title might include the name of the discount being offered or an upcoming holiday.

Browse Canva's various templates by entering keywords in the search bar that involves the specific topic of your post or business, like **electronic store**, or more vague terms, such as **colorful**.

***Note:** The free templates do not have a crown icon. The items with a crown require a paid Canva Pro account.*

When you find a template you like, select it to add to your post. You can adjust and edit all the elements within the template by **selecting an element**. **A toolbar will pop up**, allowing you to make any changes you want. You'll have the ability to change colors, sizes, fonts, text alignment, spacing, and more. If you want to select more than one element, you can click and drag your mouse over the elements you wish to edit, and they'll be selected together.

2. Choose a background

The background for your design could be a color or an image.

Background colors

Design tip: Different colors tell different stories. Purple is associated with individuality, orange relates to activity, and green conjures images of nature. Think about what colors best suit your needs. Find a good color combination with the [color palette tool](#).

Of course, you can always use a white background too. To choose a color, use the Color Picker tool in the toolbar at the top of the editor.

Background photos

To use a photo as a background, first add a grid. Once placed on a grid, photos can be resized, cropped, [flipped](#) and layered to create a variety of visual effects.

Next, search Images or upload your own. Then drag and drop your image onto the grid: it will snap to fit. You can [add filters](#) to change the brightness, saturation and clarity of the photo. This can help when [layering text](#) and elements.

Design tip: You can add background images or feature images to your design.

A *background image* supports the message of the content. If there's too much going on in the background, it's hard to overlay things like text or illustrations. When you are choosing a background image for your design, consider texture over structure. You can [crop images](#) to find pockets of texture that will work better—this way you can also remove any space or features in the image that creates too much noise.

The image below uses a close up photograph of a rose to add textural interest to the design, but its main role is to act as a vehicle for the text.

A *feature image* becomes the focus of your design: this image sits high in the order of [visual hierarchy](#). Use a single, or split-cell grid to apply clever feature images and help your content sing. The image below uses a grid to balance the visual hierarchy of the design. The user's eye is drawn to the photograph.

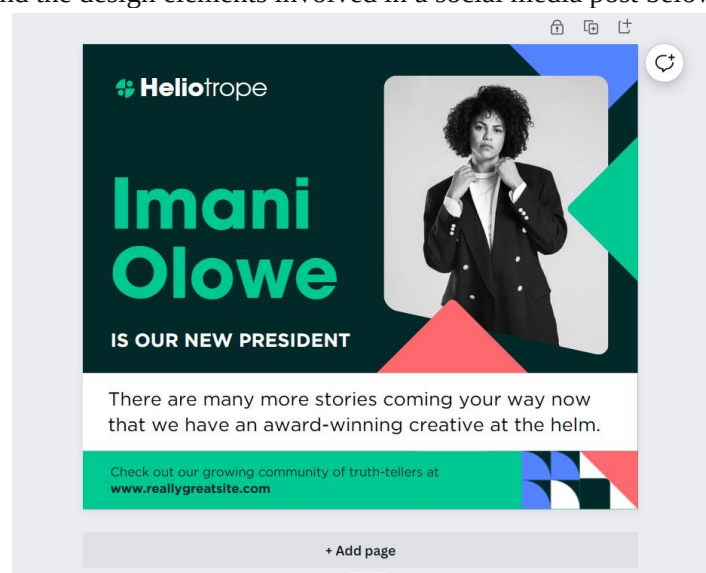

3. Add your elements

Your design might include text, icons, photos or illustrations. These need to be combined in a way that is visually appealing. Canva graphic designer Lynneal Santos says it's a matter of balance. "Consider the balance and composition of all the elements in the design. When you're laying out your elements, ask are the elements balanced? Are they centered? And ensure they're not too close to other elements or the edge of the page."

"Keep it simple." Don't overload your design with too many elements, as it can confuse the visual message of the image. This is something designers call [visual heirarchy](#), which involves the arrangement of elements according to their importance. Try playing with size, color, and placement in order to see what works best.

If you want to add a photo to your design, try using one of Canva's frames. You can find these under "elements" in the side panel.

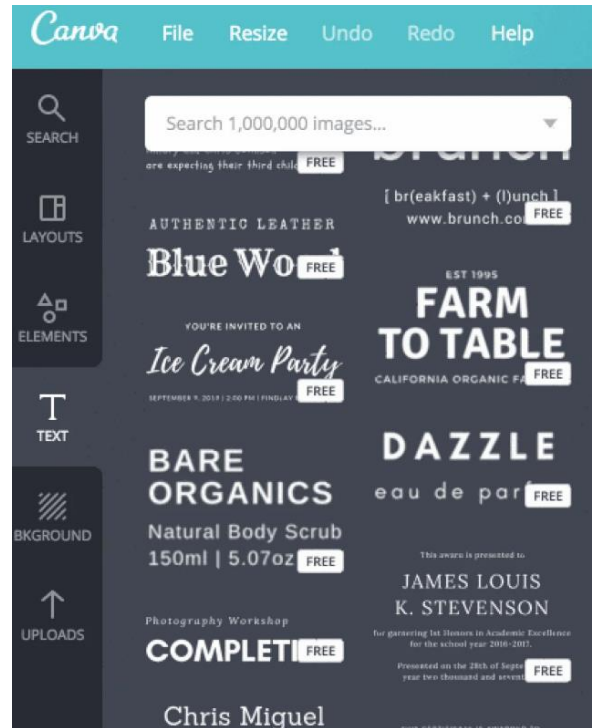

Design Tip: Harness the power of negative space. Negative space, also known as white space can be any area within a design that is free from text, images, or embellishments (it doesn't have to actually be white). Designers love it because it can help create grouping, add emphasis and improve legibility. Take some time to understand the design elements involved in a social media post below.

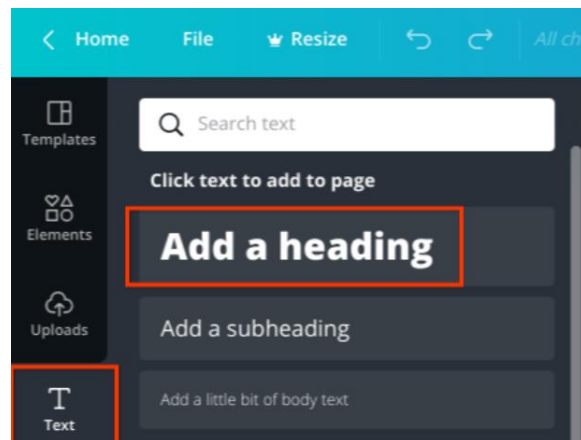

4. Choose the right fonts

The look of your fonts can have a huge impact on your design. Choosing one font is hard enough. But your design may need more than one typeface. Canva suggests never using more than two fonts in a design, as too many fonts tends to make a design look “messy”. You’ll want to choose complementary fonts, which add visual interest while working well together. You can learn more about which fonts look good together with [tips on font pairing.](#))

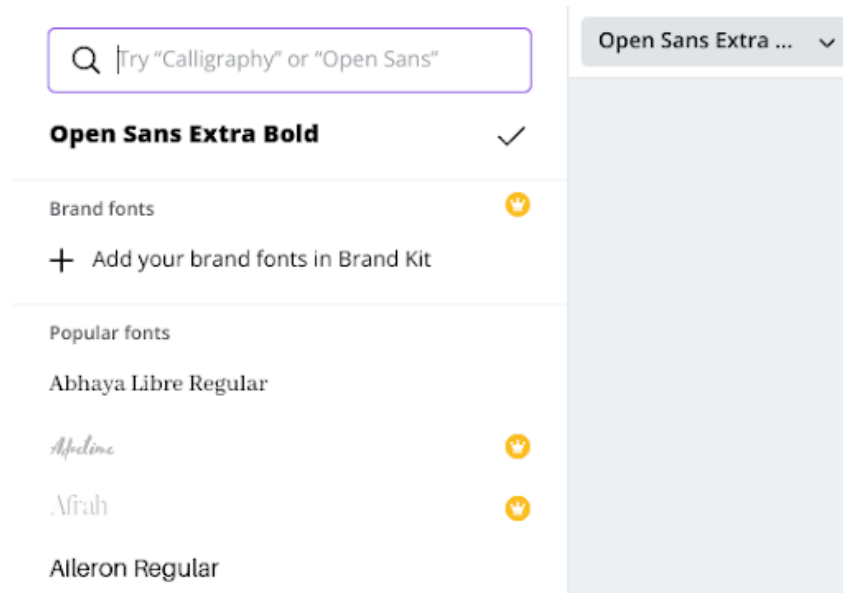

Canva has hundreds of pre-set font combinations to choose from. You can find these in the Text tab in the side panel.

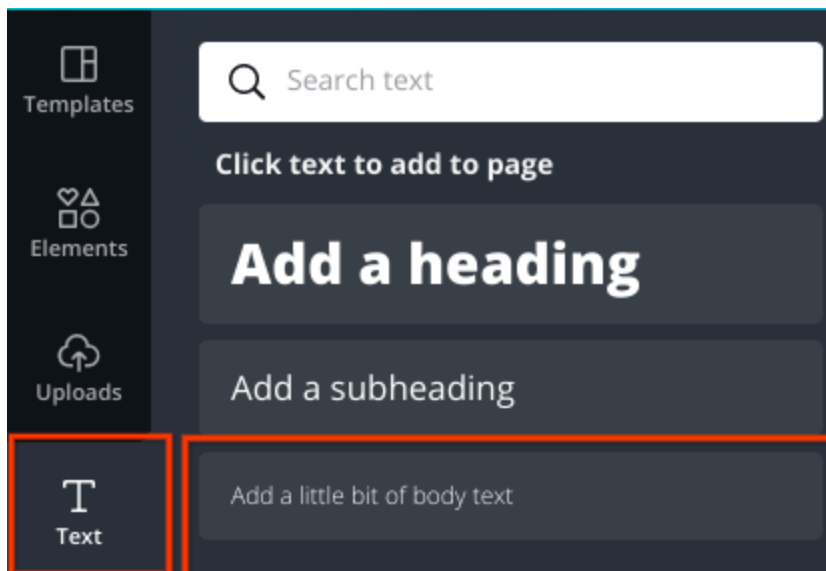

Or you can create your own combination. Again, simple is best: if you’re choosing an elaborate font, ensure you pair it with a simpler font so your design is balanced. Canva’s [Font Combination](#) tool can help, and Traditional combinations like a sans serif font and a serif font can be very powerful. Don’t forget about readability. If your fonts are too complicated, they can detract from your message.

To adjust text, select the text you want to edit and **choose a font from the dropdown menu**. To ensure your text is accessible, avoid complicated fonts and italics, bold, or other special lettering.

If you need to add additional body text, go to the **Text** menu and select **Add a little bit of body text**. Move the text box to where you would like to place it in the post.

Design tip: Typographic hierarchy establishes the order of importance given to different design elements. By applying different fonts, color and scale to your text, you can dramatically change the way your message is received.

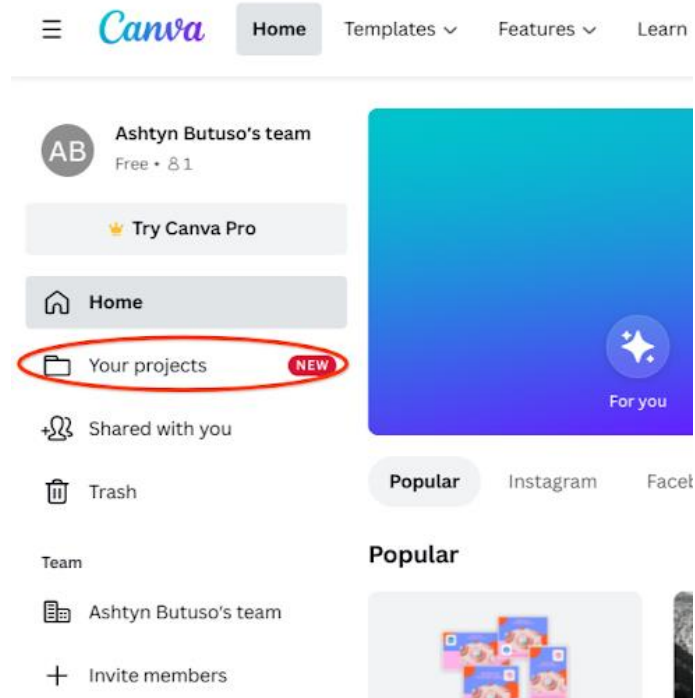

Next, click on the **Elements tab** to find graphics, photos, videos, and more. **Type a keyword** in the search bar to find relevant elements for your design. When you click on an item in the elements tab, it will automatically be added to your canvas, but feel free to drag it around and place it where you want.

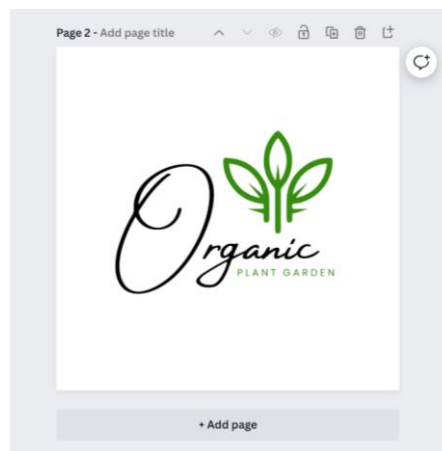

5. Save and share your work

You might want to share your post with collaborators before posting your new post on social media. To share, click the share button. Here you can set the sharing permissions from **only people added to Anyone with the link**. You can also choose what access to allow, from full editing access to view only. You can either click **Copy link** or add in your collaborators email addresses.

Finally, be sure to **save the work** you did to complete this activity. Canva automatically saves your work, but you can also save it by clicking **File** and selecting **Save**. After you save your work, navigate to the homepage to the **Your Projects** tab, where you can find your saved projects.

Activity 3:
Create a logo for your brand

Solution:

1. Open Canva and Choose a Starting Point:

- Search for "Logo" in the search bar. You'll see two options:
 - **Logo Maker:** This offers a user-friendly interface with pre-designed templates. Great for beginners!
 - **Blank Design:** This gives you complete creative freedom to create a logo from scratch.

2. Using Logo Templates:

- Browse through the various logo templates offered by Canva. There are options for different industries, styles (minimalist, playful, etc.), and color schemes.
- Choose a template that resonates with your brand image.

3. Customizing Your Logo:

- Once you have a template, you can customize it completely using the drag-and-drop interface. Here's what you can edit:
 - **Text:** Change the name, tagline, or any text element in the template. Choose fonts that reflect your brand personality.
 - **Graphics:** Replace the icons or illustrations in the template with ones that better represent your brand. You can upload your own graphics or choose from Canva's extensive library.
 - **Colors:** Edit the colors of the template to match your brand color palette.

4. Using a Blank Design (For More Experienced Users):

- Choose the "Blank Design" option if you want complete creative control.
- Upload your own icons, illustrations, or photos to use in your logo.
- Use Canva's shapes and lines tools to create your own design elements.
- Experiment with different layouts and text arrangements.

5. Refine and Download:

- Once you're happy with your logo design, ensure it's visually balanced and easy to read at various sizes.
- Download your logo in a high-resolution format (e.g., PNG) with a transparent background.

Here are some additional tips for designing a logo in Canva:

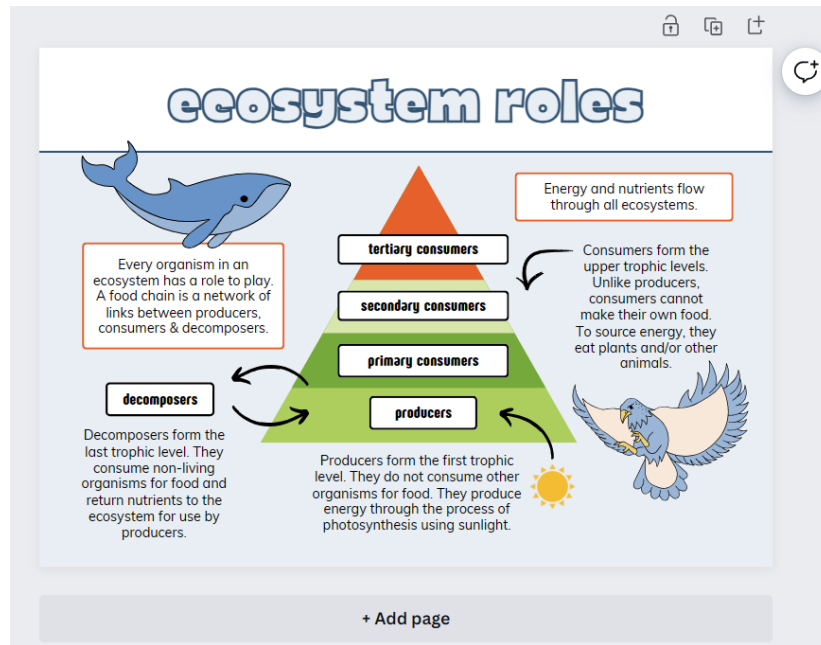

- **Keep it simple:** A logo should be memorable and easy to understand.
- **Consider your target audience:** What kind of image do you want to project?
- **Use high-quality visuals:** Blurry or pixelated graphics will give a negative impression.
- **Test your logo at different sizes:** Make sure it looks good on social media profiles, business cards, and other marketing materials.

Activity 4:

Design an infographic using Canva

Solution:

Pick a complex topic (e.g., the water cycle, photosynthesis) and present it in a visually appealing infographic using Canva's charts and icons.

1. Start with a Design:

- In the search bar, type "Infographics" to open the dedicated section.

2. Choose a Template (Optional):

- Canva offers a vast library of infographic templates for various purposes (e.g., business, education, social media).
- Browse the options and pick a template that best suits your infographic's theme and style.
- You can filter the templates by category, color, or layout for easier searching.

3. Go Blank for Full Control:

- If you prefer a completely custom design, choose "Blank design" to start with a fresh canvas.
- This option allows maximum creative freedom for your infographic.

4. Customize Your Infographic:

- Once you have a template or a blank canvas, it's time to personalize it!
- Here's what you can edit using Canva's drag-and-drop interface:
 - **Text:** Change headings, body text, or add data points. Choose fonts that complement your brand or the infographic's theme.
 - **Graphics:** Replace placeholder images, icons, or illustrations with ones that visually represent your information. You can upload your own visuals or use elements from Canva's library (free and paid options available).
 - **Background:** Select a background color or image that complements your overall design and ensures readability.
 - **Charts & Graphs:** If your infographic involves data visualization, Canva offers a variety of chart and graph templates you can customize with your data.

5. Refine and Download:

- Once you're happy with the visual elements, ensure the information is clear, concise, and easy to follow.
- Maintain a consistent visual style throughout the infographic for a professional look.
- Proofread all text for any errors before downloading.
- Canva allows you to download your infographic in various formats like PNG, JPG, or PDF. Choose the format that best suits your needs (e.g., PNG for transparent background for social media).

Bonus Tips:

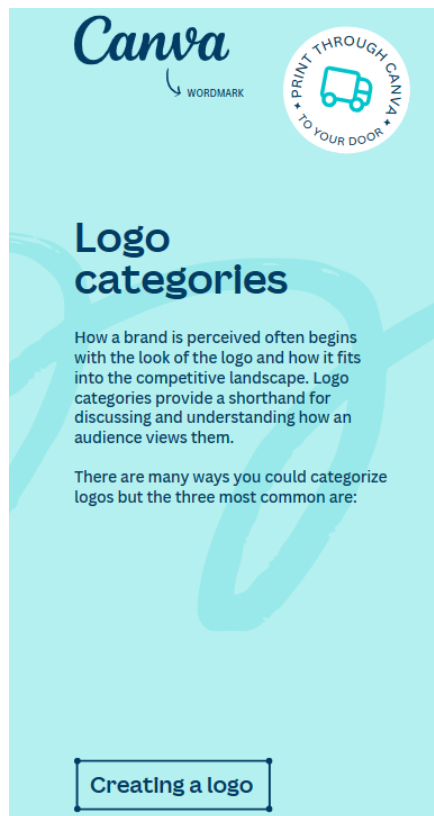

- **Keep it concise:** Focus on the most important information and avoid overloading the infographic with text.
- **Visual hierarchy:** Use size, color, and placement to guide the viewer's eye through the information.
- **Brand alignment:** Ensure the infographic's colors, fonts, and overall style reflect your brand identity.

5) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1

Design a poster as shown in the figure below.

A logo using text to spell out the brand's name. Great for new brands where the name is unknown or word-of-mouth is important. Font choice is crucial to send a subliminal message about the business. A serif font may communicate trust and tradition, where sans-serif may suggest youthful and modern values.

This logo communicates a message through pictures. It may be accompanied by a business name but the symbol should remain recognizable, even without the text. Consider the symbol's literal and implied meanings and associations and ensure they align with the brand's core message.

A logo using the brand's initials or first letter to create a recognizable symbol. Font choice is important, as is the interaction of the letters and what that suggests. Pictorial or symbolic elements could be introduced to strengthen and support the message but should not take priority over the letter-forms' interaction.

These occur when two categories are mixed and given equal importance. You could combine all three categories but remember—simple is always better. Combinations are good for when brands need to build up recognition in a pictogram or monogram. Once recognizable, the wordmark can be dropped.

Lab Task 2

Design a social media campaign for your online business consisting of 3-5 social media posts (Instagram/Facebook) promoting a specific product or service. The designs should be visually appealing, consistent with your brand identity, and target your ideal customer.

Example social media campaign:

Campaign: "Rescue Day" at the Animal Shelter (Instagram)

Post 1 (Image): A carousel post featuring adorable photos (or a short video) of different animals up for adoption at the shelter.

Caption: Calling all animal lovers! It's #RescueDay at [Shelter Name] and these cuties are looking for their furever homes. Every adoption saves a life - come meet your perfect match this Saturday! #AdoptDontShop #FindYourFriend

Post 2 (Story): A series of Instagram story slides throughout the day of "Rescue Day".

Slide 1 (Image): Photo of volunteers playing with the animals. **Caption:** The fun is already underway at [Shelter Name]'s #RescueDay! Come join us, play with some adorable animals, and maybe even find your new best friend!

Slide 2 (Video): Short video clip highlighting a success story - a recent adoption. **Caption:** Look at this happy pair! This is why we do what we do. #RescueDay is all about making these connections.

Slide 3 (Interactive): Poll with the question "What kind of animal are you thinking of adopting?" with options like "Dog", "Cat", "Other".

Post 3 (Image): A photo collage of happy new pet owners with their adopted animals.

Caption: What a heartwarming #RescueDay! So many amazing animals found their loving homes today. Thank you to everyone who came out and made a difference! #AdoptDontShop #FindYourFriend

Lab 07

SMART goals and Customer Personas

Objective:

For setting an effective marketing strategy, students should have a necessary knowledge about fundamental components required in setting of the campaign. This lab equips the students to work with two of those components: SMART goal setting and audience research using Customer Persona development.

Activity Outcomes:

After this lab, the students should be able:

- To put forth digital marketing SMART goals related to different Marketing Funnel stages.
- To have a better understanding of what kind of audience they are dealing with when setting up a digital marketing strategy by creating Customer personas.

Instructor Note:

As pre-lab activity, read concepts outlined in Digital Marketing & E-Commerce course book

Useful Concepts:

An effective marketing strategy is a roadmap to achieving your business goals through marketing initiatives. It outlines who you want to reach (target audience), what message you want to convey (value proposition), and how you'll get that message across (marketing channels). Here are the key components of a strong marketing strategy:

1. Define Your Goals:

- What do you want to achieve with your marketing efforts?
- Examples: Increase brand awareness, generate leads, boost sales, establish industry authority.

2. Know Your Target Audience:

- Who are you trying to reach with your marketing message?
- Understanding their demographics, needs, behaviors, and online presence is crucial.

3. Craft Your Value Proposition:

- What makes your product or service unique and valuable to your target audience?
- Clearly communicate the benefits you offer that solve their problems or improve their lives.

4. Competitive Analysis:

- Who are your main competitors?
- What are their strengths and weaknesses? How can you differentiate yourself?

5. Choose Your Marketing Channels:

- How will you reach your target audience?
- Consider options like social media marketing, content marketing, email marketing, search engine optimization (SEO), pay-per-click advertising (PPC), public relations, influencer marketing, etc.

6. Develop Your Marketing Mix:

- This refers to the "4 P's" of marketing: Product, Price, Place, and Promotion.
- Ensure all elements work together to create a cohesive brand experience.

7. Set a Budget and Timeline:

- Allocate resources for your marketing activities and establish realistic timelines for achieving your goals.

8. Track and Analyze Results:

- Monitor the performance of your marketing campaigns using analytics tools.
- Analyze data to see what's working and what needs improvement. Be ready to adapt your strategy based on insights.

What are SMART goals?

When you set your goals, you'll want to refer to the acronym SMART. SMART stands for specific, measurable, attainable, relevant, and time-bound.

Ensuring your goals meet this criteria will help keep you organized, give you a sense of direction as you move through your campaigns, and provide you with a time frame to work within.

SMART considerations:

To make sure your goals are SMART, consider the following factors:

Specific: What do you want to accomplish?

Measurable: What are the success metrics that will determine whether the objective has been met?

Attainable: Is this a realistic goal that you think you can meet?

Relevant: Is this specific marketing goal aligned with your company's overall objectives?

Time-bound: What is a realistic time frame that this goal can be met within?

SMART Goal Example:

You're a digital marketer for a photography and photo sharing company, that make scrapbooks and other items to commemorate events, trips, and more.

- You are setting new SMART goals in preparation for the upcoming financial quarter.
- You know the company wants to focus on increasing scrapbook sales for this next quarter, so you start thinking about goals. You decide to set a SMART goal to give you something to compare your progress against

We aim to increase scrapbook sales by 15% by the end of the next quarter through a robust social media campaign where we focus heavily on influencer marketing.

This goal fits all of the SMART goal criteria, which means you'll be able to easily track your progress and make adjustments as the social media campaign progresses.

Customer Persona

Why is it important to know your audience?

When you identify your audience, you can create digital marketing campaigns that interest and engage them. This can lead to brand growth and increased awareness.

Customer personas represent a group of similar people in a desirable audience.

They are profiles of your likely customers, based on data and research.

Creating customer personas can help a company figure out how to reach people at the right time and with the right message, offer, or products.

What's included in a customer persona

Who: Provide a short description of the fictional person that includes their name, age, location, household, and education. You'll also include a photo. These details make it easier to imagine someone who represents an actual customer.

Goals: Describe what the person wants to achieve. This might include several related goals that apply to the customer's life and your products or services.

Barrier: Identify a pain point that prevents the person from achieving their goals.

5) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
<i>1</i>	<i>30min</i>	<i>Medium</i>	<i>CLO5</i>
<i>2</i>	<i>30min</i>	<i>Medium</i>	<i>CLO5</i>

Activity 1: Define a SMART goal for a Digital Marketing campaign

In this activity, you will create two SMART goals for a fictional email marketing campaign.

You're part of the digital marketing team at Feels Like Home, an upscale furniture retailer that does most of its business online. The company is launching a new line of furniture called *For All*, which is designed to expand their customer base. The *For All* line features the brand's high level of craftsmanship, but at a lower price point than their previous offerings. Feels Like Home's main business goal for the *For All* line is to grow their total active customer base by 30% within a year of launch.

You're in charge of the email campaign for the launch of this new line. You and your team have set two email marketing goals to support Feels Like Home's overall business goal:

- **Goal 1:** Grow the email subscriber list by the end of September
- **Goal 2:** Increase the monthly email conversion rate

Your next task is to turn these goals into SMART goals. To do this, you'll use the information from the meeting notes below:

- The *For All* line will officially launch at the end of June, three months from today.
- The email subscriber list is currently about 100,000 people, and we currently add new subscribers at a rate of about 1,000 per month. There is high interest among target audiences, and market research indicates that 2,000 per month is a reasonable target.
- Only 35% of current email subscribers have ever made a purchase. Surveys indicate that the other 65% are interested in Feels Like Home's existing products, but the high price point has been the main obstacle to purchase.
- We estimate that a substantial number of new customers will come from our current subscriber list if we segment for the new product line.
- The average monthly conversion rate for email subscribers is currently 5%. Bringing that rate up to 7% per month within six months of launch will help us reach our business goal. An increase of this size is in line with industry benchmarks.
- Segmenting our email list will help us reach the right subscribers and maximize conversions.
- Giving discounts to existing subscribers who refer friends or family members should help grow the email list. Social media and paid media specialists are also working to grow the list.

Template to fill for the required goals

Goal One

Original goal	e.g. "Grow the email subscriber list by the end of September"
SMART goal	

Question	Response
What makes this goal specific?	
What makes this goal measurable?	
What makes this goal attainable?	
What makes this goal relevant?	
What makes this goal time-bound?	

Step 1: Use the above template

Step 2: Review the email marketing goals

The template contains the two goals for Feels Like Home’s new email marketing campaign:

- **Goal 1:** Grow the email subscriber list by the end of September
- **Goal 2:** Increase the monthly email conversion rate

Review the goals and make note of which SMART criteria they already meet and which they do not.

Step 3: Revise each goal to be SMART

Turn each goal into a SMART goal using the information from the scenario above. Write each revised goal in the corresponding **SMART goal** box. Your goals should be complete, but brief—one or two sentences is enough.

- **Specific:** Briefly describe what needs to be done to achieve the goal. It should be clear what is required, but you don’t need to outline your plans in detail.
- **Measurable:** Think about how you can measure your progress or results. What targets or metrics did your team discuss?
- **Attainable:** The goal should be reasonable given the timeframe and other constraints.
- **Relevant:** The goal should support Feels Like Home’s larger business goal and the success of the new product line.
- **Time-bound:** Consider how long it might take to reach this goal. Is there a specific date by which it must be accomplished?

Step 4: Explain what makes each goal SMART

Explain what makes each goal SMART by answering the following questions in the template:

1. What makes the goal **specific**?
2. What makes the goal **measurable**?
3. What makes the goal **attainable**?
4. What makes the goal **relevant**?
5. What makes the goal **time-bound**?

Be specific in your answers. If you feel you need additional information to meet any of the criteria, make note of that here as well.

Solution:

***Note:** The exemplar represents two possible SMART goals for the Feels Like Home scenario. Your goals will likely differ in certain ways. What’s important is that they meet as many of the SMART criteria as possible.*

Let’s review each SMART goal:

SMART goal one

The original goal indicates that Feels Like Home will grow their email subscriber list by the end of September, but it doesn't indicate how they will do it, whether it's possible, or why it's important. The SMART goal addresses all these questions, which increases Feels Like Home's chances of reaching their aim:

"Grow the email subscriber list by 12,000 people by the end of September by partnering with social and paid media specialists and launching an email referral program that offers discounts to existing subscribers."

- **Specific:** Feels Like Home will create an email referral program that offers discounts to existing subscribers.
- **Measurable:** The goal indicates by how much they want to grow the list, so it's clear how they will measure success.
- **Attainable:** They have six months to reach this goal and the target number of new subscribers is reasonable given the launch of an entirely new product line. However, more information may be needed to determine feasibility.
- **Relevant:** Adding new subscribers to their email list means more potential conversions, which supports the goal of adding new customers to their base.
- **Time-bound:** The deadline is in September.

SMART goal two

The original goal indicates that Feels Like Home will increase the monthly conversion rate, but it doesn't indicate how they will do it, whether it's possible, why it's important, or when they will get it done. The SMART goal addresses all these questions, which increases Feels Like Home's chances of reaching their aim:

"Increase the monthly email conversion rate by 2% within six months of launch by segmenting the email list for the For All line of products."

- **Specific:** Feels Like Home will segment their email list for the new *For All* line of products.
- **Measurable:** The goal indicates by how much they want to increase conversions, so it's clear how they will measure success.
- **Attainable:** The goal is attainable because they have six months after launch to reach and a 2% is in line with industry benchmarks. However, more information may be needed to determine feasibility.
- **Relevant:** Increasing the conversion rate of existing email subscribers directly supports the business goal of expanding the customer base by 30% within a year.
- **Time-bound:** The deadline is six months after launch.

Activity 2:

Define your target audience by developing Customer Personas related to your business and its marketing goals.

In this activity, you will create two customer personas for an e-commerce business by identifying patterns in customer data.

As a digital marketer for an online bedding and home goods store, you're helping to create customer personas for an upcoming campaign. Your team has collected customer data for their target audience using market research, analytics, and survey questions.

When customers were asked what they cared about most when purchasing bedding online, your team noticed certain trends in the responses. The majority of customers were concerned either with the cost or variety of the bedding available. Your team has already begun to create personas that reflect each of these groups:

- Persona 1 is the **Budget Buyer**. Their main goal is to purchase bedding that doesn't cost too much money.
- Persona 2 is the **Variety Shopper**. Their main goal is to find the exact bedding they want by choosing from a wide selection of colors, fabrics, and patterns.

Your task is to complete the personas using a sampling of data from 11 customers. To do this, you will first record the concerns of each persona. Then, you will identify demographic patterns in this data, including age, location, household, and education. Finally, you will describe possible barriers that might prevent each persona from reaching their goal.

Solution:

Step 1: Use the template

Persona 1 - The Budget Buyer

Who		Goal(s)	Barrier(s)
<i>[Copy an image from the next page and paste it here.]</i>	Name: Age: Location: Household: Education:	1. 2.	1. 2.

Step 2: Consider the following data

Age	Location	Household	Education	Goal	Concern
24	Suburbs	1 person	High school	Cost	Quality
36	Suburbs	3 people (1 child)	College	Cost	Quality
34	Suburbs	1 person	Graduate school	Cost	Quality
27	Suburbs	1 person	College	Cost	Website organization

25	City	2 people	College	Cost	Return policy
21	City	1 person	College	Variety	Shipping fees
34	City	4 people (2 children)	College	Variety	Checkout process
44	City	2 people (1 child)	College	Variety	Website organization
49	City	2 people (1 child)	College	Variety	Shipping speed
44	Suburbs	4 people (2 children)	Graduate school	Variety	Website organization
39	City	2 people	High school	Variety	Website organization

Personas		
Categories	Persona 1 - Budget Buyer	Persona 2 - Variety Shopper
Goal	Cost	Variety
Concern		
Age range		
Location		
Household		
Education		

Step 3: Sort the customer data and identify concerns

In the customer data spreadsheet, find the **Goal** column header. Select the dropdown arrow and choose *Sort A → Z*. This will bring the Budget Buyers to the top and send the Variety Shoppers to the bottom.

Then review the information in the **Concern** column. Record the most common concern for each customer type in the blank **Personas** table.

Step 4: Examine the demographic data for patterns

Review the demographic data for each customer group to identify any patterns or trends. Do this for each of the demographic categories, including **Age**, **Location**, **Family**, and **Education**. Then record your findings in the **Personas** table.

For example, the data in the **Age** column indicates that most of the Budget Buyers are in their mid-twenties to mid-thirties. In contrast, most of the variety shoppers are in their mid-thirties to mid-forties.

***Note:** Keep in mind that there may be some variation or outliers within each category. Try to identify the most common responses in each category for each customer group.*

Step 5: Fill in demographic information for each persona

Next, go to the customer personas template. Use your findings to fill in the **Who** sections for the Budget Buyer and Variety Shopper as follows:

- **Name:** Pick a name to represent each persona. You can use one of the names from the customer data spreadsheet or choose your own.
- **Age:** Select an age within the range you identified for each customer group.
- **Location:** Enter the most common location (city or suburbs) for each customer group.
- **Household:** Describe a family type that broadly reflects each customer group.
- **Education:** Add an education level that matches each customer group.

Step 6: Describe potential barriers for each persona

Now that you know more about the customers these personas represent, describe 1–2 barriers for each persona under **Barriers**. To identify possible barriers, consider each persona’s main concern and how it might prevent similar customers from completing a purchase and reaching their goal.

For example, imagine that the Budget Buyer’s main concern was buying eco-friendly products. If the company sells affordable products, but their website doesn’t make it clear how they source and manufacture those products, that could become a barrier to purchase.

Step 7: Choose an image for each persona (optional)

Once you have completed your personas, review the avatars on the second page of the template. Select an image to represent each persona by copying and pasting it into the **Who** section.

Exemplar Personas:

Persona 1 - The Budget Buyer

Who	Goal(s)	Barrier(s)
 Name: Raj Gosh Age: 27 Location: Suburbs Household: 1 person Education: College	1. To purchase bedding that doesn’t cost too much money	1. Worried about the durability of low-cost options over time 2. Concerned about the quality of bedding bought online

Persona 2 - The Variety Shopper

Who	Goal(s)	Barrier(s)
-----	---------	------------

 Name: Malena Mora Age: 44 Location: City Household: 2 adults, 2 kids Education: College	1. To find the exact bedding they want by choosing from a wide selection of colors, fabrics, and patterns	1. Worried they won't be able to find what they want 2. Available sort options don't always allow them to filter to the desired degree
--	---	---

Let's review each persona:

Persona 1 - The Budget Buyer

- **Name:** This persona uses the name of one of the survey respondents (Raj) who matches most of the Budget Buyer characteristics.
- **Age:** Raj's age (27) is within the main age range of customers who care most about cost.
- **Location:** Raj lives in the suburbs because that's where most Budget Buyers reside.
- **Education:** Raj is college educated because Budget Buyers tend to be college educated.
- **Household:** Budget Buyers are typically younger than Variety Shoppers, so they tend not to have partners, spouses, or children.
- **Barriers:** Raj is a Budget Buyer, so he wants to purchase bedding that doesn't cost too much. But he's concerned that his budget might limit his options. Since he can't examine the bedding in person before purchasing it, he also wonders if the quality is really as high as it seems online.

Persona 2 - The Variety Shopper

- **Name:** This persona uses the name of one of the survey respondents (Malena) who matches most of the Variety Shopper characteristics.
- **Age:** Malena's age (44) is within the main age range of customers who care most about variety.
- **Location:** Malena lives in a city because that's where most Variety Shoppers reside.
- **Education:** Malena is college educated because Variety Shoppers tend to be college educated.
- **Household:** Malena is part of a multi-person household because Variety Shoppers are often partnered or married and have 1–2 children.
- **Barriers:** As a Variety Shopper, Malena wants to be able to select from a wide range of options for themselves, their partner, and children. But they don't know if they'll be able to find everything they need in one place. Even if those options are available, it might be hard to find them if there aren't enough sorting options on the website.

6) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1

Graded Task: Customer Persona Development

Objective: The objective of this graded task is to develop a comprehensive customer persona for a specified target market. This exercise will help you understand your potential customers better, enabling you to tailor your products, services, and marketing strategies to meet their specific needs and preferences.

Instructions:

1. **Identify Target Market:** Choose a specific target market for which you will create the customer persona. This could be based on demographic factors (age, gender, income), psychographic factors (lifestyle, interests, values), geographic location, or any other relevant criteria.
2. **Conduct Research:** Gather information about your chosen target market using various sources such as surveys, interviews, market research reports, social media insights, etc. Try to collect both qualitative and quantitative data to gain a deep understanding of your potential customers.
3. **Create Customer Persona:** Based on the information gathered, create a detailed customer persona using the template provided below. Include relevant details about the persona's demographics, background, goals, challenges, preferences, and any other factors that might influence their purchasing decisions.
4. **Present Persona:** Present your customer persona in a visually appealing format. You can use tools like PowerPoint, Canva, or any other design software to create a professional-looking presentation.
5. **Reflection:** Reflect on the process of creating the customer persona. Discuss the insights gained, challenges faced, and how this exercise can help inform your business decisions moving forward.

Template for Customer Persona:

1. **Persona Name:** [Give your persona a name for better identification]
2. **Demographics:**
 - Age:
 - Gender:
 - Income Level:
 - Education Level:
 - Marital Status:
 - Location:
3. **Background:**
 - Brief overview of the persona's personal and professional background.
4. **Goals/Objectives:**
 - What are the persona's primary goals or objectives related to your product/service?
5. **Challenges/Pain Points:**

- What are the main challenges or pain points the persona faces that your product/service can address?

6. Preferences/Behaviors:

- What are the persona's preferences and behaviors related to purchasing decisions?
- Where do they usually shop?
- What factors influence their purchasing decisions (price, quality, brand reputation, etc.)?

7. Communication Preferences:

- How does the persona prefer to communicate (email, social media, phone, in-person)?
- Which social media platforms do they frequent?

8. Additional Information:

- Any other relevant information about the persona that can help tailor your marketing strategies.

Grading Criteria:

- Thoroughness and Accuracy of Research: 30%
- Completeness and Detail of Persona: 30%
- Clarity and Professionalism of Presentation: 20%
- Reflection and Insights: 20%

Submission: Submit your presentation slides along with a brief reflection document outlining your insights and reflections on the process.

Lab Task 2:

Read the case study available in the folder of TechSolutions Inc. and set smart goal for the company.

Lab 08

Search Engine Optimization (SEO)

Objective:

In this section, we will embark on an exploration to uncover the mysteries of SEO, delving into its core principles and strategies.

Activity Outcomes:

- Identify relevant keywords and understand search intent.
- Improve title and meta descriptions.
- On-Page Optimization Jungle Gym

Instructor Note:

As a pre-lab activity, it's highly recommended to familiarize themselves with SEO concepts and tools available at Google's Search Central Documentation [SEO Starter Guide: The Basics](#) | [Google Search Central](#) | [Documentation](#) | [Google for Developers](#)

Introduction to Search Engine Optimization (SEO)

Welcome to the fascinating world of Search Engine Optimization (SEO), where digital adventurers wield the power of search engines to enhance their online presence. In this section, we will embark on an exploration to uncover the mysteries of SEO, delving into its core principles and strategies.

Understanding SEO

At its essence, SEO is the art and science of improving a website's visibility in search engine results pages (SERPs). SEO endeavors to attract organic traffic from search engines such as Google, Bing, and Yahoo by optimizing various elements of a website and its content.

The Importance of SEO

In today's digital landscape, where billions of searches are conducted daily, a robust SEO strategy is indispensable for individuals and businesses alike. Enhanced visibility in search results leads to increased website traffic, brand recognition, and potential conversions. Whether you are running an E-commerce platform, a blog, or a corporate website, SEO can profoundly impact your online success.

Purpose of SEO

Search Engine Optimization (SEO) serves as the guiding force behind ensuring that your content is not only discovered but also prominently displayed to users searching for relevant information. Let's delve into the primary purposes of SEO:

- **Enhancing Visibility:** At its core, SEO aims to enhance the visibility of your website or content in search engine results pages (SERPs). By optimizing various elements of your website, such as keywords, meta tags, and content structure, SEO endeavors to ensure that your web pages rank higher and are more easily discoverable by users.
- **Driving Organic Traffic:** SEO plays a pivotal role in driving organic traffic to your website. By aligning your content with the search queries of your target audience, SEO enables your website to attract qualified visitors who are actively seeking the products, services, or information you provide. This organic traffic is valuable as it is often more likely to convert into leads or customers.
- **Establishing Authority and Credibility:** An effective SEO strategy not only improves your website's visibility but also helps establish authority and credibility within your industry or niche. By consistently delivering high-quality, relevant content that addresses the needs and interests of your audience, you can position yourself as a trusted resource and thought leader in your field.
- **Enhancing User Experience:** User experience (UX) is a critical factor in SEO success. Search engines prioritize websites that offer a seamless and intuitive browsing experience for users. By optimizing site speed, mobile responsiveness, navigation structure, and overall usability, SEO contributes to enhancing the user experience and keeping visitors engaged on your site.
- **Maximizing Conversions and ROI:** Ultimately, the goal of SEO is to drive tangible results for your business, whether it's increasing sales, generating leads, or boosting brand awareness. By attracting relevant traffic, establishing credibility, and providing a positive user experience, SEO sets the stage for maximizing conversions and achieving a favorable return on investment (ROI) from your digital marketing efforts.

Key Concepts in SEO

- **Keywords:**

- Keywords are the terms and phrases that users enter into search engines when looking for information, products, or services. Effective keyword research involves identifying the most relevant and valuable keywords for your website's content.
- Understanding user intent behind these keywords is crucial for creating content that meets the needs and expectations of your target audience.
- Keywords can be categorized into different types, including short-tail (broad) keywords and long-tail (specific) keywords. Long-tail keywords often have less competition and higher conversion rates.
- On-Page Optimization:
 - On-page optimization refers to optimizing individual web pages to improve their search engine rankings and visibility. This involves optimizing various on-page elements to make them more relevant to target keywords and user queries.
 - Key areas of on-page optimization include:
 - Meta Tags:
 - Meta tags are HTML elements that provide information about a web page to search engines and website visitors.
 - Meta Title Tag: This tag specifies the title of the web page and appears as the clickable headline in search engine results. It should accurately describe the content of the page and include relevant keywords to improve visibility.
 - Meta Description Tag: This tag provides a brief summary of the page content below the title in search engine results. It should entice users to click through to the page by highlighting its value proposition and relevance to their query.
 - Headings:
 - Headings, such as H1, H2, etc., are HTML elements used to structure and organize content on a web page.
 - Proper use of headings helps search engines understand the hierarchical structure of the content and its relevance to user queries.
 - The H1 tag typically represents the main heading or title of the page, while H2, H3, etc., are used for subheadings and section titles.
 - Content Quality:
 - High-quality, relevant, and engaging content is essential for on-page optimization.
 - Content should be well-written, informative, and tailored to meet the needs and interests of the target audience.
 - It should address user intent and provide valuable information or solutions to their queries.
 - Keyword Placement:
 - Strategic placement of target keywords throughout the content is crucial for on-page optimization.
 - Keywords should be naturally incorporated into titles, headings, subheadings, and body text to signal the relevance of the page to search engines.

- However, keyword stuffing (overloading content with keywords) should be avoided, as it can result in poor user experience and penalties from search engines.
- Off-Page Optimization:
 - Off-page optimization focuses on improving a website's search engine rankings through external factors that are not directly controlled on the website itself.
 - Key aspects of off-page optimization include:
 - Backlinks: Acquiring high-quality backlinks from authoritative and relevant websites to improve the website's authority and credibility.
 - Social signals: Engaging with social media platforms to increase brand visibility, drive traffic, and improve social signals, such as likes, shares, and comments.
 - Online reputation management: Monitoring and managing online reviews, mentions, and reputation to build trust and credibility with users and search engines.
- Technical SEO:
 - Technical SEO involves optimizing the technical aspects of a website to improve its crawlability, indexability, and overall performance in search engine results.
 - Key technical SEO considerations include:
 - Site speed: Ensuring fast loading times to improve user experience and search engine rankings.
 - Mobile-friendliness: Designing websites that are responsive and optimized for mobile devices, as mobile-friendliness is a key ranking factor.
 - URL structure: Creating clear, descriptive, and SEO-friendly URLs that accurately reflect the content of the page.
 - XML sitemaps: Generating XML sitemaps to help search engines discover and index all relevant pages on a website.
- Content Creation:
 - Content creation is the process of developing relevant, valuable, and engaging content for your target audience.
 - High-quality content plays a critical role in SEO success by attracting organic traffic, establishing authority and expertise in your industry, and encouraging backlinks from other websites.
 - Effective content creation involves conducting keyword research to identify topics and keywords relevant to your audience, creating comprehensive and well-researched content, and optimizing content for search engines while ensuring it provides value to users.

Advanced Concepts in SEO

- Backlink Analysis: Backlinks from authoritative websites are crucial for SEO. Tools like Moz's Link Explorer, Ahrefs, and Majestic allow you to analyze your backlink profile, monitor competitor backlinks, and identify opportunities for link building.
- Local SEO: For businesses targeting local customers, optimizing for local search is essential. Google My Business, Moz Local, and BrightLocal help manage local listings, solicit reviews, and improve local search visibility.

- **Mobile Optimization:** With the increasing use of mobile devices, optimizing your website for mobile is critical for SEO. Google's Mobile-Friendly Test and PageSpeed Insights provide insights into mobile performance and usability.
- **Schema Markup:** Adding schema markup to your website helps search engines understand the content better and can improve visibility in search results. Tools like Google's Structured Data Testing Tool and Schema.org provide guidance on implementing schema markup.
- **SEO Analytics and Reporting:** Monitoring and analyzing website performance is essential for optimizing SEO efforts. Google Analytics, Google Data Studio, and tools provided by SEO platforms like SEMrush and Ahrefs offer insights into traffic, rankings, and user behavior.
- **Continuous Learning and Updates:** SEO is constantly evolving, so staying updated with the latest trends, algorithm changes, and best practices is crucial. Following reputable SEO blogs, participating in forums, and attending industry events can help you stay informed and adapt your strategies accordingly.

Websites for Learning SEO

- **Moz (<https://moz.com/>):** Moz offers a wealth of resources, including beginner's guides, blogs, and online courses covering various aspects of SEO.
- **Search Engine Land (<https://searchengineland.com/>):** This website provides news, analysis, and tutorials on search engine optimization, search engine marketing, and related topics.
- **Backlinko (<https://backlinko.com/>):** Backlinko features in-depth guides, case studies, and actionable tips for improving SEO and link building.
- **Neil Patel (<https://neilpatel.com/>):** Neil Patel's website offers comprehensive guides, videos, and tools covering SEO, content marketing, and digital marketing strategies.

SEO Tools

- **Google Search Console (<https://search.google.com/search-console/>):** Google's free tool provides insights into how Google views your website, including search performance, indexing issues, and more.
- **Bing Webmaster Tools (<https://www.bing.com/webmasters/>):** Similar to Google Search Console, Bing Webmaster Tools offers data and diagnostics to improve your site's visibility in Bing search results.
- **Screaming Frog SEO Spider (<https://www.screamingfrog.co.uk/seo-spider/>):** This desktop program crawls websites to identify technical SEO issues, such as broken links, duplicate content, and missing meta tags.
- **SEMrush (<https://www.semrush.com/>):** SEMrush is an all-in-one SEO tool suite that provides keyword research, competitive analysis, backlink audits, rank tracking, and more.
- **Ahrefs (<https://ahrefs.com/>):** Ahrefs offers tools for keyword research, backlink analysis, content research, rank tracking, and site audits, helping you improve your website's search visibility.

3	30 minutes	High	CLO5
4	30 minutes	High	CLO5
5	40 minutes	High	CLO5

Activity 1: Keyword Research

Mastering Keyword Research for Effective SEO.

Explore different types of keywords for SEO success.

Objective

Identify relevant keywords and understand search intent.

Outcome

By completing this activity, students will have created a keyword list with high potential to attract targeted customers to their E-commerce store. They will have gained insights into trending topics, long-tail keywords, and search intent, which can inform their SEO strategy and content creation efforts.

Tools

- Google Trends (<https://trends.google.com/trends/>)
- Keywordtool.io (free version)
- Google Keyword Planner (<http://adwords.google.com/keywordplanner>)
- Answer The Public (<https://answerthepublic.com/>)
- SEMrush (<https://www.semrush.com/sem/>)

Concepts

Given the amount of conversation in the SEO community these days about social media, backlinks, and content, it's easy to overlook one small but crucial component of SEO: keyword research. Keywords are like a compass for your SEO campaigns: they tell you where to go and whether or not you're making progress.

Keyword research is the process of discovering the terms and phrases that people use in search engines when looking for information, products, or services. It is a critical aspect of search engine optimization (SEO) as it helps businesses understand their target audience's search behavior and optimize their website accordingly. They also assist you in understanding the ideas, concerns, and preferences of the audience you are targeting.

Despite the importance of keyword selection, most people's keyword research process looks something like this:

But that all changes now.

Now that you have a thorough guide, you will know EXACTLY how to identify the terms and phrases that members of your target market use when searching the internet.

Additionally, you'll see your website soar to the top of Google when you focus your on-page SEO on the appropriate keywords, bringing in an abundance of leads, sales, and visitors.

However, there's a catch: you must first find **Niche** in your sector before using a keyword research tool or tinkering with a single title tag.

Once you identify these Niche Topics, you can leverage buyer keywords that aren't being used by your competitors.

1. Types of Keywords:

- Broad Keywords: Short and general terms that describe a broad topic or industry. Example: "jewelry." They are also termed head keywords
- Body Keyword: Body keywords are 2-3 word phrases that get decent search volume (at least 2,000 searches per month), but are more specific than Head Keywords. Keywords like "life insurance" or "order vitamins online" are examples of Body Keywords. These almost always have lower competition than Head Terms, but can still be very competitive.
- Long-Tail Keywords: Longer and more specific phrases that target a niche audience. These keywords are long, 4+ word phrases that are usually very specific. Phrases like "affordable life insurance for senior citizens" and "order vitamin D capsules online" are examples of long tail keywords. Even though they don't get a lot of search volume individually – when added together– long tails make up the majority of searches online.
- Informational Keywords: Keywords used when users are seeking information or answers to their questions. Example: "how to make beaded necklaces"
- Transactional Keywords: Keywords used when users are ready to make a purchase or take a specific action. Example: "buy gemstone bracelets online"

2. Elements of Keyword Research:

- Search Volume: The number of times a keyword is searched for in a given period, indicating its popularity.

- **Competition:** The level of competition for a keyword among websites trying to rank for it in search engine results pages (SERPs).
- **Relevance:** How closely a keyword aligns with your business, products, or services.
- **Search Intent:** The reason behind a user's search query, categorized into informational, navigational, transactional, or commercial investigation.

3. How to Find Keyword Ideas For Your Business:

- **Customer Feedback:** Listen to your customers' feedback, questions, and concerns to identify potential keywords.
- **Industry Trends:** Stay updated on industry trends, news, and developments to discover new keyword opportunities.
- **Social Media Listening:** Monitor conversations on social media platforms related to your industry to uncover relevant keywords.
- **Internal Data:** Analyze your website's internal search queries, customer inquiries, and site search data to identify keyword ideas.

Activity

1. Choose Your E-commerce Store Niche:

Before diving into keyword research tools, it's essential to lay the groundwork by identifying niche topics within your industry or area of interest. Many people make the **mistake** of jumping straight into keyword research without considering the broader themes that define their niche. However, understanding niche topics is the key to unlocking new keyword opportunities and gaining a deeper understanding of your target audience's needs and preferences.

Here's an example: What do you think of when you hear the word "basketball"? Whether or not you're a diehard fan, here are some words that may have popped into your head

But when you enter the word "basketball" into the Google keyword planner or in any other tool, this is what we get.

Keyword Planner

Where would you like to start?

 Find new keywords and get search volume data

▼ Search for new keywords using a phrase, website or category

Enter one or more of the following:

Your product or service

Your landing page

Keyword (by relevance)	Avg.
basketball games	
basketball games online	
basketball shop	
history of basketball	
basketball rules	
free basketball games	
basketball ball	
basketball history	

This means none of that showed up as we thought. In other words, tools only display keywords that are EXTREMELY closely related to the keyword you entered.

Furthermore, they hardly ever display keywords that are somewhat, but not exactly, associated with your products. These are frequently the most profitable keywords in your niche.

Thus, to choose the niche, let's perform these steps.

1.1. Brainstorm Different Niches:

- Start by listing out your interests, hobbies, and areas of expertise. Consider what products or services you are passionate about or knowledgeable in.
- Think about potential niches that align with your skills, interests, and target market. For example, if you enjoy crafting or DIY projects, you might consider niches like handmade goods, artisanal products, or personalized gifts or if you are a sports person then you might consider niches like basketball rules, football court.
- Explore various industries and sectors to identify niche markets that have high demand, low competition, or unique selling propositions.
- Use mind mapping techniques, such as creating a visual diagram or brainstorming session with colleagues or friends, to generate ideas and explore different niche possibilities.

1.2. Research Buyer Personas:

- Craft detailed buyer personas representing your target audience's demographics, interests, pain points, and aspirations. Take into account factors like gender, age, income level, hobbies, challenges, and aspirations.
- Develop persona profiles for distinct segments of your target audience to ensure tailored keyword research efforts catering to their specific needs and preferences.

- Leverage online surveys, interviews, and market research data to gain insights into your audience's behavior, preferences, and search patterns.
- Your keyword research-focused buyer persona should include your target audience's: Gender, Age, Approximate income, Hobbies and interests, Things that they struggle with and What they want to accomplish (personally and professionally). Depending on your industry, you may have several different buyer personas. For example, following our basketball hoop example, you might have buyer personas for basketball players AND for parents (who in many cases will be the ones that ultimately buy the product). Lets create buyer persona as a powerpoint slide as it is one of the simplest of making persona.

Persona: High School Basketball Player Parent

Age 37 - 59

Gender Male or Female

Approximate Income
\$50,000 - \$150,000 per year

Hobbies & Interests: Celtics fan, playing pickup basketball, spending time with son or daughter.

Things they struggle with: Having more free time to exercise and spend time with kids (hence the desire for a basketball hoop).

Goals: Son or daughter to play college basketball for Division I or II school.

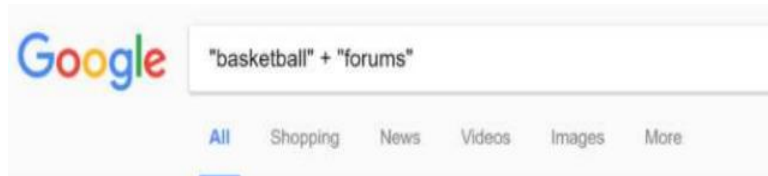

1.3. Define Your Target Audience:

- Narrow down your niche selection by defining your target audience within each potential niche.
- Identify the specific demographic characteristics, preferences, needs, and pain points of your ideal customers.
- Consider factors such as age, gender, location, income level, interests, lifestyle, and purchasing behavior to create detailed customer personas.
- Use market research data, customer surveys, and social media insights to gather information about your target audience and understand their preferences and behaviors.

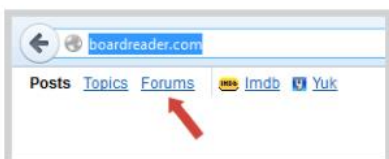

1.4. Explore Online Forums and Communities:

- Identify online forums and communities where your target audience gathers to discuss topics related to your niche. Hunt for forums, discussion boards, and social media groups frequented by your ideal customers.
- Utilize search strings like "keyword + forums" or "keyword + community" to unearth relevant online forums and communities within your niche.
- Dive into forum discussions, questions, and topics to glean valuable insights into your audience's interests, challenges, and preferences.
- Make note of recurring themes, questions, and pain points discussed by community members as inspiration for niche topics and keyword research.

1

First, click on “forums” in the top left corner of the screen:

2

Then, enter a keyword and hit “search”:

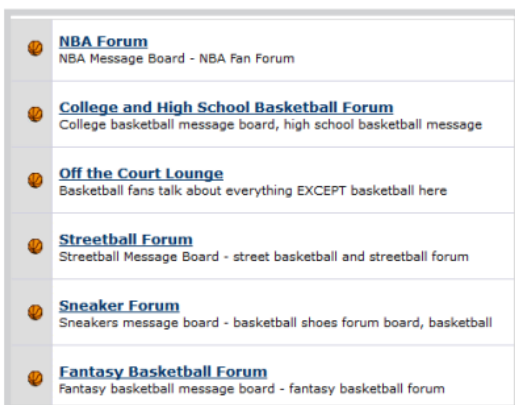

3

Find forums that your target audience hangs out on:

4

Once you find a forum, note how the forum is divided up into sections: Each of these sections is often a Niche Topic.

5

To dig deeper, check out some of the threads on the forum to find other Niche Markets your ideal customer belongs to.

**** Note: Either signup to boardreader or use any other website to get you nicher topic, like**

Thus, we have found few niche topics in such a short span. Let's add the founded niche topic to the list like Basketball socks, Basketball confidence, Basketball accessories, EuroLeague, FIBA and so on.

1.5. Leverage Wikipedia for Niche Insights:

- Harness the power of Wikipedia to explore niche topics and gain a comprehensive understanding of your industry or niche.
- Search for broad keywords or topics pertinent to your niche on Wikipedia to access detailed articles and curated content.
- Explore the "Contents" section of Wikipedia articles to uncover subtopics, categories, and related subjects within your niche.
- Navigate through internal links within Wikipedia articles to explore additional niche possibilities and specialized areas within your niche.
- Here are some clear steps to find niche using wikipedia

1

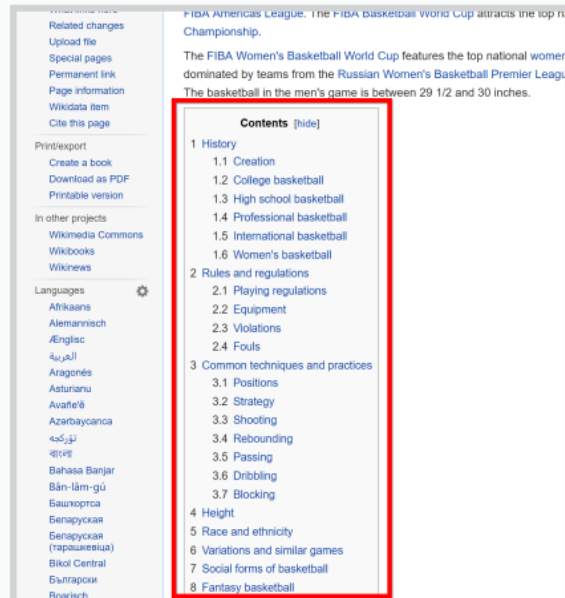

First, head over to Wikipedia and type in a broad keyword:

That will take you to the Wikipedia entry for that broad topic.

2

Then, look for the "contents" section of the page:

3

And take a look at the sections of the page.

Some of these sections will be killer Niche Topics that you may not have found otherwise:

- 2 Rules and regulations
 - 2.1 Playing regulations
 - 2.2 Equipment
 - 2.3 Violations
 - 2.4 Fouls
- 3 Common techniques and practices
 - 3.1 Positions
 - 3.2 Strategy
 - 3.3 Shooting
 - 3.4 Rebounding
 - 3.5 Passing
 - 3.6 Dribbling
 - 3.7 Blocking
- 4 Height
- 5 Variations and similar games
- 6 Social forms of basketball

4

You can also click on some of the internal links on the page to check out the Table of Contents of other, closely related entries.

For example, on the basketball entry we have a link to Rebounding:

5

When you click on that link, you'll notice that the table of contents for the Rebounding page has even more Niche Topics that you can add to your list:

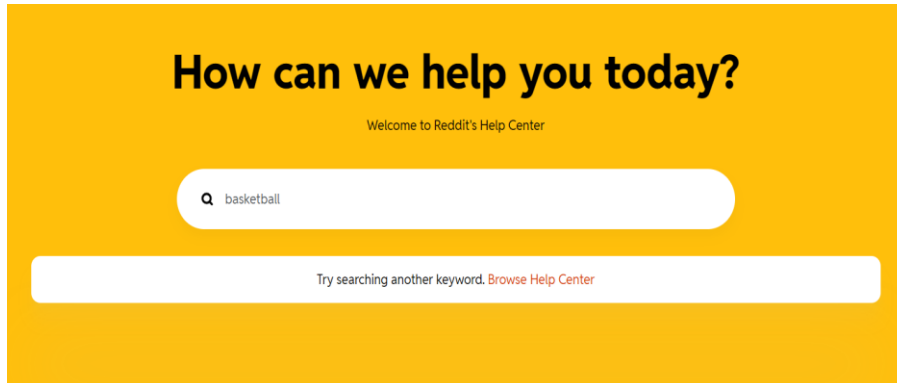

- Contents** [hide]
- 1 Types of rebounds
 - 2 Boxing out
 - 3 Statistics
 - 4 Notable rebounders in the NBA
 - 5 See also
 - 6 References
 - 7 External links

In this case we found three more Niche Topics: Types of rebounds (offensive, defensive), Boxing out, Notable NBA rebounders.

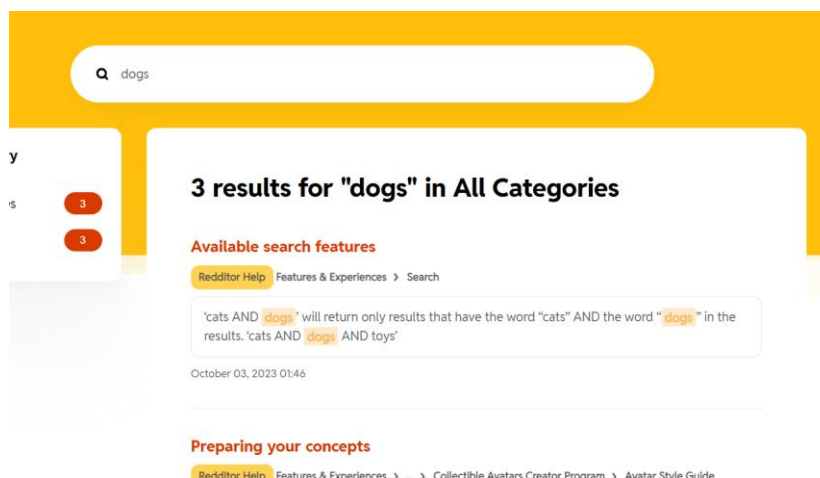

1.6. Tap into Reddit Communities for In-Depth Insights:

- Identify relevant subreddits and communities on Reddit where your target audience actively engages in discussions and shares content related to your niche.
- Utilize Reddit's search function to find subreddits and threads related to your niche using broad keywords or topics.
- Delve into popular threads, discussions, and comments within relevant subreddits to gain profound insights into your audience's interests, preferences, and pain points.
- Take note of recurring topics, questions, and discussions indicating areas of interest or concern within your niche.
- Compile a comprehensive list of niche topics and keywords derived from Reddit communities, focusing on resonant topics aligned with your audience's preferences and business objectives.

- As we find basketball on reddit, no results are found. But lets find something else

- Choose a subreddit where your audience is likely to hang out in:

- Then, keep an eye out for threads that have lots of comments, like this:

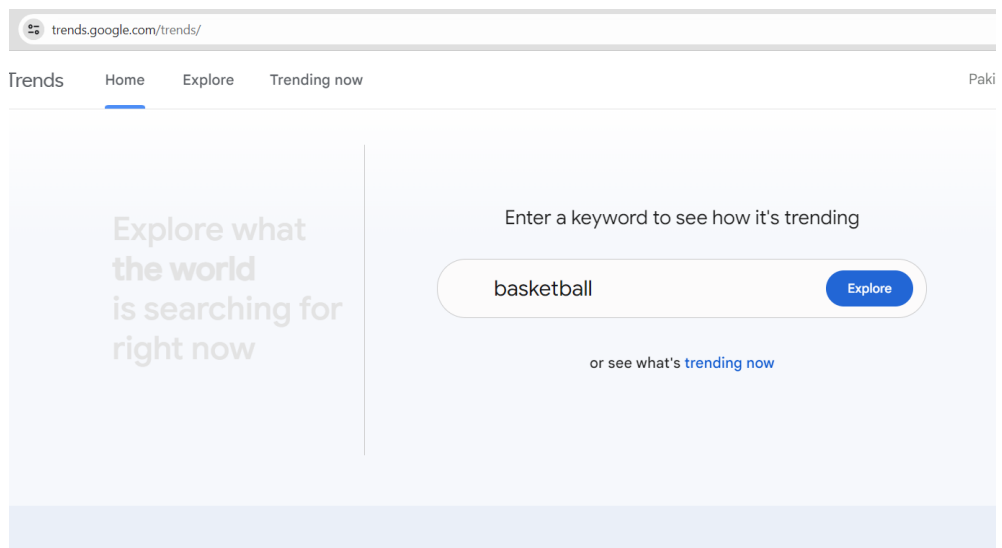

In this case, you'd add "dog food allergies" to your Niche Topic list.

So finally we have got a list of our niche topics.

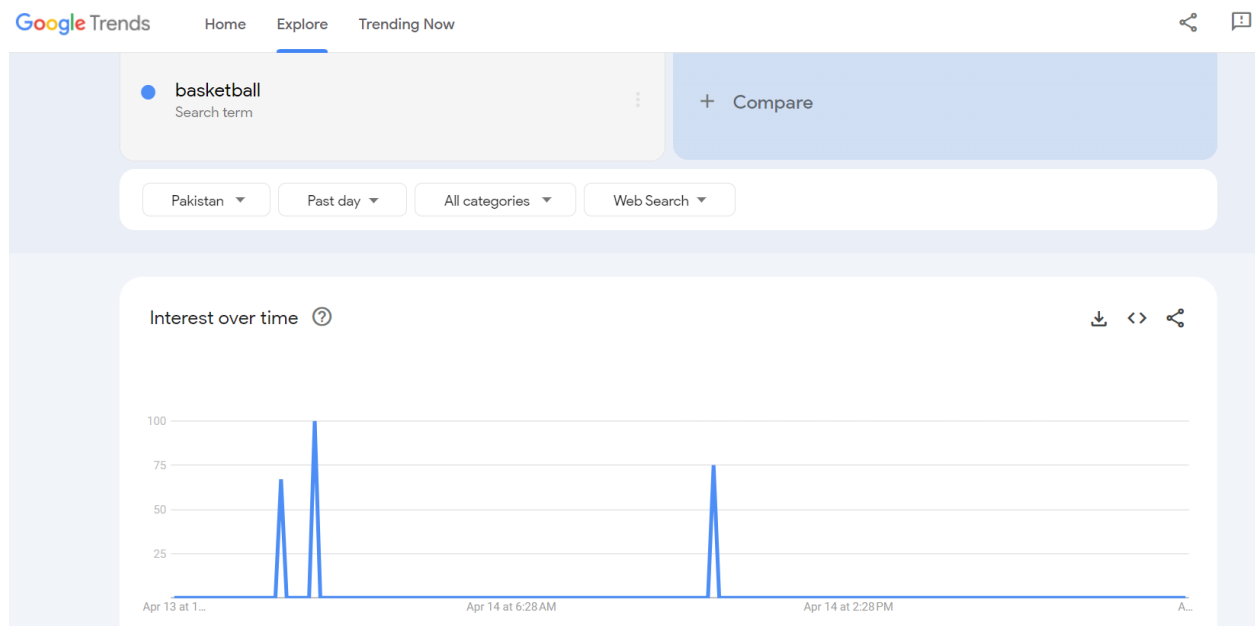

2. Explore Related Search Terms with Google Trends:

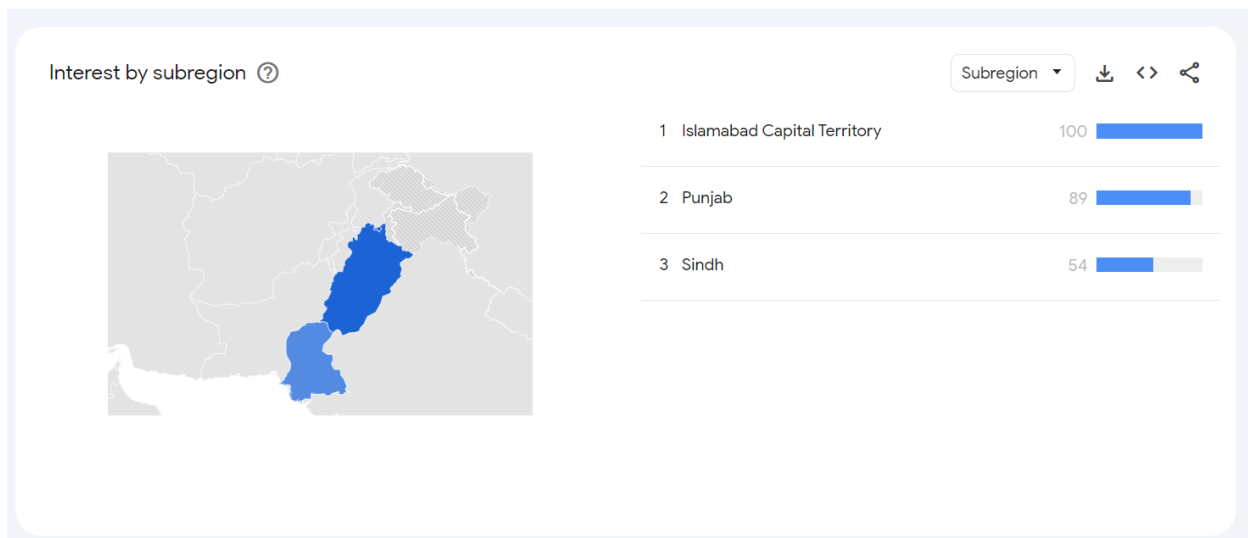

Once we have found our niche, lets explore the related search terms and for that:

- Visit Google Trends (<https://trends.google.com/trends/>) and enter your niche-related keywords into the search bar.

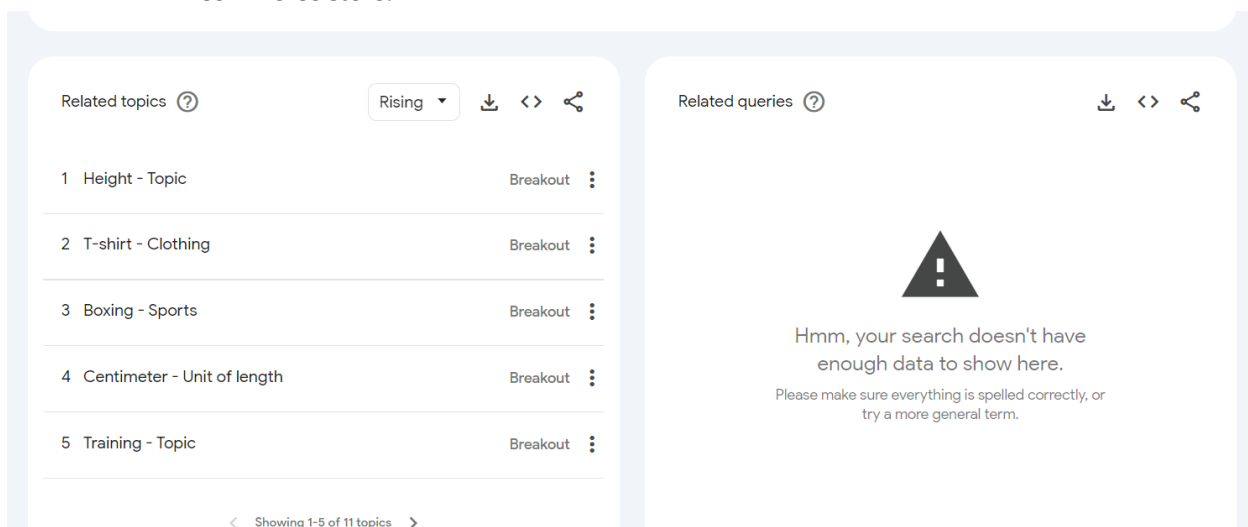

- Analyze the trend graphs to identify any seasonal or trending patterns within your niche. This information can help you understand when your products might be in higher demand.

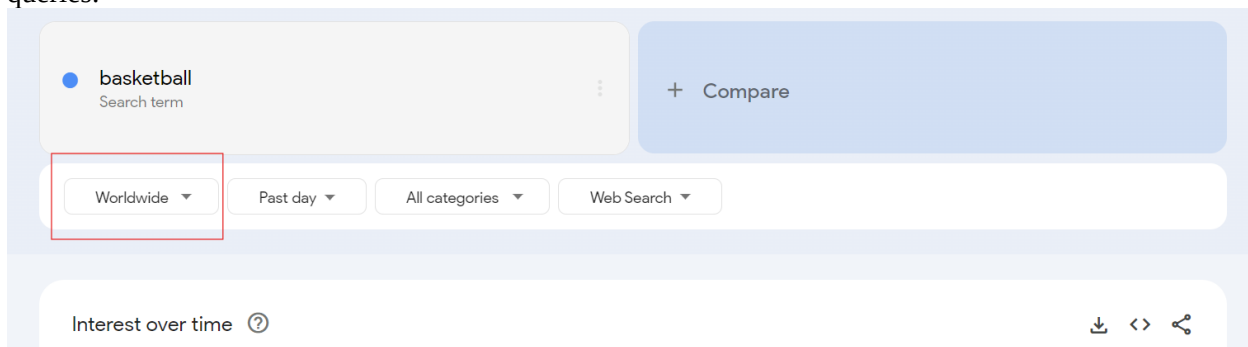

- Explore the "Related queries" section to discover additional search terms that are frequently associated with your niche. Take note of these terms as potential keywords for your E-commerce store.

For Pakistan, there are no results in related queries. Let's switch to worldwide and recheck the related queries.

Related topics ?	Rising	↓	<>	↔

3. Generate Long-Tail Keywords with Keywordtool.io:

- Access Keywordtool.io (<https://keywordtool.io/>) and enter your main keyword or phrase (e.g., "basketball rules") into the search bar.

☐ adidas basketball ball	50,000	50%	1,000	1,000
☐ aba basketball ball	50,000	50%	1,000	1,000
☐ anta basketball ball	50,000	50%	1,000	1,000
☐ air jordan basketball ball	50,000	50%	1,000	1,000
☐ animated basketball ball	50,000	50%	1,000	1,000
☐ amazon basketball ball	50,000	50%	1,000	1,000
☐ airless basketball ball	50,000	50%	1,000	1,000
☐ air pressure basketball ball	50,000	50%	1,000	1,000
☐ all about basketball ball	50,000	50%	1,000	1,000
☐ basketball ball bag	50,000	50%	1,000	1,000
☐ basketball ball brothers	50,000	50%	1,000	1,000
☐ basketball ball brands	50,000	50%	1,000	1,000

4. Categorize Keywords Based on Search Intent:

- Analyze the keywords generated from both Google Trends and Keywordtool.io, paying attention to their search intent.
- Identify keywords that indicate informational intent, such as "basketball dribbling techniques" or "Basketball rules and regulations." These keywords are suitable for content creation and educational materials.
- Look for keywords suggesting transactional intent, such as "buy basketball ball online" or "purchase NBA tickets" These keywords are ideal for product pages and promotional campaigns aimed at driving sales.

☐ basketball tickets england	50,000	50%	1,000	1,000
☐ basketball tickets europe	50,000	50%	1,000	1,000
☐ basketball tickets essex	50,000	50%	1,000	1,000
☐ basketball edinburgh tickets	50,000	50%	1,000	1,000
☐ basketball exit ticket	50,000	50%	1,000	1,000
☐ marquette basketball ticket exchange	50,000	50%	1,000	1,000
☐ duke basketball ticket exchange	50,000	50%	1,000	1,000
☐ uk basketball ticket exchange	50,000	50%	1,000	1,000
☐ ecu basketball tickets	50,000	50%	1,000	1,000
☐ etsu basketball tickets	50,000	50%	1,000	1,000
☐ elon basketball tickets	50,000	50%	1,000	1,000
☐ eku basketball tickets	50,000	50%	1,000	1,000
☐ ewu basketball tickets	50,000	50%	1,000	1,000
☐ elder basketball tickets	50,000	50%	1,000	1,000
☐ ecu women's basketball tickets	50,000	50%	1,000	1,000

5. Create a Keyword List:

- Compile a comprehensive list of relevant keywords categorized by search intent (informational or transactional).
- Aim to include a mix of broad and long-tail keywords to capture different stages of the customer journey.
- Prioritize keywords with high search volume and low competition, as well as those directly related to your E-commerce store niche.
- Regularly review and update your keyword list based on changes in market trends, customer preferences, and competitor strategies. Continuously refining your keyword strategy will help optimize your E-commerce store's visibility and attract targeted traffic.

Activity 2 Improve webpage titles and meta descriptions

In this activity, you will create titles and meta descriptions for two webpages in an online store.

Scenario: Founders' Dairy is a specialty foods retailer located in Burlington, Vermont, USA. They began as a small farm in 1873, selling milk and cheeses to their local community. Since then, they have grown to include several brick-and-mortar shops, as well as an online store that ships nationwide. Founders' Dairy sells a range of cheeses, jams, meats, syrups, and baked goods. They are especially well-known for their smoked cheddar cheeses and small-batch maple syrup.

You're part of the digital marketing team that's helping Founders' improve their search engine optimization (SEO). As part of these efforts, you're updating the page titles and meta descriptions to better reflect the content of each webpage. You'll begin by making recommendations for two pages: the product page for buying cheeses online and a page of recipes that use Founders' products.

Step 2: Review the title and meta description for Page 1

Review the current title and meta description for **Page 1 (Cheeses)**. Then examine the URL and page summary. Consider how you can use this information to improve the existing title and description.

Note: Founders' Dairy is a fictional company and the URL in the template will not work.

Step 3: Write a new title for Page 1

Write a new title that more accurately reflects the content of the page. Enter your title under **Recommendations for Page 1**.

Your title should be brief and make sense when read. It can include elements like the name of the website or business or its main offerings.

Step 4: Write a new meta description for Page 1

Write a 1–2 sentence meta description to accompany your new page title. Enter your new meta description under **Recommendations for Page 1**.

This description should accurately summarize the page content. It should read naturally and interest users who might encounter the page through a search.

Step 5: Write a new title and meta description for Page 2

Repeat **Steps 2-3** for **Page 2 (Recipes)**. Remember that each page should have a unique title and description that reflects its content.

Be sure to **address the following elements** in your completed titles and meta descriptions:

- The new titles accurately reflect the website URL and page content.
- The new meta descriptions accurately summarize content of each page.

Page 1 (Cheeses)

Current title: Founders' Cheeses
Current meta description: Shop specialty cheeses today.

URL: <https://www.foundersdairy.com> > products > cheeses

Page summary: This is the main product page where customers can purchase a selection of Founders' hand-crafted cheeses. It lists a selection of mozzarella, Swiss, goat, and blue cheeses made using traditional methods. It also highlights their best-selling smoked cheddars and includes listings for products (crackers, jams, etc.) that pair well with the cheeses on the page.

Recommendations for Page 1 (Cheeses)

New title:
New meta description:

Page 2 (Recipes)

Current title: Recipes Founders' Dairy
Current meta description: Try our tasty recipes.

URL: <https://www.foundersdairy.com> > family recipes

Page summary: This page contains links to recipes that use Founders' cheeses, jams, meats, and syrups. Customers can access a variety of recipes for appetizers, soups, entrees, and desserts. The page includes time-honored recipes from the Founders family, like macaroni and cheese and jam-filled sandwich cookies.

Recommendations for Page 2 (Recipes)

New title:
New meta description:

Activity 3: On-Page Optimization Jungle Gym

Objective

The objective of this lab is to optimize product pages on your WordPress website for both search engines and user experience using the Yoast SEO plugin.

Outcome

By the end of this lab, you will have:

- Analyzed existing product pages using the Yoast SEO plugin.
- Identified areas for improvement in title tags, meta descriptions, and image optimization.
- Rewritten product descriptions focusing on chosen keywords and user readability.
- Optimized internal linking by adding relevant product categories and related product links.
- Created SEO-friendly product pages that are optimized for search engines and improve user engagement.

Tools

- Yoast SEO Plugin for WordPress (<https://yoast.com/research/real-time-content-analysis/>)

Activity

1. Install Yoast SEO Plugin

- Navigate to your WordPress dashboard by logging into your website's admin panel.
- Once logged in, locate the "Plugins" tab on the left-hand sidebar and click on "Add New."
- In the search bar at the top right corner, type in "Yoast SEO" and press Enter.
- The Yoast SEO plugin should appear in the search results. Click on the "Install Now" button next to the Yoast SEO plugin.
- Once the installation is complete, click on the "Activate" button to activate the Yoast SEO plugin on your WordPress website.

2. Analyze Existing Product Pages

- Access your WordPress dashboard and navigate to the product pages you want to optimize.
- Open each product page in the editor.
- Scroll down to the Yoast SEO section at the bottom of the page editor.
- Use the Yoast SEO analysis tool to assess the current optimization level of each product page.

3. Identify Areas for Improvement

- Review the feedback provided by Yoast SEO for each product page.
- Pay attention to areas such as title tags, meta descriptions, and image optimization (including alt text).
- Identify any issues or opportunities for improvement highlighted by the Yoast SEO analysis.
- Example: Let's say the title tag of a product page is currently "Basketball Shoes" but Yoast SEO recommends including the brand name for better optimization. You can update the title tag to "Nike Basketball Shoes" to improve SEO.

4. Rewrite Product Descriptions

- Based on the chosen keywords and user readability, rewrite the product descriptions for each page.
- Ensure that the descriptions are clear, concise, and informative, incorporating relevant keywords naturally.
- Aim to provide valuable information to potential customers while also optimizing for search engines.
- Example: If a product description for basketball shoes lacks detailed information about features, benefits, and materials, rewrite it to include specific details such as shoe size availability, material composition, and performance features.

5. Optimize Internal Linking

- Evaluate the internal linking structure of your website.
- Identify relevant product categories and related product pages that can be linked from each product page.
- Add internal links to product category pages, related products, or other relevant pages within your website.

Example: Identify relevant product categories such as "Basketball Shoes," "Basketballs," and "Basketball Accessories." Link product pages to their respective category pages to improve navigation and SEO.

Graded Lab Task:

Keyword Research Lab Tasks

Task 1: Niche Exploration

- Objective: Explore potential niche topics within your industry or area of interest.
- Instructions:
 - Brainstorm different niches based on your interests, hobbies, and expertise.
 - Consider potential niches aligned with your skills and target audience.
 - List at least three potential niche topics for further investigation.

Task 2: Buyer Persona Creation

- Objective: Develop detailed buyer personas representing your target audience.
- Instructions:
 - Craft persona profiles for distinct segments of your target audience.
 - Include demographic characteristics, preferences, and pain points.
 - Use hypothetical scenarios or research data to create realistic personas.

Task 3: Wikipedia Research

- Objective: Gain insights into niche topics and industry dynamics using Wikipedia.
- Instructions:
 - Search for broad keywords or topics related to your niche on Wikipedia.
 - Explore articles and subtopics within your niche.
 - Note any relevant information or subtopics that could inspire keyword ideas.

Task 4: Reddit Community Analysis

- Objective: Analyze relevant subreddits and communities on Reddit to understand audience interests.
- Instructions:
 - Search for subreddits related to your niche on Reddit.
 - Explore popular threads and discussions within these subreddits.
 - Note recurring topics or discussions that indicate audience interests.

Task 5: Long-Tail Keyword Generation

- Objective: Generate long-tail keywords relevant to your niche using keyword research tools.
- Instructions:
 - Use tools like Keywordtool.io to generate long-tail keyword suggestions.
 - Consider variations of main keywords and specific product types.
 - Focus on keywords with moderate search volume and low competition.

Task 6: Keyword List Compilation

- Objective: Compile a list of relevant keywords for your E-commerce store.
- Instructions:
 - Prioritize keywords that align with your niche and target audience.
 - Include a mix of broad and long-tail keywords targeting different stages of the customer journey.
 - Regularly review and update the keyword list based on market trends and competitor strategies.

Lab 09

Search Engine Marketing (SEM) with Google Ads

Objective:

To gain practical experience in setting up SEM campaigns using Google Ads.

Activity Outcomes:

After this lab, the students should be able to

1. Apply practical skills in setting up and managing basic pay-per-click (PPC) advertising campaigns on Google Ads platform.
2. Write compelling ad copies for advertisement campaigns.
3. Perform competitive analysis, to be able to help businesses succeed in SEM and SEO fields by identifying area of improvement and differentiation targeting.

Instructor Note:

As pre-lab activity, visit and read [Google Ads – Get customers and sell more with online advertising](#) to get a good understanding of what different ad campaigns are, and what are the different requirements of different campaigns set for your required goal.

1) Useful Concepts:

Search Engine Marketing (SEM)

Search Engine Marketing (SEM) is a digital marketing strategy that involves promoting websites by increasing their visibility in search engine results pages (SERPs) through paid advertising. SEM primarily revolves around paid search advertising, commonly referred to as Pay-Per-Click (PPC) advertising.

In SEM, advertisers bid on keywords that users might enter into search engines like Google, Bing, or Yahoo when looking for certain products or services. When a user searches for a keyword that matches one of the advertiser's chosen keywords, the advertiser's ad may appear in the sponsored listings section of the search results page. Advertisers typically pay a certain amount each time their ad is clicked, hence the name Pay-Per-Click.

SEM allows advertisers to target specific keywords, demographics, geographic locations, and devices to reach their target audience effectively. It provides immediate visibility and can generate traffic and leads

quickly, making it a valuable strategy for businesses looking to increase their online presence and drive conversions.

Google Ads (formerly known as Google AdWords) is the most popular platform for SEM, but other search engines like Bing Ads also offer similar advertising options. Additionally, SEM can encompass other forms of paid advertising beyond search, such as display advertising, remarketing, and shopping ads, but its core focus remains on paid search advertising.

General steps involved when setting up an ads campaign in Google Ads are as followed:

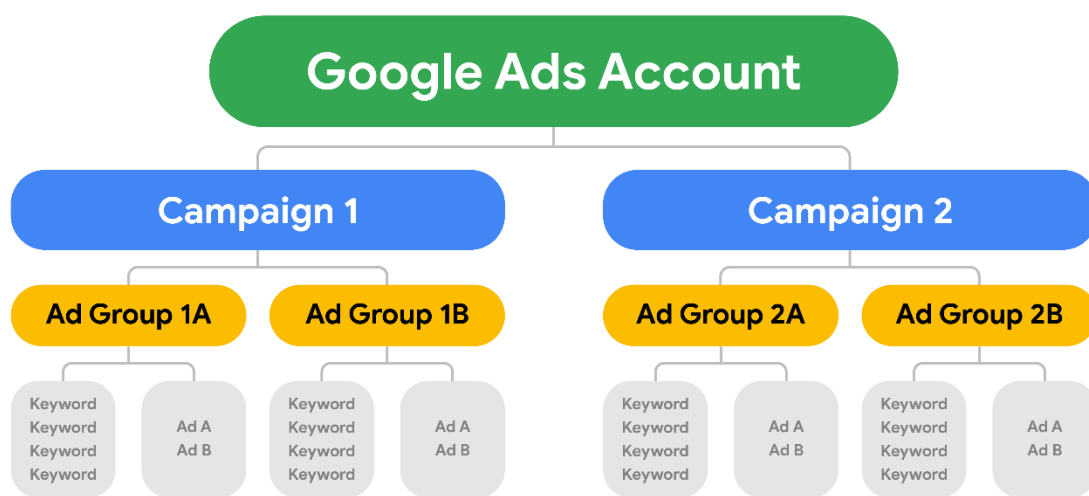

1. **Set Goals:** Define clear and measurable goals for your Google Ads campaign, such as increasing website traffic, generating leads, or boosting sales.
2. **Keyword Research:** Conduct keyword research to identify relevant search terms that your target audience is likely to use when searching for your products or services.
3. **Create a Google Ads Account:** Sign up for a Google Ads account if you haven't already done so. Follow the prompts to set up your account and billing information.
4. **Campaign Creation:** Choose the campaign type based on your advertising goals (e.g., Search, Display, Video, Shopping). Select campaign settings such as budget, bidding strategy, target locations, and language targeting.
5. **Ad Group Creation:** Create ad groups within your campaign, each focusing on a specific theme or set of keywords. Choose relevant keywords for each ad group and organize them into ad groups based on similarity.
6. **Ad Creation:** Write compelling ad copy that includes relevant keywords and a clear call-to-action. Use ad extensions (e.g., sitelinks, callouts) to provide additional information and improve ad visibility.
7. **Set Bids and Budgets:** Set bids for your keywords based on your budget and advertising goals. Monitor bids regularly and adjust them as needed to maintain competitive ad positions.
8. **Targeting and Audience Selection:** Define your target audience based on demographics, interests, and behaviours. Use targeting options such as location targeting, device targeting, and audience targeting to reach the right audience.
9. **Tracking and Conversion Tracking:** Set up conversion tracking to measure the effectiveness of your ads in driving desired actions (e.g., purchases, form submissions). Use Google Analytics or other tracking tools to monitor website traffic and user behaviour.
10. **Optimization:** Regularly monitor your campaign performance and key metrics such as click-through rate (CTR), conversion rate, and return on investment (ROI). Make data-driven optimizations based on performance insights, such as adjusting bids, refining ad copy, and optimizing landing pages.
11. **Testing:** Conduct A/B tests to compare different ad variations, bidding strategies, and targeting options. Test new keywords, ad creatives, and landing pages to improve campaign performance over time.
12. **Continuous Monitoring and Maintenance:** Monitor your Google Ads account regularly to identify any issues or opportunities for improvement. Stay informed about changes to Google Ads policies, features, and best practices to ensure your campaigns remain effective and compliant.

By following these steps and continuously refining your approach based on performance data and insights, you can create successful Google Ads campaigns that help you achieve your advertising goals.

Google Ads Account Structure

Google Ads uses a hierarchical structure with three main layers:

1. **Account:** This is the top level, representing your entire Google Ads account. It houses your business information, billing details, and overall campaign settings.
2. **Campaigns:** Campaigns are the foundation of your advertising efforts. Each campaign has a specific objective, such as driving website traffic, generating leads, or increasing sales. You can have multiple campaigns within a single account, each targeting different goals or audience segments.
3. **Ad Groups:** Within each campaign, you'll create ad groups. Ad groups organize related keywords and ad copy. For instance, you might have separate ad groups for "men's sneakers," "women's boots," and "discount running shoes" within a campaign promoting your shoe store.

Bidding Strategies

In Google Ads, bidding strategies determine how much you're willing to pay for each click on your ad. Choosing the right strategy depends on your advertising goals and budget. Here's a breakdown of the main bidding strategies in Google Ads:

Automated Bidding Strategies:

These strategies allow Google Ads to automatically set your bids based on your campaign goals and real-time auction data. They're a good option for beginners or when you have a large number of keywords to manage.

- **Maximize Clicks:** This strategy prioritizes getting you the most website clicks within your daily budget. It's suitable for campaigns focused on driving traffic to your website.
- **Maximize Conversions:** This strategy focuses on getting you the most conversions (sales, leads) for your set budget. It's ideal for campaigns where online sales or lead generation are the primary goals.

- **Target CPA:** This strategy allows you to set a target cost-per-acquisition (CPA), and Google Ads automatically sets bids to acquire conversions as close to your target CPA as possible. It's beneficial for campaigns with a clear conversion value and budget focus on acquiring customers at a specific cost.

Manual Bidding Strategies:

These strategies give you more control over your bids, allowing you to set them manually for each keyword or ad group. They require more ongoing management but can be beneficial for experienced users with specific bidding goals.

- **Enhanced CPC (ECPC):** This allows you to set maximum bids with automated adjustments based on Google's estimates of conversion likelihood. It can be a good option for balancing control with some automation.
- **Manual CPC (CPC):** This gives you complete control over the maximum amount you're willing to pay for each click. It requires close monitoring and adjustments based on campaign performance and is ideal for experienced users comfortable managing bids directly.

Choosing the Right Bidding Strategy:

The best bidding strategy for you depends on your specific goals and campaign type. Here's a general guideline:

- **For beginners or driving website traffic:** Start with "Maximize Clicks" to gain initial insights and website visitors.
- **For conversion-focused campaigns:** Use "Maximize Conversions" or "Target CPA" depending on whether you have a set budget or target cost per acquisition.
- **For experienced users with control preference:** Consider "Enhanced CPC" or "Manual CPC" for more granular control over bids.

Additional Bidding Considerations:

- **Quality Score:** Remember, your Quality Score (relevance of your ads and keywords) can significantly impact your cost-per-click. A high Quality Score can lead to lower costs even with automated bidding.
- **Budget Management:** Set a realistic budget for your campaign and consider adjusting your bidding strategy or budget based on performance.
- **Bid Adjustments:** Utilize bid adjustments to fine-tune your bidding for specific devices, locations, or times of day where you see better performance.

Components of Quality Score:

While Google doesn't reveal the exact formula, Quality Score is generally considered to be a combination of three main factors:

1. **Expected Click-Through Rate (CTR):** This estimates the likelihood that people will click on your ad when it's shown in search results. Google considers factors like the relevance of your ad copy to the search query and historical performance of similar ads.

2. **Ad Relevance:** This assesses how well your ad text matches the intent behind the user's search query. Google analyzes your keywords, ad headlines, and descriptions to see if they accurately reflect what users are searching for.
3. **Landing Page Experience:** This evaluates the quality and relevance of the landing page that users reach after clicking on your ad. Google considers factors like the page's content, mobile-friendliness, loading speed, and overall user experience.

Quality Score Grades:

Quality Score is displayed on a scale from 1 (lowest) to 10 (highest). Here's a general guideline for interpreting these grades:

- **9-10:** Excellent - Your ads, keywords, and landing page are highly relevant, likely resulting in a lower cost-per-click and higher ad rank.
- **7-8:** Above Average - Good performance, but there's still room for improvement.
- **5-6:** Average - Your ads might be moderately relevant, but there could be optimizations to enhance click-through rate and ad rank.
- **3-4:** Below Average - There's significant room for improvement in relevance or user experience. Consider revising your ad copy or landing page content.
- **1-2:** Poor - Your ads or landing page might not be very relevant to user searches, potentially leading to higher costs and lower visibility.

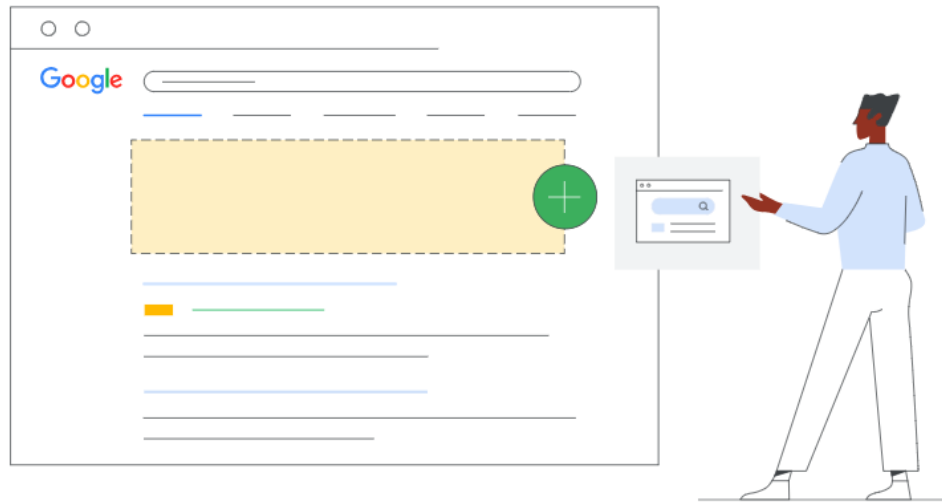

A Fictional Business

For this lab you can consider a fictional business named ShoeEmporium which is an online shoe store offering a diverse range of footwear for men, women, and children. Operating primarily through its user-friendly e-commerce website, the store provides reliable shipping and delivery services to customers worldwide. With a focus on excellent customer service, ShoeEmporium prioritizes responsiveness and personalized recommendations. Marketing efforts encompass various channels, including SEM, SEO, social media, and email marketing, to attract and engage customers. Efficient inventory management, strong branding, and a commitment to ethical and sustainable practices underscore ShoeEmporium's dedication to providing quality products while continuously seeking opportunities for growth and expansion in the competitive online retail market.

2) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
<i>1</i>	<i>45 mins</i>	<i>Medium</i>	<i>CLO5</i>
<i>2</i>	<i>30 mins</i>	<i>Medium</i>	<i>CLO5</i>
<i>3</i>	<i>45 mins</i>	<i>High</i>	<i>CLO5</i>

Activity 1: Setup a Google Ads campaign (Search)

Task 1: Create a Google Ads account

Step 1: Open a web browser and navigate to the Google Ads website: <https://ads.google.com/home/>.

Step 2: On the homepage, you'll see a prominent button labelled "Start Now" or "Sign up now." Click on this button to initiate the account creation process.

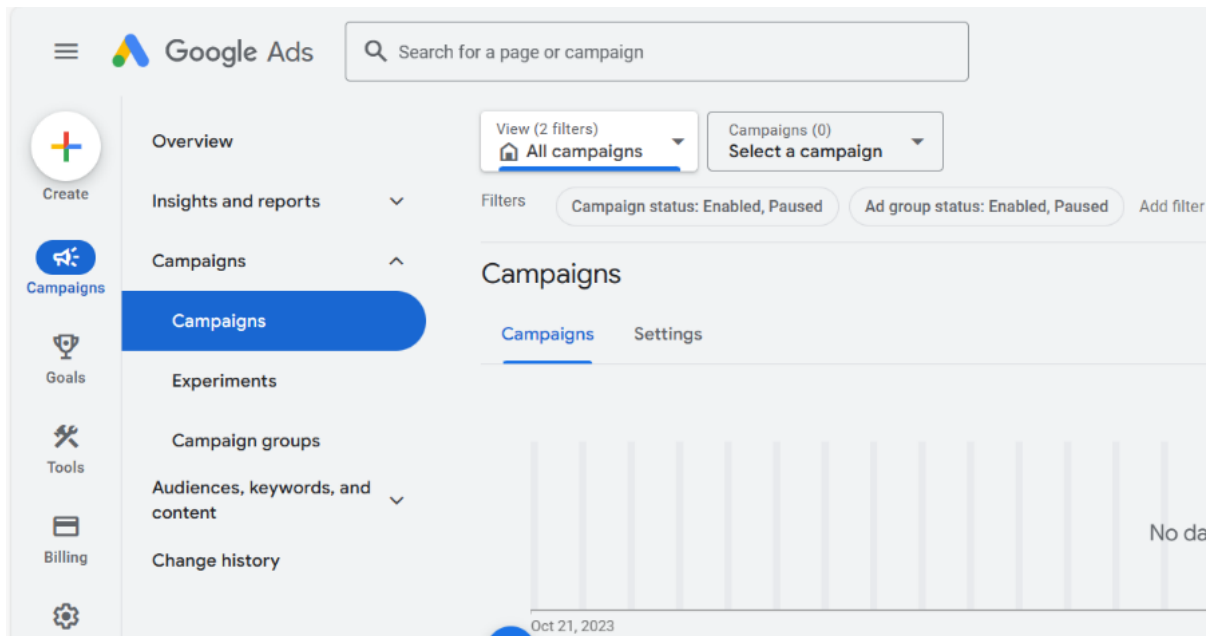

Step 3: Campaign Goal Selection: Google Ads will ask you about your advertising goals. Choose the option that best aligns with your objectives. Common options include "Get more website visitors," "Get more calls," or "Increase sales."

Step 4: Business Information: Enter your business information, including your business name and website URL.

Step 5: Billing Setup: Provide your billing information for your Google Ads account. You can choose from various payment methods like credit card or debit card.

Task 2: Setup a new Google Ads Campaign

Step1: Click on the "+" button to create a new campaign.

Step 2: Select the goal of your campaign. For ShoeEmporium, let's choose "Website traffic."

What's your campaign objective?

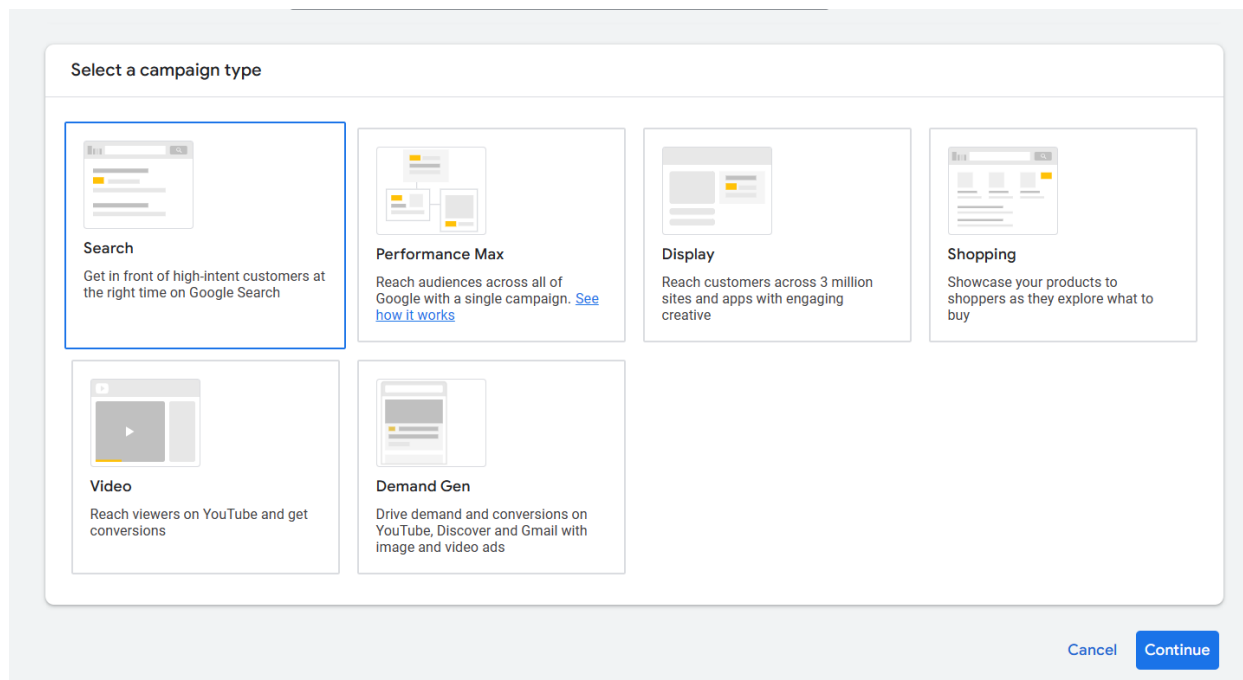

Choose your objective

Select an objective to tailor your experience to the goals and settings that will work best for your campaign

Sales Drive sales online, in app, by phone, or in store	Leads Get leads and other conversions by encouraging customers to take action	Website traffic Get the right people to visit your website	App promotion Get more installs, engagement and pre-registration for your app
Awareness and consideration Reach a broad audience and build interest in your products or brand	Local store visits and promotions Drive visits to local stores, including restaurants and dealerships.	Create a campaign without a goal's guidance Choose a campaign type first, without a recommendation based on your objective.	

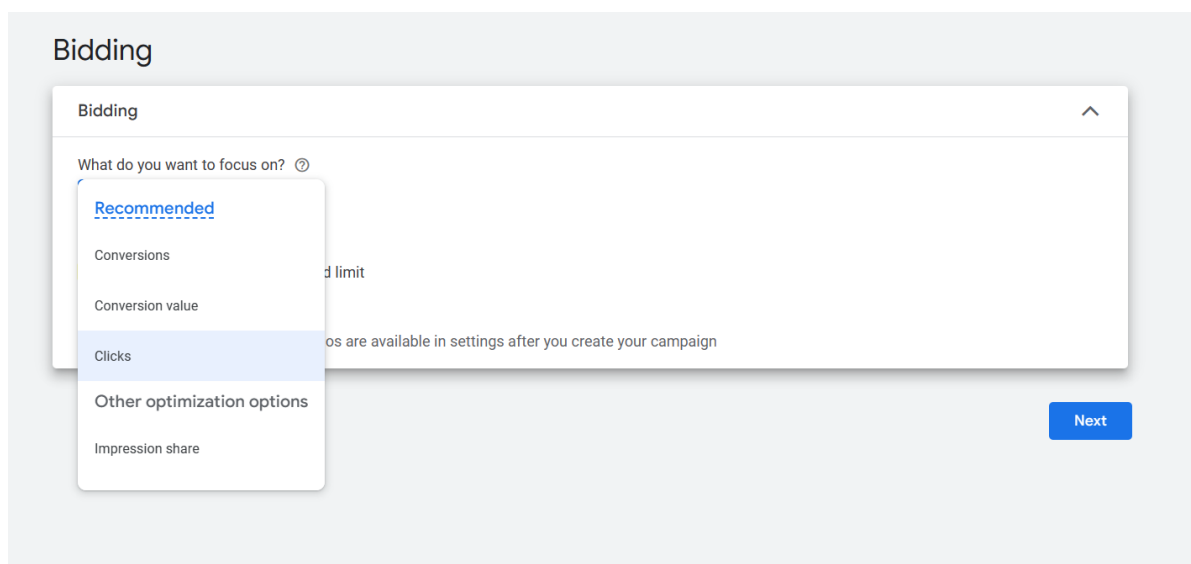

Cancel Continue

Step 3: Choose Campaign Type: Select the campaign type. In this case, we'll choose "Search" since we want our ads to appear on Google Search results pages.

Step 4: Campaign Settings

- Name your campaign. For example, "ShoeEmporium_SearchCampaign."
- Set your budget. Let's say we'll start with a daily budget of \$50.
- Choose your bidding strategy. For now, let's use "Maximize Clicks" to drive as much traffic as possible within our budget.

- Select the start and end dates for your campaign, or leave it open-ended.

- Choose the locations where you want your ads to be shown. Since ShoeEmporium is targeting men's shoes, we might select locations where our target audience is located.

Locations

Select locations to target

☐ All countries and territories
 ☐ Pakistan
 ☒ Enter another location

Targeted locations (2)

Islamabad, Islamabad Capital Territory, Pakistan city	Reach 7,650,000	
Rawalpindi, Punjab, Pakistan city	2,840,000	

[Advanced search](#)

For example, a country, city, region, or postal code

Location options

Target

☒ Presence or interest: People in, regularly in, or who've shown interest in your targeted locations (recommended)
 ☐ Presence: People in or regularly in your targeted locations

- You can narrow down your reach by specifying audience segments to want to target.

Task 3: Create ad groups and assign associated keywords

Step 1: Create Ad Groups, Click on "Create ad group."

Step 2: Name your ad group. Let's name it "Men's Dress Shoes."

Step 3: Add your keywords related to men's dress shoes to this ad group.

Step 4: Set your default bid for this ad group. You can adjust this later based on performance.

Men's Dress Shoes ✎

Keywords

Get keyword suggestions (optional)

Google Ads can find keywords for you by scanning a web page or seeing what's working for similar products or services

Enter a URL to scan for keywords

Enter products or services to advertise

Enter keywords

Keywords are words or phrases that are used to match your ads with the terms people are searching for

men's dress shoes

men's casual shoes

men's boots

men's sneakers

men's loafers

men's sandals

men's athletic shoes

men's running shoes

men's formal shoes

men's work shoes

Match types help control which searches can trigger your ads

keyword = Broad match "keyword" = Phrase match [keyword] = Exact match [Learn more](#)

Get help creating your ad BETA ✕

I can help you create headlines and descriptions at any time. For example you can tell me more about your business or ask me to focus on a particular product or service you offer.

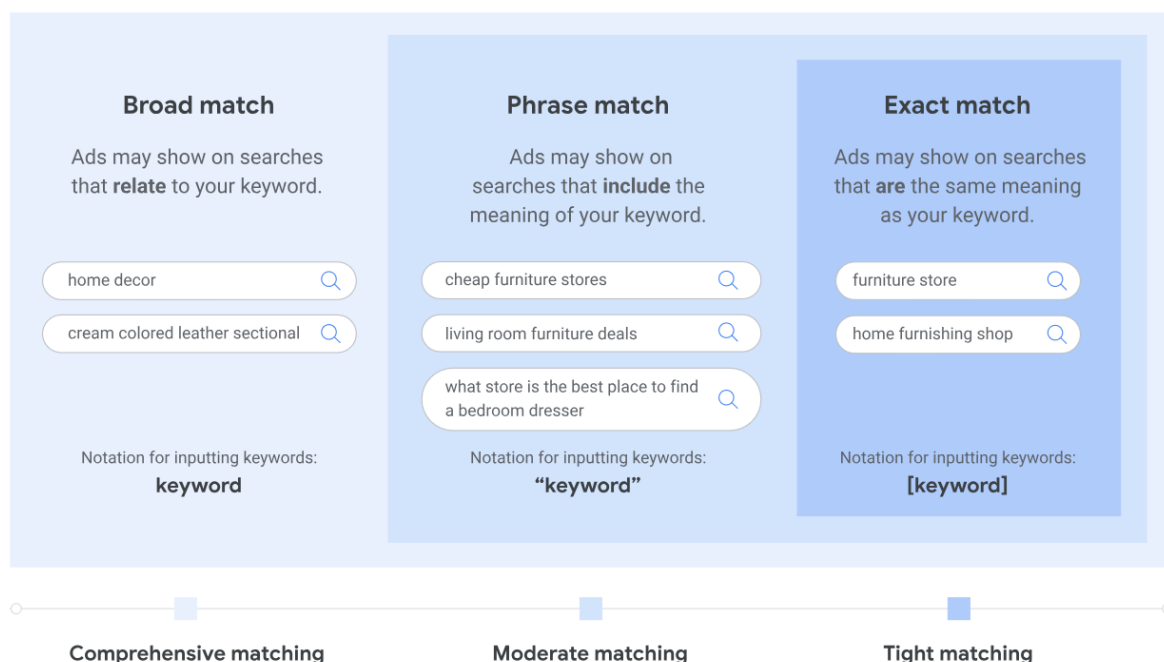

Type message

Keywords are words or phrases that are used to match ads with the terms people are searching for. The keyword match types dictate how closely the keyword needs to match with the user's search query so that the ad can be considered for the auction. For example, you could use broad match to serve your ad on a wider variety of user searches or you could use exact match to hone in on specific user searches.

Keyword Match Types

For the keyword **Furniture store**, we can match the following queries () 🔍

per match type

Task 4: Create text ads for your campaign

Step 1: Write Ad Copy

Craft compelling ad copy that highlights the benefits and features of men's dress shoes from ShoeEmporium. Ensure that your ad copy includes relevant keywords and a clear call-to-action.

- Example Ad Copy:
 - Headline: "Shop Stylish Men's Dress Shoes"
 - Description Line 1: "Discover our latest collection of men's dress shoes."
 - Description Line 2: "Find the perfect pair for any occasion. Shop now!"
 - Final URL: Enter the URL of the landing page where users will be directed when they click on your ad.

The screenshot shows the Google Ads campaign setup interface for text ads. At the top, there's a navigation bar with a back arrow, a forward arrow, and the text "Start by adding at least 5 headlines". To the right of this bar is a section for "Ad strength" with a circular progress indicator and the word "Incomplete". Further right are four radio button options: "Add headlines" (with a "View ideas" link), "Include popular keywords" (selected, with a "View ideas" link), "Make headlines unique" (with a "View ideas" link), and "Make descriptions unique" (with a "View ideas" link).

The main content area is divided into two columns. The left column contains three sections: "Final URL" with a text input field and a note "This will be used to suggest headlines and descriptions"; "Display path" with a text input field containing "www.example.com" and two sub-input fields for path segments, each with a "0 / 15" character count; and "Headlines 3/15" with a note "For optimal ad performance, include these keywords in your headlines" and a list of four keywords: "men's athletic shoes", "men's sandals", "men's loafers", and "men's sneakers", each preceded by a green checkmark.

The right column is titled "Preview" and features a "Highlight ad" toggle switch. Below the title is a preview of a sponsored ad. The ad shows a blue "Sponsored" label, a small icon, the URL "www.example.com/", and the headline "sandles for summer season - men's athletic shoes - casual shoes". Below the headline are two lines of description text: "Description 1." and "Description 2.". At the bottom of the preview section, there is a disclaimer: "This preview shows potential ads assembled using your assets. Not all combinations are shown. Assets can be shown in any order, so make sure that they make sense individually or in combination, and don't violate our policies or local law. Some shortening may also occur in some formats. You can make sure certain text appears in your ad. [Learn more](#)".

Headline

People are most likely to notice your headline text, so consider including words that people may have entered in their Google search. Your text ad consists of three headlines where you can enter up to 30 characters each to promote your product or service. The headlines are separated by a vertical pipe ("|") and may show differently based on the device someone is using when they view your ad.

Display URL

The display URL, usually in green, shows your website address. This display URL is made up of the domain from your [final URL](#) and the text in the optional ["Path" fields](#). These fields are designed to help people who see your ad get a better sense of where they'll be taken when they click it. Your path text doesn't have to match the exact language of your display URL.

Description

Use the description fields to highlight details about your product or service. It's a good idea to include a "call to action"—the action you want your customer to take. If you're an online shoe store, your description might include "Shop now" or "Buy shoes now." If you offer a service, you might want to add something like "Get an instant quote online" or "See pricing."

Length limits

Field	Max length
Headline 1	30 characters
Headline 2	30 characters
Headline 3	30 characters
Description	190 characters
Description	290 characters
Path (2)	15 characters each

In expanded text ads, the length limits are the same across all languages. Each character in double-width languages like Korean, Japanese, or Chinese counts as two towards the limit instead of one.

Step 2: Utilize Ad Extensions

Enhance your ads with ad extensions to provide additional information and improve ad visibility.

- Add sitelink extensions to direct users to specific pages on your website, such as "Shop Men's Dress Shoes" or "Free Shipping."
- Include callout extensions to highlight unique selling points or promotions, such as "Wide Selection" or "24/7 Customer Support."

Step 3: Preview and Save

- Review your ad to ensure accuracy and relevance.
- Use the preview tool to see how your ad will appear on different devices and platforms.
- Once you're satisfied with your ad, click "Save" or "Save and Continue" to publish it.

Task 5: Setting your daily budget

Budget

Select the average you want to spend each day.

☐ PKR11,149.35

☒ PKR9,282.64 Recommended

Average daily budget

Weekly clicks	Avg. CPC	Weekly cost
5,172	PKR12.56	PKR64,978.51

Recommended because of your campaign settings, such as bidding, targeting, keywords and ads, as well as the budgets of similar advertisers.

☐ PKR7,424.29

☐ Set custom budget

For the month, you won't pay more than your daily budget times the average number of days in a month. Some days you might spend less than your daily budget, and on others you might spend up to twice as much. [Learn more](#)

Next

After you select the budget, your campaign is ready to be published.

Networks	Search partners, Display Network
Locations	Islamabad, Rawalpindi

Activity 2: Create a google ads ‘Display Campaign’

Step 1. Sign in to your Google ads account:

- If you don't have one already, create a Google Ads account by visiting <https://ads.google.com/home/>.

Step 2. Create a New Campaign:

- Click the "+" button and select "New Campaign."
- Choose a campaign goal that aligns with your objectives. Common display ad goals include **brand awareness, website traffic, or lead generation**.

Step 3. Select Campaign Type:

- Under "Campaign type," choose "**Display Network**" to focus on reaching people across websites and apps.

Step 4. Define Your Targeting Settings:

- **Targeting:** Here, you define who sees your ads. You can target by demographics (age, gender, income), interests, browsing habits, life events, and placements (specific websites or mobile apps). Utilize audience insights from Google to understand your target audience better.
- **Keywords:** While display ads rely less on keywords than search ads, you can still include relevant keywords to help refine who sees your ads.
- **Content Targeting:** Target websites or apps that your target audience frequents.

Example Targeting:

Demographics: They target adults aged 25-55 with an interest in baking, cooking, or desserts.

Locations: They target their city and surrounding areas.

Content Targeting: They target websites and apps related to food, recipes, and local businesses.

Step 5. Create Your Display Ads:

- Google Ads offers different ad formats for display campaigns, including responsive display ads, image ads, and video ads.
 - **Responsive Display Ads:** These are the most versatile and recommended format. You provide Google with various headlines, descriptions, and images, and they automatically generate different ad combinations to fit various ad spaces.
 - **Image Ads:** Create visually appealing image ads using pre-designed templates or upload your own images. Ensure they adhere to Google's image ad specifications.
 - **Video Ads:** Consider using video ads for a more engaging display format. You can upload your own video ads or create them using online tools.
- **Creating a Responsive display ad:**

You can create multiple headlines and descriptions to be rendered in your responsive display ads. You can upload multiple versions of the following:

- A short headline (at least 1, or up to 5 headlines, of 30 characters or fewer). The short headline is the first line of your ad (if you have not included promotional text for dynamic display ads). Short headlines may appear with or without your description. [Learn more about responsive display ads best practices](#)
- A long headline (90 characters or fewer).
- A description (at least 1, or up to 5 descriptions). The description adds to the headline and invites people to take action.
- A business name. This is the name of your business or brand. Ensure your company name is spelled and capitalized correctly, as your ad will contain exactly what you provide.
- A final URL. This is where people will go when they click on your ad.
- (Optional) Go to **Ad URL options** to add tracking or custom parameters to your URL.
- (Optional) Go to **More options** and select **Call to action text**. From the drop-down menus, select the call to action text and the language for the call to action text.
- (Optional for dynamic responsive ads) Add promotion text (for example, “Free two-day shipping”) and a price prefix. This is a great asset to take advantage of because it can improve engagement with your ad. To use promotion text, click **More options**, check the box beside “Dynamic ad options”, and add your promotion text.
 - Here are some best practices for promotion text:
 - Be specific about your offer. “30% off all school supplies” is better than “30% off”.
 - Avoid overhyping your offer. ALL CAPS and excessive punctuation may turn off users.
 - Avoid repetition. Promotional text should never repeat your brand name.
 - Effective messages: New product announcements, sweepstakes, in-store deals, flash sales.

- Many users are very sensitive to price related text. Sales or price related promotions usually have better performance than a company slogan.
 - Promotion text is not supposed to last for a long time, for example, more than 6 months. If you would like to always display some text (for example, a company slogan) to users, a short headline would be more suitable.
- Recommendations about Responsive Display Ads:

Text

	Type	Maximum length	Quantity	Required
	Headlines	30 characters	1-5 headlines	✓
	Long headline	90 characters	1 headline	✓
	Descriptions	90 characters	1-5 descriptions	✓
	Business name	25 characters	1 name	✓
	Call to action	Automated	1 call to action	✓

Images

	Ratio	Recommended size	Quantity	Required
	Landscape 1.91:1	1200 x 628 pixels (min 600 x 314 pixels)	1-15 images Recommended: 5	✓
	Logo 1:1	1200 x 1200 pixels (min 128 x 128 pixels)	1-5 images Recommended: 1	✓
	Logo 4:1	1200 x 300 pixels (min 512 x 128 pixels)	1-5 images Recommended: 1	✗
	Square 1:1	600 x 600 pixels (min 300 x 300 pixels)	1-15 images Recommended: 5	✓

Videos

	Ratio	Recommended length	Quantity	Required
	Landscape 16:9	Any Preferred: 30 seconds	1-5 videos Recommended: 2	×
	Square 1:1	Any Preferred: 30 seconds	1-5 videos Recommended: 2	×
	Vertical 2:3	Any Preferred: 30 seconds	1-5 videos Recommended: 2	×

Example:

Sugar Rush Bakery utilizes responsive display ads to showcase various mouthwatering pastries, cakes, and breads with headlines like "Indulge in Sweet Treats - Visit Sugar Rush Bakery" and "Freshly Baked Goodness - Local Bakery Near You."

6. Set Your Budget and Bidding Strategy:

- Determine your daily or total campaign budget based on your goals and comfort level.
- Choose a bidding strategy that aligns with your campaign goals. Options include manual bidding (setting your maximum CPC), automated bidding (letting Google optimize your bids based on conversion goals), or target CPA bidding (setting a target cost per acquisition).

Example: The bakery set a daily budget of \$20 considering their local reach goals. They choose "Maximize impressions" to prioritize showing their ads to the broadest possible audience within their target demographics and locations.

7. Launch Your Campaign:

- Once you've reviewed all your settings, targeting, ads, and budget, launch your campaign.

8. Monitor and Optimize:

- Track your campaign's performance using Google Ads reporting tools. Analyze metrics like impressions, clicks, conversions, and cost-per-acquisition (CPA) to see what's working and identify areas for improvement.
- A/B test different ad variations, targeting options, and bidding strategies to optimize your campaign for better results.

Activity 3: Off-page SEO techniques

This lab activity's focus is to enhance the visibility and authority of your WordPress website through off-page optimization techniques.

By the end of this lab activity, you will have:

- Implemented off-page optimization strategies to build backlinks and increase website authority.
- Enhanced brand awareness and credibility through strategic outreach and networking.
- Improved search engine rankings and organic traffic by leveraging external resources and platforms.

Tools

- Outreach email templates
- SEMrush Free Tools (<https://www.semrush.com/sem/>)
- Social media platforms
- Online directories and forums
- Guest blogging opportunities
- Influencer collaboration opportunities

On-Page SEO vs Off-Page SEO

On-Page SEO		Off-Page SEO
Site Content	External Linking	Link Building
Keywords	Images	Content Marketing
Title Tags	User Engagement	Local SEO
Meta Descriptions	Page Speed	Social Media
Headers	Featured Snippets	Influencer Marketing
URLs	Schema Markup	Public Relations
Internal Linking		Guest Posting
		Brand Mentions

Task 1: Research Backlink Opportunities:

- a. Identify authoritative websites and blogs in your niche using keyword research and industry analysis.

Finding authoritative blogs and websites in the Pakistani ecommerce space can be valuable for staying updated on industry trends, gaining insights, and networking. Here are some suggestions:

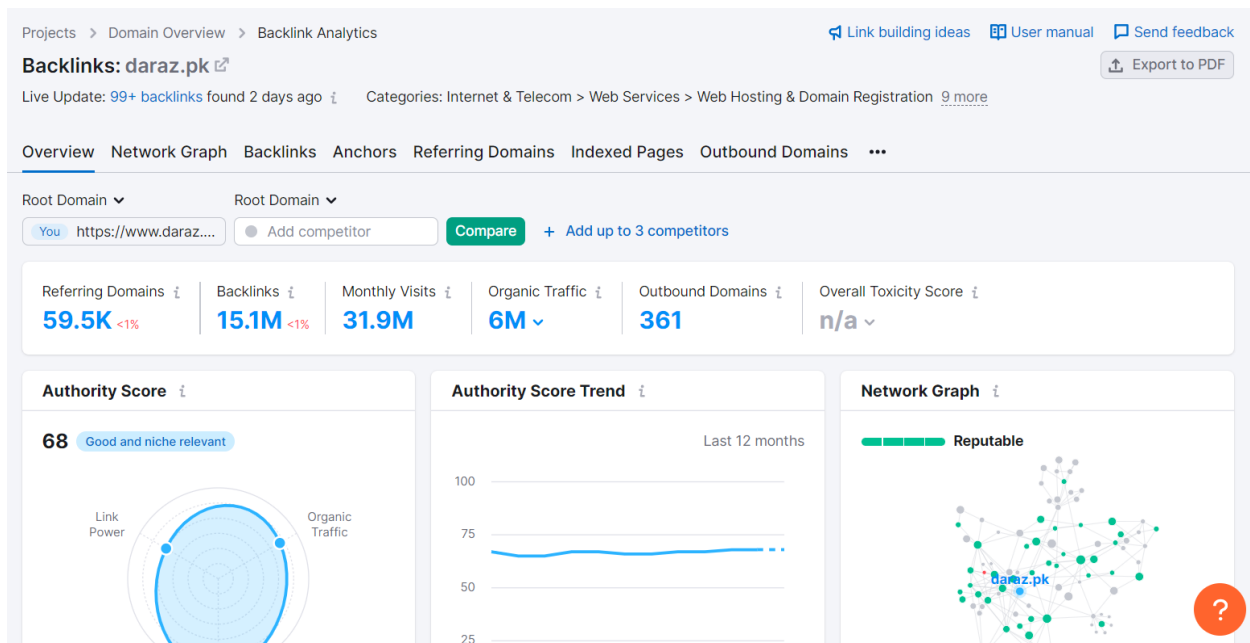

- ProPakistani.pk: While not solely focused on ecommerce, ProPakistani covers a wide range of topics including technology, startups, and ecommerce developments in Pakistan.
 - MoreNews.pk: This website often features news, articles, and insights related to ecommerce in Pakistan. It covers topics such as emerging trends, market analysis, and business strategies.
 - NetMag.pk: NetMag is a technology-focused platform that occasionally publishes articles and news related to ecommerce trends, startups, and digital marketing in Pakistan.
 - TechJuice.pk: While primarily focusing on technology news and startups, TechJuice also covers ecommerce developments, funding news, and success stories in the Pakistani market.
 - Parhlo.com: Parhlo covers a wide range of topics including business, technology, and ecommerce. It often features articles and opinion pieces on ecommerce trends and consumer behavior in Pakistan.
 - Dawn.com - Business Section: Dawn is one of Pakistan's leading newspapers, and its business section often covers ecommerce-related news, market analyses, and interviews with industry experts.
 - Jovago.pk Blog: Jovago is a Pakistani ecommerce platform focused on travel and hospitality. Their blog may offer insights into the ecommerce landscape, particularly within the travel and tourism sector.
 - Ecommerce.com.pk: This website focuses specifically on ecommerce in Pakistan, offering articles, guides, and news related to online retail, payment solutions, and entrepreneurship in the country.
- b. Utilize tools like Semrush, Ahrefs, or Moz to analyze competitors' backlink profiles and identify potential linking opportunities. Lets say go to any backlink analytical tool like (<https://www.semrush.com/analytics/backlinks/>).

Backlink Analytics

Quickly evaluate and compare link profiles in-depth, using the largest and most up-to-date backlink checker on the market.

Analyze

- c. Paste your website link and click on analyze button.

- d. From the menu bar, click on backlinks and you will find all the backlinks details.
- e. Explore industry-specific directories, forums, and community websites where you can contribute content or list your business.

Task 2: Broken Link Building:

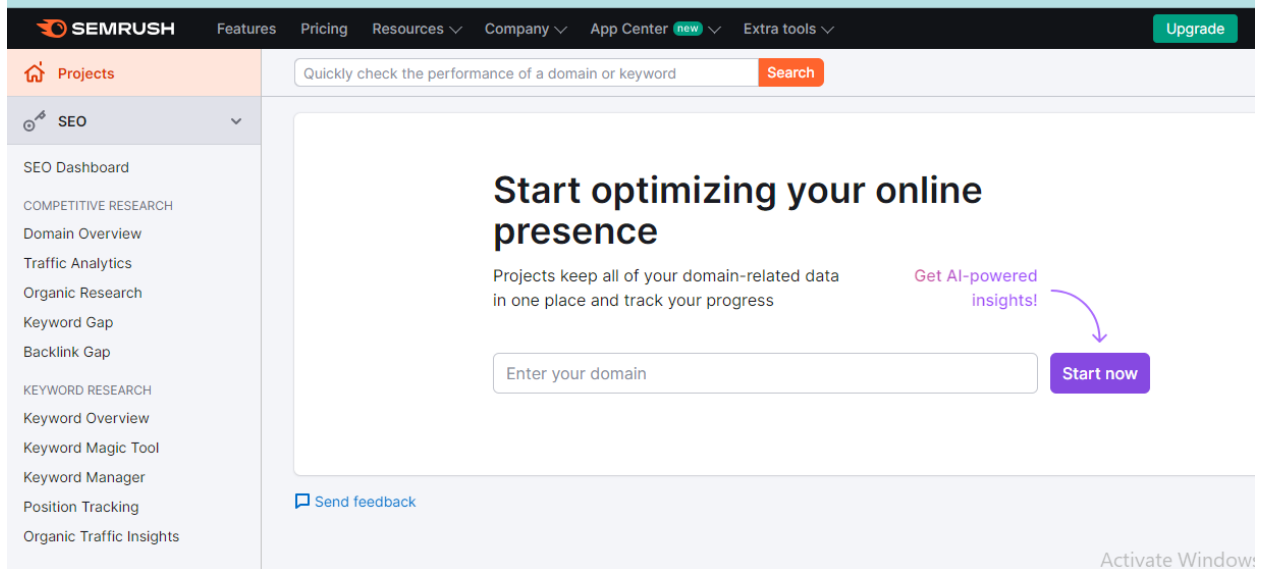

- a. Access Semrush's Backlink Analytics Tool:
- b. Log in to your Semrush account.
- c. Navigate to the main menu and click on "Backlink Analytics."

Backlink Analytics

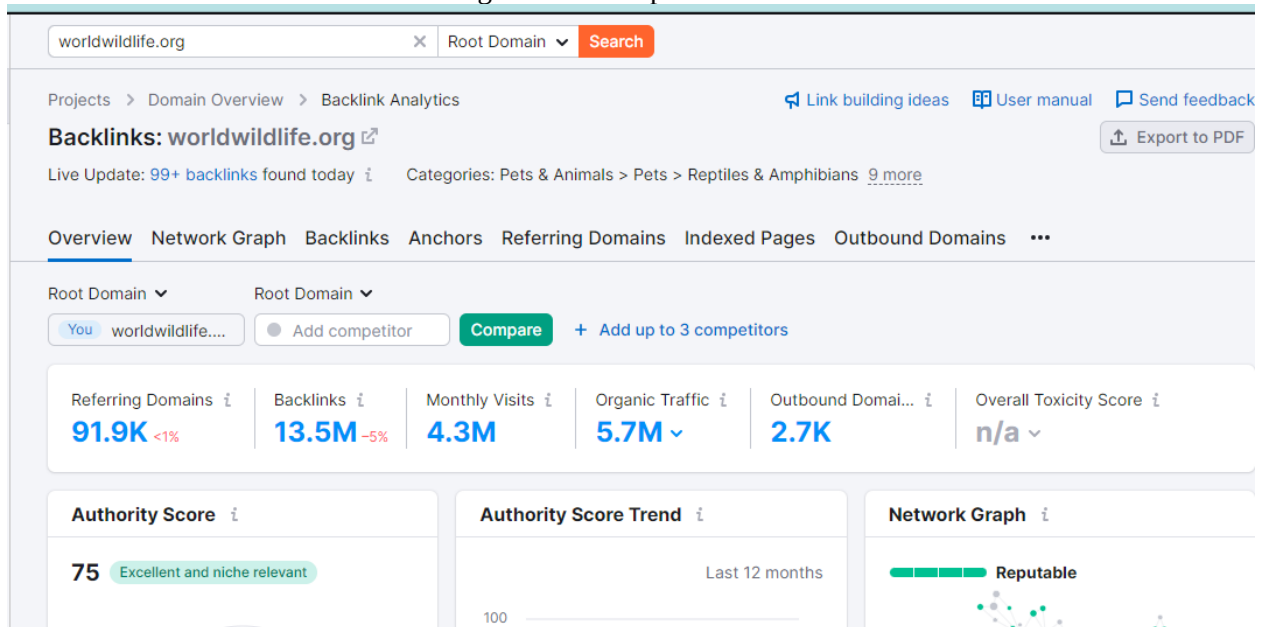

Quickly evaluate and compare link profiles in-depth, using the largest and most up-to-date backlink checker on the market.

Examples: worldwildlife.org <https://www.unicef.org/stories> travel.cnn.com

- d. Enter the Relevant Website URL:
- e. In the Backlink Analytics tool, enter the URL of a relevant website or domain that you want to analyze for broken backlinks.

f. Click on the "Search" button to generate the report.

g. Analyze the Backlink Report.

h. Once the report is generated, review the backlink data for the selected website. Look for any broken backlinks listed in the report. Broken backlinks are links that lead to pages that no longer exist or return a 404 error.

Overview	Network Graph	Backlinks	Anchor	Referring Domains	Indexed Pages	Competitors
Indexed Pages 1 - 100 (83,241)						
Broken Pages 1						
Title and URL	Backlinks	Domains	External Links			
Competitor.com - Compare mortgage, refinance, insu... https://www.competitor.com/real-estate/home-re... 404	3,250	615	9			
410 The page you tried was not found - Competitor	666	238	7			

i. Identify Replacement Content:

On your website, identify content that can serve as a valuable alternative to the broken links found in the backlink report. Ensure that the replacement content is relevant to the topic or niche of the broken links.

Backlinks 1 - 100 (1,425)									
All Active New Lost Time period All Follow Nofollow Sponsored UGC Links per ref. domain All 1 3 10 Link place... Ref. page plat... Ref. page lang... Mobile friendly p... Filter by title or URL Advanced filters

☐	13	Newgeography.com Economic, d... www.newgeography.com/frontpage?destination=frontpage%3Fpage%3D63&page=186 EN	52	126	Competitor www.competitor.com/research/housing-affordability/ Text Content	Nov 1, 2023	Nov 1, 2023		

j. Craft Outreach Message:

Prepare a personalized outreach message to send to the website owners or editors whose websites contain broken links.

In your message, politely inform them of the broken links on their website and offer your content as a replacement.

Highlight the benefits of your content and how it adds value to their website and their audience.

k. Reach Out to Website Owners/Editors:

Use the contact information available on the website, such as contact forms or email addresses, to reach out to the website owners or editors.

Send your outreach message to inform them about the broken links and suggest your content as a replacement.

Be courteous and professional in your communication, and avoid sounding too promotional.

l. Follow-Up:

Give the website owners or editors some time to respond to your outreach message.

If you haven't received a response after a reasonable amount of time (usually 1-2 weeks), consider sending a follow-up message as a gentle reminder.

m. Monitor Responses and Update Links:

Keep track of the responses you receive from website owners or editors.

If they agree to replace the broken links with your content, provide them with the necessary information, such as the URL of your content.

Once the links are updated, periodically check to ensure that they remain active and functional.

n. Repeat the Process:

Continue to identify broken backlinks on relevant websites using Semrush's Backlink Analytics tool.

Regularly update your outreach efforts and replacement content to maximize your success with broken link building.

Task 3: Unlinked Brand Mentions:

a. Set Up Brand Monitoring:

- Access the Brand Monitoring app within Semrush.
- Configure monitoring for your brand name and variations.

b. Review Mentions Without Backlinks:

- Navigate to the "Mentions" report.
- Apply filters to display mentions without backlinks.

c. Filter for Relevant Mentions:

- Further filter for mentions on news sites and blogs.
- Focus on recent articles with positive sentiment.

d. Identify Potential Opportunities:

Review the filtered mentions to identify relevant articles and publications.

e. Contact Publishers or Authors:

- Craft personalized messages requesting the addition of backlinks.
- Clearly explain the benefits of including backlinks.

Task 4: Journalist Requests:

- a. Set Up Monitoring: Use platforms like Connectivity or monitor hashtags like #JournoRequest on social media. Activate notifications for new journalist requests.

- b. Check Platforms Regularly: Review journalist requests daily or as often as possible.
- c. Evaluate Relevance: Read requests carefully and prioritize those relevant to your expertise or industry.
- d. Prepare Responses: Craft concise, personalized responses offering valuable insights or resources.
- e. Propose Backlink Inclusion: When suitable, suggest adding backlinks to your website in your response.
- f. Submit Responses: Send responses directly to journalists via the platform or provided contact method.

Activity 4: Competitive Analysis Challenge

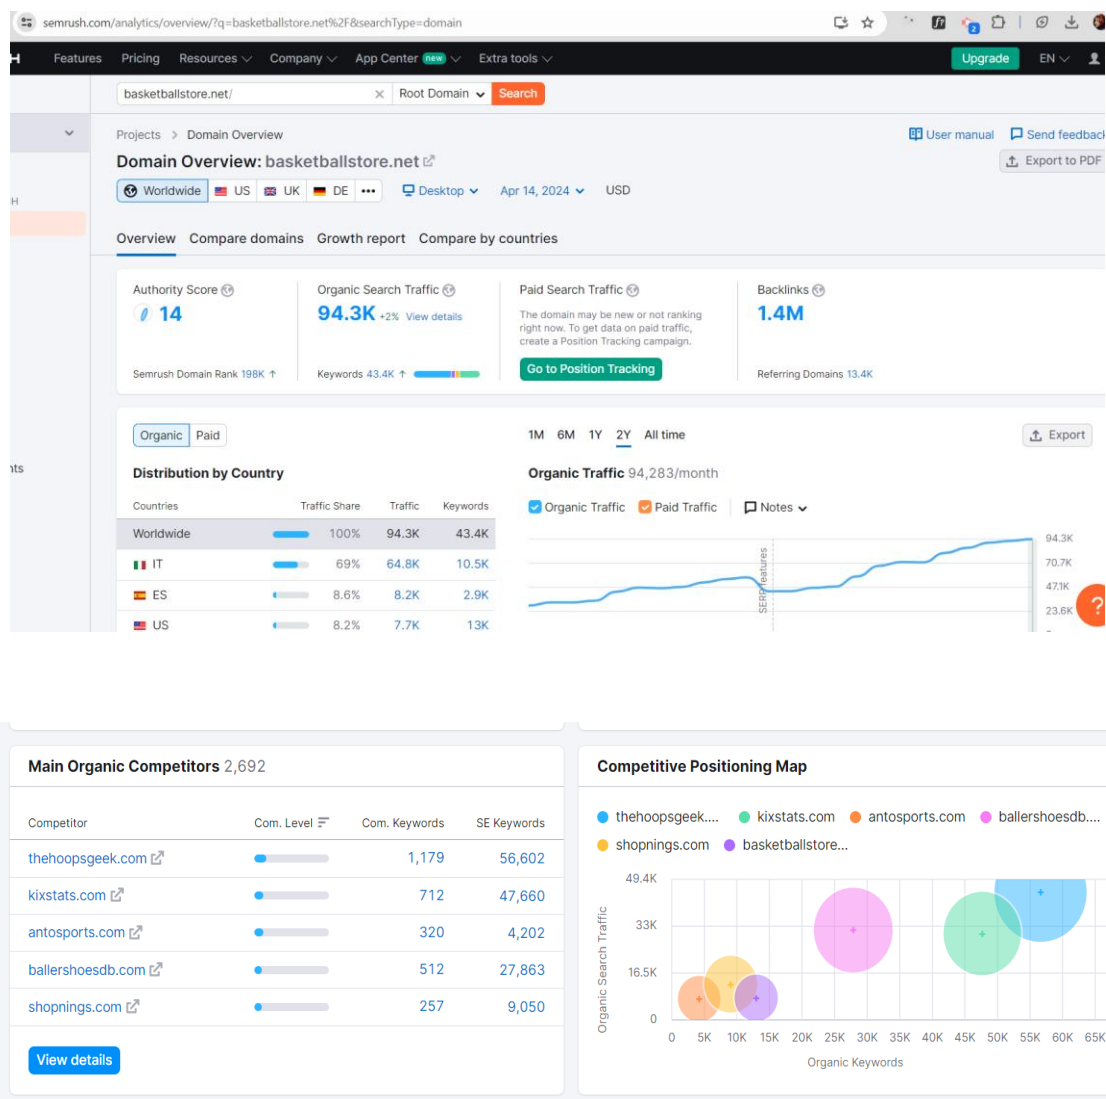

Focus of this activity is to understand SEO strategies of competitors and identify areas for differentiation.

Tools

- Similarweb (<https://www.similarweb.com/>),
- SEMrush Free Tools (<https://www.semrush.com/sem/>)

Task 1: Identify Competitors

- a. Use SEMrush to identify competitors within your industry or niche. Enter your own domain into SEMrush's Domain Overview tool and navigate to the "Competitors" section to view a list of websites that compete with yours for organic search visibility.
- b. For example: Enter "basketballstore.net" into SEMrush's **Domain Overview** tool and navigate to the "Competitors" section to view a list of websites that compete with Basketball store for organic search visibility. Potential competitors could include "HoopsGeeks" and "BallersChoice.com."

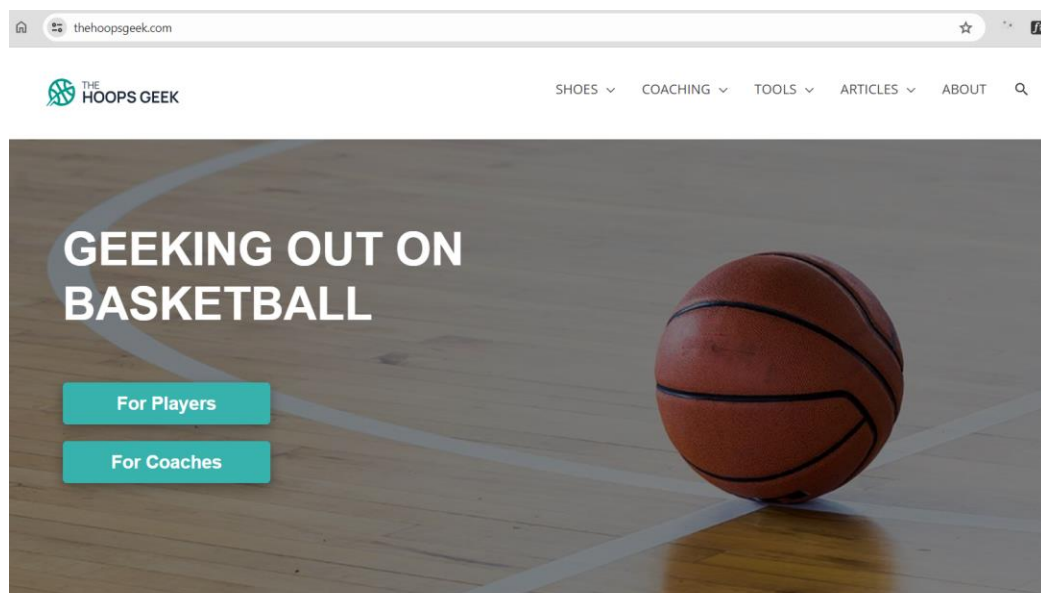

c. Compile a List of Competitors

Create a spreadsheet to list the domain names of your identified competitors. Include both direct competitors (those offering similar products/services) and indirect competitors (those targeting the same audience but offering different products/services). To see all the potential competitors, click on the View details button and you will be navigated to the detailed page of all main organic competitors.

Main Organic Competitors 2,692			
Competitor	Com. Level 	Com. Keywords	SE Keywords
thehoopsgeek.com 		1,179	56,602
kixstats.com 		712	47,660
antosports.com 		320	4,202
ballershoesdb.com 		512	27,863
shopnings.com 		257	9,050
View details 			

Task 2: Analyze Competitors' Websites

Use SEMrush's Site Audit tool to analyze the technical health of competitors' websites. Identify issues such as broken links, duplicate content, or crawl errors that may affect their SEO performance.

Assess On-Page Optimization: Utilize SEMrush's On-Page SEO Checker to analyze competitors' on-page optimization efforts. Evaluate elements such as title tags, meta descriptions, headings, and content quality. Identify areas where competitors are effectively targeting keywords and optimizing content.

Task 3: Conduct Keyword Analysis

Use SEMrush's Keyword Gap tool to compare the organic keywords of your website with those of your competitors. Identify keyword opportunities that competitors are ranking for but your website is not. Analyze keyword metrics such as search volume, keyword difficulty, and estimated traffic to prioritize opportunities.

Task 4: Examine Backlink Profile

Use SEMrush's Backlink Analytics tool to analyze the backlink profiles of competitors' websites. Identify their top referring domains, anchor text distribution, and link-building strategies. Look for opportunities to acquire high-quality backlinks from similar source.

Task 5: Evaluate Content Quality

Use SEMrush's Content Analyzer tool to assess the quality and relevance of competitors' content. Analyze metrics such as word count, readability, and engagement metrics (e.g., social shares, comments). Identify content gaps or topics where competitors are outperforming your content.

Task 6: Review Social Media Presence

Use SEMrush's Social Media Tracker to monitor competitors' social media profiles and activity. Analyze their follower growth, engagement rates, and content performance across various platforms. Identify trends, popular content types, and engagement tactics used by competitors.

Task 7: Identify Strengths and Weaknesses

Compile a list of strengths and weaknesses for each competitor based on your analysis. Identify areas where competitors excel, such as keyword targeting, content quality, or backlink acquisition. Also, identify areas where competitors are lacking or where you can outperform them.

Task 8: Develop Actionable Insights

Use the insights gained from your competitive analysis to inform your SEO strategy and tactics. Develop actionable recommendations to capitalise on competitor weaknesses, differentiate your offering, and improve your website's visibility, traffic, and conversion rates.

Task 9: Monitor and Iterate

Continuously monitor the SEO performance of both your website and your competitors. Use SEMrush's Position Tracking tool to track keyword rankings, organic traffic, and backlink profiles over time. Adjust your SEO strategy and tactics based on evolving market dynamics and competitor activities.

3) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1: Perform SEM Activities for a Local Bakery: "Sugar Rush Bakery"

Scenario: Sugar Rush Bakery is a local bakery in twin cities, specializing in handcrafted cakes, pastries, and gourmet breads. They want to attract new customers and increase online sales through Search Engine Marketing (SEM). Consider following SEM Activities to be performed:

1. **Campaign Setup and Goals:** Utilize Google Ads, the most popular platform for SEM campaigns. Define clear goals for your campaign. Common options for bakeries include:
 - **Website Traffic:** Increase website traffic to showcase your products and location.
 - **Online Orders:** Drive online orders for pickup or delivery.
 - **Brand Awareness:** Raise brand awareness and establish Sugar Rush Bakery in the local market.
2. **Keyword Research:** Identify relevant keywords people use to search for bakeries online. Here are some examples with a local focus:
 - **Broad:** "bakery near me," "bakery in islamabad"
 - **Specific:** "custom cakes," "gluten-free pastries "
 - **Long-tail:** "best birthday cake bakery "

Use keyword research tools like Google Keyword Planner or Ahrefs to analyze search volume and competition for these keywords. Consider including negative keywords to exclude irrelevant searches (e.g., "bakery jobs").

3. **Ad Groups and Targeting:**
 - **Ad Groups:** Organize keywords into logical groups based on themes (e.g., "Cakes," "Pastries," "Bread").
 - **Targeting:** Define your target audience by demographics (age, income), interests (baking, desserts), location (specific zip codes), and browsing habits.
 - **Local Targeting:** Since Sugar Rush Bakery is a local business, prioritize targeting options like location radius around your bakery or zip codes in your delivery area.
4. **Creating Compelling Ads:**
 - **Text Ads:** Craft clear and concise text ads that highlight your unique selling points (USPs). Include relevant keywords, a call to action (CTA), and your location (e.g., "Freshly Baked Treats - Sugar Rush Bakery - Order Online or Visit Us Today!").
 - **Ad Extensions:** Utilize ad extensions to provide additional information like your phone number, address, and link to your online ordering page. These can improve ad visibility and click-through rates (CTRs).
5. **Seasonality and Trend Integration:** Consider seasonality and adapt your SEM strategy accordingly. Consider holidays like Thanksgiving or Mother's Day, prioritize keywords and ad copy focused on special occasion cakes or gift baskets. On the contrary, integrate trending ingredients or flavors into your ad copy and landing pages to capitalize on current customer interests and potentially attract new customers.

6. **Bidding Strategy:** Choose a bidding strategy that aligns with your campaign goals.
 - **Manual Bidding:** Set your maximum cost-per-click (CPC) for each keyword. Requires more management but offers precise control over budget.
 - **Automated Bidding:** Utilize Google Ads automated bidding strategies like "Maximize Clicks" (focuses on driving website traffic) or "Target CPA" (focuses on acquiring conversions at a set cost).

Consider experimenting with different bidding strategies to see which ones work best for your campaign.

7. **Landing Page Optimization:** Ensure your website or landing page provides a positive user experience. It should be visually appealing, mobile-friendly, and easy to navigate. Landing pages should be relevant to your ads and encourage visitors to take the desired action (e.g., placing an order, visiting the bakery).
8. **Monitoring and Optimization (Optional):** Regularly monitor your campaign performance using Google Ads reporting tools. Analyze metrics like impressions, clicks, cost-per-click (CPC), conversion rate, and return on ad spend (ROAS). Based on data insights, optimize your campaigns by adjusting keywords, bids, ad copy, or landing pages to improve performance and achieve your goals. A/B testing different ad variations and targeting options can help you identify the most effective strategies.

By implementing these SEM activities and tasks, Sugar Rush Bakery can attract new customers online, increase online sales, and achieve their business goals. Remember, SEM is an ongoing process, so consistent monitoring, optimization, and adaptation are crucial for success. Your task is to setup this campaign for maximizing gains for the bakery.

Additional SEM Activities (Optional):

1. **In-depth Competitive Analysis:**

- **Identify Major Competitors:** Research and analyze the SEM strategies of top bakery competitors in the city.
- **Keyword Gap Analysis:** Utilize advanced keyword research tools to identify keywords competitors rank for but Sugar Rush Bakery doesn't. Consider competitor keywords with high search volume and moderate competition.
- **Landing Page Benchmarking:** Analyze competitor landing pages to understand their messaging, CTAs, and user experience. Identify areas where Sugar Rush Bakery can differentiate itself.

2. **Multi-Channel SEM Strategy:**

- **Google Ads:** Utilize a combination of Search Network campaigns targeting relevant keywords and Display Network campaigns to reach potential customers browsing recipe websites or food blogs.
- **Shopping Ads:** Showcase Sugar Rush Bakery's most popular cakes, pastries, and breads with high-quality images and enticing descriptions using Google Shopping Ads.
- **Local Services Ads (if available):** If Google Local Services Ads are available for bakeries in your region, consider running a campaign to highlight Sugar Rush Bakery's expertise and trustworthiness, potentially attracting high-intent customers searching for bakery services.

3. **Conversion Tracking and Attribution Modeling:**

Implement advanced conversion tracking to measure not just website visits but also valuable actions like online order completions or phone orders initiated from website clicks. Utilize data attribution models (e.g., data-driven attribution) to understand the role of different touchpoints (search ads, social media) in influencing conversions and optimize budget allocation accordingly.

4. **Remarketing and Customer Relationship Management (CRM):**

Create targeted remarketing campaigns to re-engage website visitors who abandoned their carts or showed interest in specific products. Offer them special promotions or personalized recommendations. Integrate your SEM campaigns with a CRM system to track customer interactions and tailor future marketing efforts based on purchase history and preferences.

5. **A/B Testing and Creative Optimization:**

Regularly conduct A/B tests for different ad variations, headlines, visuals, and landing page elements to identify the most effective combinations that drive conversions. Leverage Google Ads features like ad extensions and responsive search ads to create dynamic ad copy that adapts to user search queries and potentially improves ad relevance.

Lab Task 2: Competitive Analysis Challenge

In this SEO showdown, you'll delve into the world of competitive analysis to identify areas where your E-commerce store can outperform competitors and dominate the search engine rankings. Your task is to analyze the SEO strategies of three main competitors in your niche and identify opportunities for your store to gain a competitive edge. Tasks that need to be performed:

1. **Choose Your Competitors:** Select three main competitors in your niche. These could be direct competitors offering similar products or services, or indirect competitors targeting the same audience with different offerings.
2. **Analyze Their Websites:** Use SEMrush to analyze the websites of your chosen competitors. Pay attention to their on-page optimization, backlink profile, keyword targeting, and content quality.
3. **Identify Strengths and Weaknesses:** Compile a list of strengths and weaknesses for each competitor based on your analysis. What are they doing well, and where are they falling short?
4. **Spot Opportunities:** Look for opportunities where your E-commerce store can outperform competitors. This could include targeting niche keywords they're not focusing on, improving content quality, or acquiring high-quality backlinks from untapped sources.
5. **Develop Your Strategy:** Based on your analysis, develop a strategy to capitalize on competitor weaknesses and differentiate your store. Outline actionable steps you can take to improve your SEO and gain a competitive advantage.
6. **Take note of the types of content** (articles, videos, product pages) that rank highly for each keyword and their relevance to user intent.

Lab 10

Social Media Marketing

Objective:

To gain practical experience in setting up Social Media Marketing using current tools and technologies.

Activity Outcomes:

After this lab, the students should be able to

4. Apply practical skills in setting up and Social Media Marketing calendar
5. Write compelling ad copies for advertisement campaigns.
6. Perform competitive analysis, to be able to help businesses succeed in SEM and SEO fields by identifying area of improvement and differentiation targeting.

Instructor Note:

As pre-lab activity, visit and read tool documentation available at <https://knowledge.hubspot.com/get-started>

2) Useful Concepts:

1. Popular social media platforms

There are many kinds of social media platforms available, each capable of achieving different goals. In this reading, you will gain an understanding of each type of platform, and you will review examples of each type.

1.1 Common types of social media platforms

Certain social media platforms will be more appropriate and effective for your brand than others—and when you decide which to use, you need to be sure you choose the ones your target audiences use. Even if your company is on 20 different social media platforms, you will need to deliver content that users on each individual platform prefer—while staying true and authentic to your brand voice.

Each social media channel (i.e. Facebook, Twitter, Instagram, etc.) has a certain number of monthly active users. **Monthly active users** refers to the number of unique customers who visit a platform over a month-long span. As social media shifts and changes over time, this number can change pretty dramatically. Monthly active users is a number you will want to be familiar with as a brand, because it may affect where you place your priorities and focus. [Visit this link](#) for more information on each social media platform's monthly user numbers.

1.2 Social networking

Sites like Facebook and LinkedIn are known as social networking sites because they allow users to interact with each other. Social networking is often used for both personal and professional reasons.

For instance, **Facebook** is a great tool for small businesses who want to keep in touch with and share updates with their customers. It's a great place for companies to post new products or services, sales, hours of operation, and much more.

LinkedIn is an effective social networking site for people who want to manage their professional identity and network with others. Companies (big and small) also use LinkedIn to share company updates and new projects, and even engage with and/or hire other professionals.

Pro tip: The beauty of social networking platforms is that they are designed to encourage users to share various types of content—like visuals, text, and external links—rather than just one primary type. If you're running a social networking page for your brand, keep your content fresh by sharing different types of content each day.

1.3 Microblogging/Blogging

Blogging refers to self-published writing that lives online. Microblogging is blogging, but on a smaller scale. Microblogging platforms allow users to distribute short-form content, quickly and frequently. Twitter and Reddit are good examples of these platforms. While blogging allows you to write lengthy, in-depth content, microblogging allows you to introduce brief concepts to users, and invites those users to interact with that content.

Because of the way it's formatted, Twitter is a useful platform to optimize engagement and interaction with users. Users can use the search function to find tweets on anything they might want to discuss. Brands often use the “trending” section strategically, by tweeting relevant content based on what topics others are talking about.

Reddit is a platform that encourages web chatter and sharing of posts to create a sense of community. Within Reddit, there are “subreddits” which are niche online communities that cover a certain topic. There are subreddits for all kinds of topics, such as specific TV shows, hobbies, political or religious affiliations, industries, and much more.

Photo sharing

Photo sharing platforms like Instagram and Pinterest offer visually appealing “feeds” where you can engage with content posted by other users, or host your own. They offer users the ability to engage with their own community, but they also include features that allow users to engage with new users and content.

Instagram is a photo and video sharing social networking platform. It’s a great place for businesses because it includes a feature that allows brands to post photos and link the product directly in the photo, so users can make purchases from the app. And, even if your brand isn’t creating shoppable content on Instagram, photos are a great way to keep users interested and engaged in your brand.

Pinterest is a useful platform for brands because unlike Instagram, brands can link directly to websites or external landing pages in the captions and replies. Users can save these posts, known as “boards.” So, if you work for an interior design company, you may create design mockups, post them to Pinterest, and link back to your website where users can book you for your services.

1.4 Video sharing

Video sharing platforms allow users to upload and share videos, and live stream their own videos to the internet. Video sharing platforms are becoming increasingly popular within most industries because of the informational aspects and community-building capabilities of video content. Platforms like YouTube, TikTok, Vimeo, Instagram Live, and Facebook Live are great examples of video sharing platforms. Some platforms are better suited for long-form video while others are best used for short-form video, but both have huge advantages for businesses.

YouTube and **Vimeo** are great for long-form videos. For instance, a fitness instructor can lead a full exercise class on a platform like YouTube or Vimeo. A carpenter can show off their woodworking skills all while persuading customers to buy their work in a video format on these platforms. The possibilities with video are endless, but keep in mind that creating video—especially long-form—is one of the most time consuming and specialized types of content you can create. So it isn’t right for everyone.

If your brand doesn’t find long-form video necessary, maybe they want to prioritize short-form videos like on **TikTok**. TikTok is newer than most social media platforms, but it’s quickly becoming a huge asset for brand growth. Brand videos on TikTok can range from informational content like short “how-to” videos, to behind-the-scenes videos, to community-building videos like songs or dances, and so much more.

Instagram Live and **Facebook Live** differ from the other video sharing platforms because the content is live, rather than created and then uploaded. These platforms are often used for question-and-answer style videos, where users can get a feel for who you are as a brand.

2. Social media management tools

Social media management tools can help digital marketers perform all kinds of tasks. Whether your goal is to create content, find content to share, schedule posts, or collect analytics, there are social media management tools to handle almost anything. In this reading, you’ll learn about some tools that can help you meet your goals.

2.1 Tools for content creation

To run social media campaigns, you’ll need to create content. These tools can help you design posts and other content:

- [Canva](#) offers free and paid memberships and allows you to create your own original content or use templates.
- [Adobe Creative Cloud Express](#) is a free tool that offers similar capabilities when it comes to building content from templates.

2.2 Tools for content curation

Curating content refers to the process of selecting, collecting, and organizing pieces of content. To keep your social media feeds fresh, you'll want to source content from other outlets, in addition to creating and posting your own. These tools can help you find, collect, and organize content:

- [Feedly](#) compiles news tailored to your industry and allows you to immediately repost it to all your brand's social accounts. If you don't want to repost right away, you can save the content for later.
- [Pocket](#) delivers content relevant to your interests and allows you to save it so you can repost it later. With Pocket, you can access your saved list from mobile, desktop, and tablet.

2.3 Tools for content scheduling

Digital marketers always have a long list of to-dos. Scheduling content can help you get everything done because it means you don't have to stop what you're doing to create and publish a post. This isn't to say you will just schedule posts and forget about them completely, but it does allow you to create posts whenever you want and make sure they get posted at an optimal time for your audience. These tools can help you schedule and publish content:

- [Hootsuite](#) is a social media management tool that allows you to create social media calendars. It integrates directly with Instagram, Twitter, Facebook, and other social media platforms so you can schedule posts in advance.
- [Buffer](#) also allows you to draft and schedule posts on Facebook, Instagram, Twitter, LinkedIn, and Pinterest.

2.4 Tools for analytics

When it comes to learning about campaign performance, you will need a social media analytics tool. If you learn what worked and what didn't work, you can adjust your strategy for future campaigns. These tools can help you collect and analyze data from your campaigns:

- [Hootsuite Analytics](#) is an analytics tool featuring a dashboard that fully integrates with all your social media platforms.
- [Brandwatch](#) allows you to easily track brand reputation, trends, influencers, and competition.
- [Mentionlytics](#) focuses on tracking mentions and keywords across all your social media platforms.

3) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
1	45 mins	Medium	CLO5
2	30 mins	Medium	CLO5
3	45 mins	High	CLO5

Activity 1: Complete two days of a social media calendar

In this activity, you will complete two days of a social media calendar. A social media calendar can help you plan your posts in advance and organize all of your content in one centralized location. To help you complete the calendar, you will be provided with a scenario that describes a company and a document containing additional information about the company. You will choose social media platforms to post on, plan when and how often to post, and determine what types of content to post based on this information.

Step 1: Review the scenario below

The Right Size is a size-inclusive clothing company. Their mission is to produce beautiful, affordable clothing that makes all people feel empowered, regardless of their size.

You are part of The Right Size's social media marketing team, and you have begun building their social media calendar for the month of May. In this activity, you will plan the posts for two days in the first week of that month. To complete this task, you will need to consider the holidays and events happening that week, as well as related company promotions. You will refer to a research document to help you plan the content.

Step 2: Access supporting materials

For this activity you need to create similar calendar in MS Excel as shown below

SOCIAL PLATFORM	DATE	CONTENT				
	(DAY/MONTH/YEAR)	TIME	TOPIC	TYPE	COPY	ASSETS
WEEK 1: THURSDAY		5/5/20xx				
[PLATFORM NAME]						
[PLATFORM NAME]						
[PLATFORM NAME]						
WEEK 1: FRIDAY		5/6/20xx				
[PLATFORM NAME]						
[PLATFORM NAME]						
[PLATFORM NAME]						

Company data which needs to be accessed for creating the calendar is given below:

The Right Size Campaign (Research Document)

Campaign goal: Raise brand awareness

Target audience: People of all sizes between the ages of 25-49

Largest age groups on different platforms:

- Facebook: 25-34 year olds
- Instagram: 25-34 year olds
- LinkedIn: 46-55 year olds
- TikTok: 18-24 year olds
- Snapchat: 13-34 year olds
- Twitter: 30-49 year olds

Most popular platforms among current customers (in order of popularity):

1. Instagram
2. Facebook
3. Twitter
4. TikTok
5. SnapChat
6. LinkedIn

Highest target audience activity on social media:

- Monday - Friday: 9:00 a.m. - 2:00 p.m., 5:00 - 6:00 p.m.
- Saturday & Sunday: 8:00 a.m. - 11:00 a.m.

Holidays/Events: Week of May 2–8

- Asian Pacific American Heritage Month
- National Small Business Week
- Teacher Appreciation Week
- May 4: Star Wars Day
- May 6: National Nurses Day
- May 8: Mother's Day

Promotions: Week of May 2–8

- Mother's Day Sale
- Teacher Appreciation Week Discount

Posts receiving highest engagement (in the past 3 months):

- Gorgeous as You Are - inspirational video
- How They Wore It - funny GIF
- Redefining Shopping: Size-Inclusive Fashion - article
- Find Your Fit - pants styles infographic

Step 3: Select social media platforms

Review the **Target Audience**, **Largest Age Groups**, and **Most Popular Platforms** sections in the research document. Based on the information in the document, select the three social media platforms that you think will reach the largest number of people in your target audience.

In the calendar template, fill in the names of the platforms you’ve chosen in the column labeled **Social Platform**.

Step 4: Select the timing and frequency of posts

Determine when and how often you want to post on each platform. First, recall what you learned previously about how to decide on a posting frequency:

- For platforms with chronological feeds like Twitter, posting multiple times a day can help reach your target audience in different time zones and at various points throughout their day.
- For algorithm-based platforms like Facebook and Instagram, it’s better to publish less frequently—generally no more than once or twice a day.

Next, review the **Highest Target Audience Activity** section in the research document to determine when your target audience is spending the most time in their social media feeds.

Then, in the column labeled **Time** in the calendar template, add times for planned posts on each of the different platforms.

Step 5: Select topics of posts

Decide on the topics of the content you’d like to publish. Review the **Holidays/Events** and **Promotions** sections of the research document to find out what is happening around the time of the posts you are scheduling. Then, for each scheduled post, add a topic related to the events or promotions listed in the **Topic** column in the calendar template. (You may repeat some topics more than once.)

Step 6: Select types of content to publish

Decide what types of content you want to post. Consider some of the common formats for social media content—such as images, videos, stories, articles, GIFs, infographics, and quizzes—and think about what content works best on different platforms.

Next, review the **Posts Receiving Highest Engagement** section in the research document to get a sense of the types of content that are popular with your audience.

Then, in the template, add content types next to each topic in the **Content Type** column.

Step 7: Plan copy for two posts

Choose two of the posts you’ve planned in the calendar template. Then, in the **Copy** column, write a few bullet points describing what the content of the post should include. Keep in mind your target audience, the topic of the post, the post’s format, and the character limitations of the platform (for example, Twitter has a 280 character limit).

Step 8: Describe the assets needed for two posts

In the **Assets** column, describe the assets needed for two of your planned posts. Assets include visual content like images and videos. Once again, consider the post's topic and format.

Pro Tip: Save your work

Finally, be sure to save the work you did to complete this activity. This can help you work through your thought processes and demonstrate your experience to potential employers.

What to Include in Your Response

Be sure to include the following elements in your completed social media calendar:

- Social media platforms
- Times for planned posts
- Topics of posts
- Types of content
- Descriptions of copy for two posts
- Assets for two posts

Output:

SOCIAL PLATFORM	(DAY/MONTH/Y	TIME (EST)	TOPIC	CONTENT TYPE	COPY	ASSETS
WEEK 1: THURSDAY						
FACEBOOK		10:00	National Small Business Week	video		
			Mother's Day Sale	GIF		
INSTAGRAM		10:00	National Small Business Week	video		
			Mother's Day Sale	story		
TWITTER		7:00	National Small Business Week	video		
		10:00	Mother's Day Sale	GIF		
		1:00	Teacher Appreciation Week Disc	infographic	-Title the infographic "What makes a great teacher?" -Briefly describe characteristics of a great teacher: sharp mind, keen eyes, big heart, strong voice, helping hands. -Mention 15% off discount to all teachers with valid ID.	-Create an illustration of a teacher standing in front of a whiteboard. -Add callouts with space for text to the following features: brain, eyes, heart, voice, hands.
WEEK 1: FRIDAY						
FACEBOOK		9:00	National Nurses Day	article		
			Mother's Day Sale	image	-Thank mothers for everything they do -Mention Mother's Day Sale (25% off everything online and in store). -Include #HappyMothersDay.	Show a photo of a woman wearing a dress from the spring collection with a young child.
INSTAGRAM		9:00	National Nurses Day	article		
			Mother's Day Sale	story		
TWITTER		7:00	National Nurses Day	image		
		10:00	Mother's Day Sale	image		
		1:00	Teacher Appreciation Week Disc	infographic		

Activity 2: Compose and publish posts using Hootsuite

Social media management tools allow you to perform all kinds of tasks to help you organize, schedule, and track your content. Hootsuite, for example, is an all-in-one social media management tool that enables you to plan and create content, schedule posts, listen to and engage with customers, advertise, and collect analytics. A tool like Hootsuite essentially enables you to address all of the pillars of social media marketing in one place.

In this reading, we'll focus on how to use Hootsuite to compose and publish posts. Then, in an upcoming activity, you'll have the opportunity to practice using Hootsuite to create and schedule Tweets by linking a Hootsuite account to the Twitter account you created previously.

Step 1: Open a Hootsuite account

To start using Hootsuite for social media management, open a free student account at <https://education.hootsuite.com/>. You'll be asked to enter your full name and email address and create a password. Then, click **Back to Hootsuite.com**.

Step 2: Link your social media accounts to Hootsuite

To publish posts to social media using Hootsuite, you'll first need to link your social media accounts to your Hootsuite account. Add your social media accounts to Hootsuite by clicking the **My Profile** icon in the bottom left and then clicking **Manage accounts and teams**.

The directions for how to add social media accounts to Hootsuite vary depending on whether the type of account (business or private) you are adding, and on the social media platform type. Hootsuite supports linking to Facebook, Twitter, Instagram, LinkedIn, YouTube, and Pinterest.

Help and Resources

Add or manage your social accounts

Administer your social networks, teams, and organizations

Step 3: Select accounts to publish to:

One of Hootsuite's key features is the ability to schedule and publish posts to multiple social media platforms at once. Instead of signing in to each platform separately, you can use Hootsuite to manage activity for all of your connected accounts in one place, which can save you time. To create a new post, select the **Create** icon from the sidebar, then select **Post**. Then select the account(s) you want to publish to from the **Publish to** list.

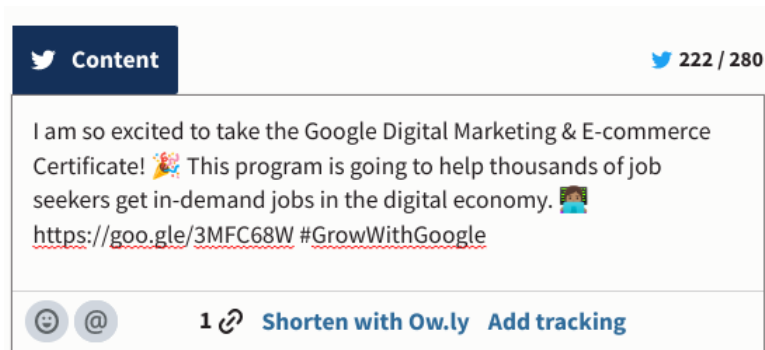

Step 4: Compose your post

After you've selected social media accounts to publish to, you can compose your post.

In the **Content** area, enter the text of your post. You can also include:

- **Mentions:** usernames of businesses, brands, or people preceded by the “@” symbol (for example, @Google)
- **Links**
- **Emojis:** small digital images or icons used to express ideas or emotions
- **Hashtags:** words or phrases preceded by the pound symbol that indicate that a piece of content relates to a specific topic or category (for example, #DigitalMarketing)

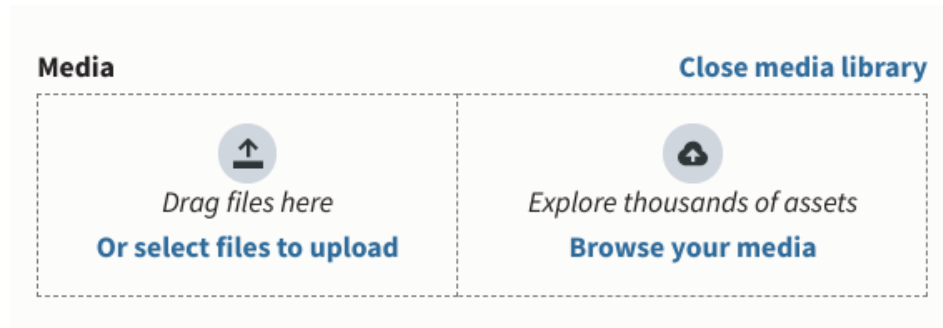

Hootsuite copies the content of your post into tabs for each social media platform you've selected. In each tab, you can customize the content so it's optimized for your unique audiences on each platform. For example, you can make the post shorter on Twitter, remove the hashtags on Facebook, or remove the link on Instagram.

Step5: Add media

When the body of your post is complete, you can add media—such as images, videos, and GIFs—to your post. Adding media to your social media posts increases the likelihood that your audience will engage with them.

Hootsuite offers a media library of royalty-free images and GIFs that you can add to your post. Or, you can upload your own.

- To search for media in the tool, click **Browse your media**. Then select **Free images** or **Free GIFs** from the menu, type a keyword into the search bar, and select the media you want to include in your post.
- To upload your own media from your device, drag content to the media area or click **Or select files to upload**.

You can edit images in your posts using Hootsuite’s built-in photo editor. For example, you can add effects or crop images to fit a specific platform. When you upload a video, Hootsuite automatically formats it for each platform you’ve chosen to post to.

To make images and videos more accessible, you can add **alt text**—a brief, written description of an image with the primary purpose of assisting individuals who are visually impaired—or subtitles.

Step 6: Preview and publish your post

After you create your post, you can select a social media platform tab and preview how your post will look on that platform.

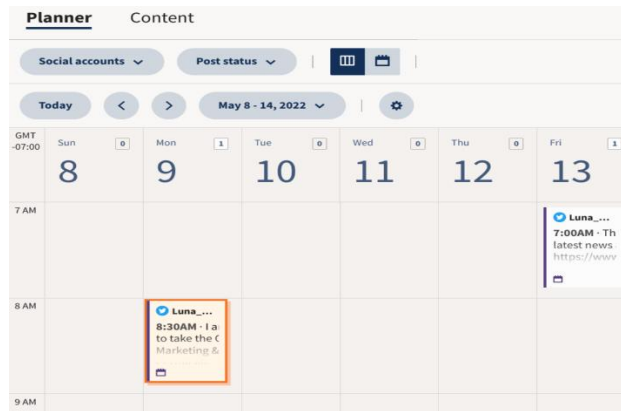

When you're satisfied with your post, you can choose from the following publishing options:

- **Post now:** Publish the post to your chosen platforms right away.
- **Schedule for later:** Select a time and date to publish the post. Scheduling your posts in advance helps you keep your social media presence active and publish your posts at high-engagement times. If you have a paid plan, Hootsuite provides recommended times to post based on your historical data.
- **Save draft:** Save a draft of your post if you're not ready to publish or schedule it yet. Your customized content will be saved for each social media platform tab.

Output : View your scheduled posts

You can view and manage your social media posts in one place by clicking the **Planner** icon, which is Hootsuite's built-in social media calendar. Review your scheduled posts and plan new content based on what you already have scheduled. You can create new posts in empty time slots, and reschedule, edit, or delete scheduled posts.

Activity 3: Analyze Social Listening

Social listening involves monitoring social media platforms for mentions of your brand, competitors, and any related keywords, then analyzing the information you've collected and planning actions based on what you've learned.

Review the scenario below. Then complete the step-by-step instructions.

You work for an agency hired to do marketing for Great Grounds, a small, regional chain of coffee shops based in the Northeast United States. You have monitored Twitter for mentions of the brand, its products, its competitors, and related keywords and collected the data in a spreadsheet. Now you want to review that data to learn more about Great Grounds' audience, understand their sentiment around the brand and its main competitor (Java House), and spot any emerging industry trends. You will record your insights and the actions you plan to take based on those insights.

Step 1: Access the template

The template which will be used in this activity is given below

Filter	Insights	Actions
Positive mentions		
Negative mentions		

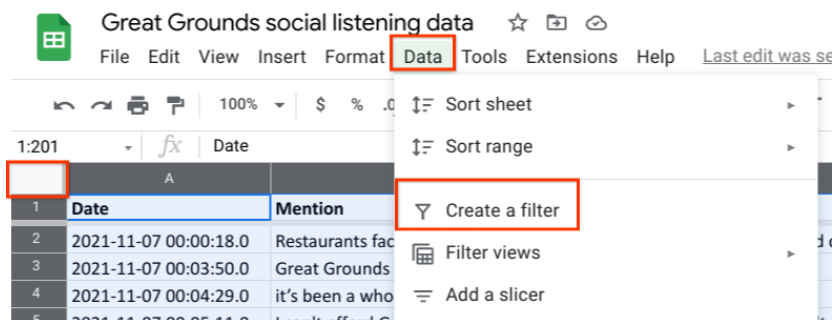

Step 2: Access supporting materials

The following supporting materials will help you complete this activity. Access file : **Great-Grounds-social-listening-data.xlsx** and keep it open as you proceed to the next steps.

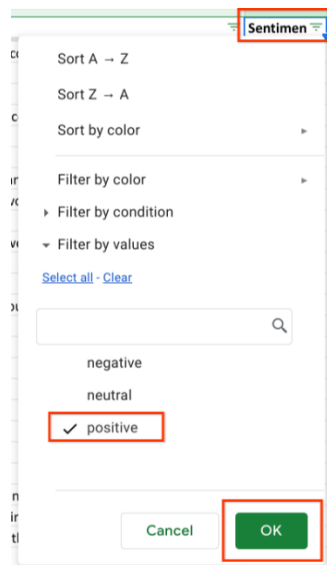

Step 3: Filter mentions by positive sentiment

In the next few steps, you will filter the data in the **Great Grounds social listening data** spreadsheet by different criteria. Then, you will analyze the information.

First, filter the **Mention** column by positive sentiment. To create a filter, click on the cell in the top left-hand corner of the sheet to select the entire sheet. Then select “Data” and “Create a Filter.”

Click on the filter icon in the **Sentiment** header and click “Clear.” Then select “positive” from the dropdown list and click “OK.”

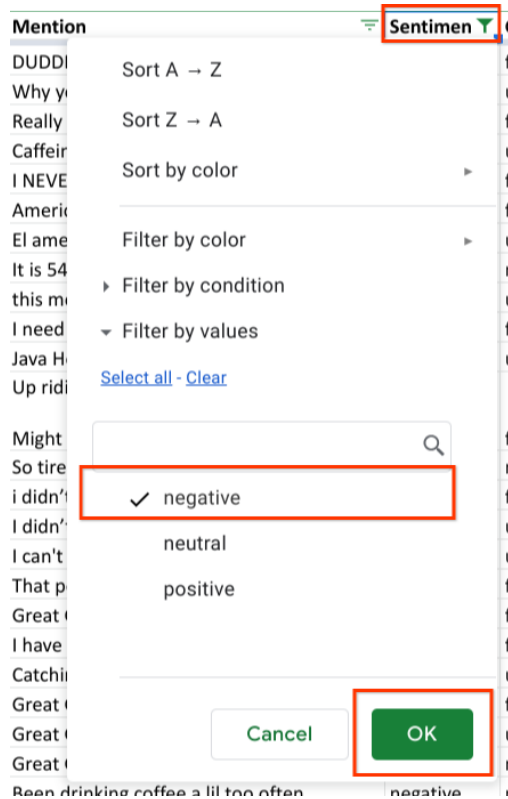

Now review the positive mentions in the **Mention** column. What are people talking about? What trends do you notice? What do people like?

Record notes on your findings next to **Positive Mentions** in the **Insights** column of the social listening insights template.

Step 4: Filter mentions by negative sentiment

Repeat the previous step to filter the **Mention** column by negative sentiment. To change the filter, click on the filter icon in the “Sentiment” header, deselect “positive,” and select “negative.” Then click OK.

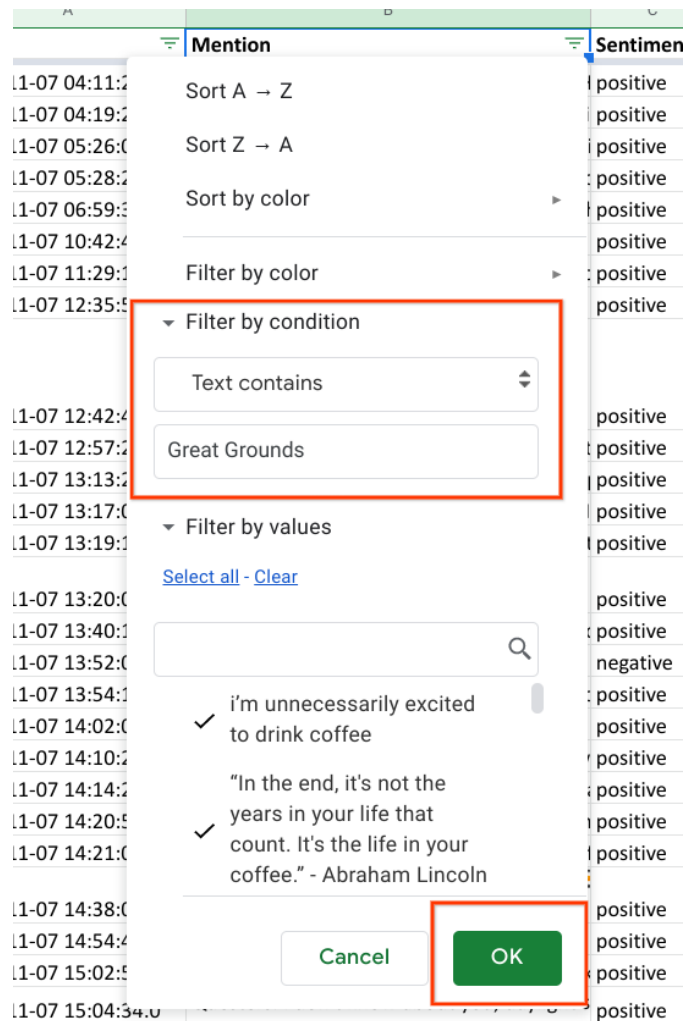

Review the negative mentions in the **Mention** column. What are people talking about? What trends do you notice? What do people dislike?

Record notes on your findings next to **Negative Mentions** in the **Insights** column of the social listening insights template.

Step 5: Filter the data by additional criteria

To gain even more specific insights, filter the data by additional criteria. For example, you could filter for mentions of the name Great Grounds, its competitor—Java House, a specific flavor, and so on. You could also filter the data by gender, interest, or region.

To filter the mentions by additional criteria, click on the filter icon in the **Mention** column, select “Filter by condition,” and select “Text contains” from the dropdown menu. Then type in the text you want to filter for (e.g., Great Grounds) and click “OK.”

Review the filtered data.

Describe the criteria you filtered for (e.g., Great Grounds mentions) in the **Filter** column in the social listening insights template. Then add notes on any new findings next to your description in the **Insights** column.

Step 6: Plan actions based on insights

The final step of the social listening process involves planning actions based on the insights you've revealed. Review the notes you recorded in the Insights column in the social listening insights template. Determine some actions you plan to take to improve your marketing strategy based on these findings. For example, if you found that people liked a particular coffee drink, you might plan to promote that drink more on social media. Then, add notes on any actions you plan to take based on your social listening insights to the Actions column in the social listening insights template.

Finally, be sure to save the work you did to complete this activity. This can help you work through your thought processes and demonstrate your experience to potential employers.

What to Include in Your Response

Be sure to address the following elements in your completed social listening insights table:

- Insights gained from filtering the data for positive mentions
- Insights gained from filtering the data for negative mentions
- Insights gained from filtering the data for additional criteria, and a description of that criteria
- A description of the actions you plan to take based on your social listening analysis

Output:

Great Grounds Social Listening Insights

Filter	Insights	Actions
Positive mentions	Holiday coffee drink flavors—such as gingerbread, pumpkin spice, and eggnog lattes—are very popular right now. There is a relationship between people interested in photography and animals and positive mentions.	Heavily promote Great Grounds' holiday flavors, particularly gingerbread latte. Directly thank users who posted positive comments about Great Grounds' holiday flavors. To drive more positive reviews from animal and photography lovers, do a giveaway for those who tag Great Grounds in a post with a photo of themselves with their coffee and pet.
Negative mentions	Many people complained about coffee being too expensive.	Share the unfavorable response to peppermint latte beverages with stakeholders. Do not promote this drink in posts. Offer a free drink to customers who posted negative comments about this flavor.
Great Grounds mentions	Great Grounds' new gingerbread latte flavor received a number of positive mentions, while the peppermint latte received several negative mentions. Some people stated that they were upset about the recent increase in Great Grounds' prices.	Share complaints about the recent Great Grounds' price increases with stakeholders. <u>Do not</u> order to help justify these increases, emphasize in posts that Great Grounds coffee is a premium product. Offer promotions such as "buy one get one free," discount days/times, etc. to encourage sales.

4) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1:

You work for an agency hired to do marketing for Great Grounds, a small, regional chain of coffee shops based in the Northeast United States. You are reviewing and responding to comments posted on the company's Facebook profile. To determine how to respond to each comment, you will need to consider the type of comment, what resources and information the customer needs, and how best to communicate with them.

What to Include in Your Response

Be sure to address the following elements in your completed replies to customer comments template:

- A reply to the positive feedback that thanks the customer for their kind, helpful, or insightful words and lets them know you appreciate them
- A reply to the question that offers helpful resources and engages the customer
- A reply to the negative feedback that uses polite and approachable language and shows empathy for the customer's perspective

Comment Type	Customer	Comment	Resources/ Information	Response
Positive feedback	Daniela Rosas	I am SO happy that it's holiday flavor time at Great Grounds! Love, love, love your gingerbread latte! Makes me want to curl up with my drink and a good book in front of the fire. ☕📖🔥		
Question	Bruce Tang	I'm trying to reduce the amount of sugar in my diet. Can you tell me which Great Grounds' drinks are low sugar or sugar-free?	Detailed information about the nutritional content in all Great Grounds' beverages: www.GreatGrounds.com/NutritionalFacts	
Negative comment	Imani Moore	What's up with the hike in Great Grounds' prices?! I used to be able to get my daily medium mocha for \$4. Now it's \$4.25! That's really going to add up over time . . . 💸😡	In response to a recent coffee shortage, Great Grounds has had to increase prices. Promotional code for half off one beverage: HALFOFF	

Lab 11

Email Marketing

Objective:

To gain practical experience in setting up Email Marketing using current tools and technologies.

Activity Outcomes:

After this lab, the students should be able to

7. Apply practical skills in setting up Email Marketing tools.
8. Email Segmentation based on demographic information and geography.
9. Set up an email campaign using Mailchimp.

Instructor Note:

As pre-lab activity, familiarize with hubspot tool for that visit and read tool documentation available at <https://knowledge.hubspot.com/get-started>

3) Useful Concepts:

An **email marketing strategy** is a set of procedures that a marketer identifies and follows to achieve their desired marketing goals with email advertising. This reading provides an overview of the sections of an email marketing strategy.

Build your email marketing strategy

There is no one way to create an email marketing strategy. You can record strategy on a paper using a writing utensil. Or, you can use a word processing application like Microsoft Word or Google Docs. Instead, it's more important to include steps commonly found in other successful strategies. The sections of an email marketing strategy include:

- Set your goals
- Choose an email marketing provider
- Build your email marketing subscriber list
- Evaluate brand guidelines
- Determine email frequency
- Determine performance measuring methods

Let's explore each of these steps one by one.

1. Set your goals

The first step of creating an email marketing strategy is defining your email goals. These goals are often in line with your business goals, meaning your emails will work to achieve the goals that you have for your business.

Some common goals include:

- Increase brand visibility
- Increase website traffic
- Increase sales
- Acquire new customers
- Build relationships with existing customers
- Increase brand loyalty and loyal customers

Defining your email marketing goal first will help guide you when choosing relevant email options in the upcoming strategy steps.

2. Choose an email marketing provider

An **email marketing provider**, or email marketing service, is a company that offers email marketing or bulk email services. Choosing the right email marketing provider can significantly impact the success of your email campaign. Some popular email marketing providers are:

- Mailchimp
- HubSpot
- Salesforce
- Constant Contact

When deciding which service is best for your brand, you will need to consider the following factors:

- Cost
- Deliverability
- Reporting
- Email list management
- Template features

3. Build your email marketing subscriber list

Next, determine how you will build and maintain an engaged subscriber list. Building email lists is an ongoing process. To build an email list, you can:

- Create a signup form on your website

- Create an in-person sign up list
- Share a signup form on social media

Once you create a signup list, you'll be able to divide it into smaller groups based on criteria like interests, location, or purchase history, in a process known as **segmentation**. This will help you target specific groups for specific goals.

4. Evaluate brand guidelines

When a business wants to establish a distinctive brand identity, they often create a list of rules and standards that convey how their brand should be represented. These rules are the company's brand guidelines and they apply to all content produced by the company, including emails.

In your email marketing strategy, identify specific brand guidelines that will be relevant to your email marketing campaigns. These guidelines can include the following:

- Fonts
- Colors
- Layouts
- Illustrations
- Logos

If your email marketing service allows you to create templates for your emails, you can apply specific guideline details for all your brand's outgoing emails for a consistent brand identity.

5. Determine email frequency

Stating how often your emails will be shared will help you plan out how often your emails will reach your subscribers. Later in the course, you will learn more about how to establish email frequency and how to create a schedule for sending emails.

6. Determine performance measuring methods

When you begin your email marketing campaigns, you'll need to analyze the success of your campaigns. The tools you'll use are based on your available resources. Most email marketing providers offer basic reporting that tracks essential metrics like how many of your emails were opened, unsubscribers, and click through rate (CTR). Some providers also monitor bounce rate, which is the percentage of emails that have not successfully reached recipients. You can also run a deliverability check that determines if your emails are getting to their intended recipients.

Be sure to state in your email marketing strategy which of these tools will be most effective for analyzing your campaign success. Also be sure to state when you plan to collect and evaluate these performance measuring methods.

Key takeaways

Outlining the steps and procedures of an email marketing strategy can help you develop a successful, organized, and well-thought email marketing campaign. These steps will guide you as you strive to create emails that achieve your marketing goals.

4) Solved Lab Activities

<i>Sr.No</i>	<i>Allocated Time</i>	<i>Level of Complexity</i>	<i>CLO Mapping</i>
<i>1</i>	<i>45 mins</i>	<i>Medium</i>	<i>CLO5</i>
<i>2</i>	<i>30 mins</i>	<i>Medium</i>	<i>CLO5</i>
<i>3</i>	<i>45 mins</i>	<i>High</i>	<i>CLO5</i>

Activity 1 : Marketing email in HubSpot

HubSpot is a marketing automation platform with a customizable email editor. By learning to create emails in this widely-used tool, you'll be better prepared to work on a variety of marketing campaigns in the future.

Note: This activity uses HubSpot's drag and drop email editor, which is available to all users. If the editor is updated, the steps below may differ from your experience of the tool. Visit [HubSpot's Knowledge Base](#) for information on the latest version.

If you prefer to use the classic editor (available to Professional and Enterprise users), learn about the latest version from [HubSpot's Knowledge Base](#).

Scenario:

Odos Eyewear is an e-commerce business that sells prescription eyeglasses and sunglasses online and in stores. As a member of their marketing team, you are helping to create a welcome email for new subscribers in HubSpot. Your team has provided a copy of the Odos logo and a draft of the email text for you to use. The draft document contains:

- A subject line
- Preview text
- Alt text for the logo image
- The welcome email body (including headings, subheadings, and button text)

Your job is to use this content to design an email in the HubSpot email editor. The finished email should reflect the brand's personality and attributes (logo style, tone of voice, etc.). It should also contain 1–2 stock images (selected through the email editor).

Step-By-Step Instructions

Step 1: Access supporting materials

The following supporting materials will help you complete this activity. Keep them open as you proceed to the steps below.

To use the supporting materials for this course item, click the link below and select "Use Template."

Odos Eyewear email draft

Settings tab

Subject line	Welcome, glasses lover!
Preview text	We're glad you're here! Check out our latest frames in a rainbow of colors—you'll want a pair for every day of the week.

Edit tab

Company logo	[Alt text: Odos Eyewear logo]
Email text	You + Odos = a perfect pair Thanks for signing up—your inbox is about to get more stylish! As a subscriber, you'll get exclusive offers and early access to new collections. But you can also adjust your account settings to customize your email experience. Now, let's start building your first home try-on box! No matter what your style, we've got frames to fit you.
Button text	Browse frames
Email text	More ways to try Odos Virtual try-on Test out frames and compare styles, colors, and widths with our virtual try-on tool. Download the app >> Visit us Want to try our frames in person? Visit one of our stores! From style advice to eye exams, we've got you covered. Find a store >>

Step 2: Log in to HubSpot or create an account

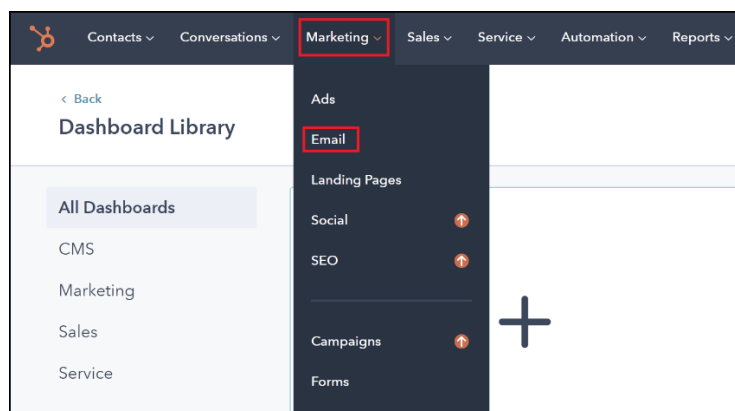

If you have an existing HubSpot account, go to the [Hubspot Partnership Page](#) and select *Log in*. If you're new to HubSpot, click [Start free or get a demo](#). On the next screen, select *Get started free*. Then, follow the prompts to create a new account.

During the account creation process, you'll be asked to provide information like your company's name and website. Answer the questions to the best of your ability. If you're not sure how to respond, you can enter placeholder information (e.g., "Test Business" or "TestWebsite.org").

Note: Some domains will not be accepted and will prevent a successful sign up, such as *hubspot.com*, *google.com*, *linkedin.com*, *facebook.com*, and *test.com*.

Step 3: Create a new email

Once you've created an account or logged in, open the email editor by selecting *Marketing > Email* in the menu bar. Then click *Create email*.

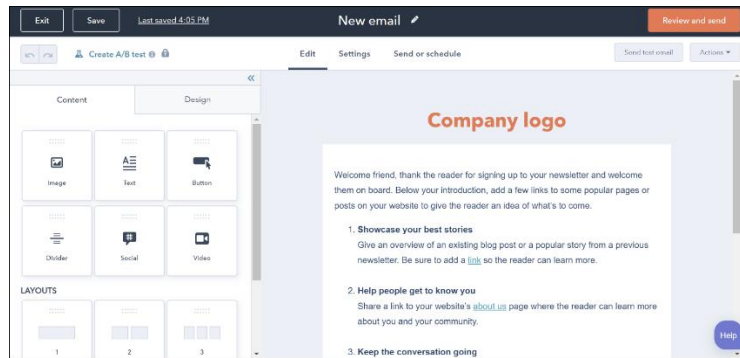

If this is your first time using HubSpot, a product tour may begin automatically. If you want to skip the tour:

- Close and exit the tour.
- If prompted to select an email type, choose **Regular**.
- Select the **Welcome** template from the **Basic templates** menu.

If you choose to complete the tour:

- Click *End tour > Exit* when the tour is over.
- Click *Create email* again to return to the **Templates** page.
- Choose the **Welcome** template to open it in the email editor.

Once you've selected the template, your screen should appear similar to the image below:

Step 4: Edit the email settings

Go to the **Settings** tab to customize the sender information, subject line, and preview text.

- Select the **From name** dropdown menu and click *Add from name* to enter “Odos Eyewear.”
- Add the subject line from the welcome email to the **Subject line** field.
- Add the preview text from the welcome email to the **Preview text** field.
- If you’d like, you can customize the subject line or preview text by adding an emoji.

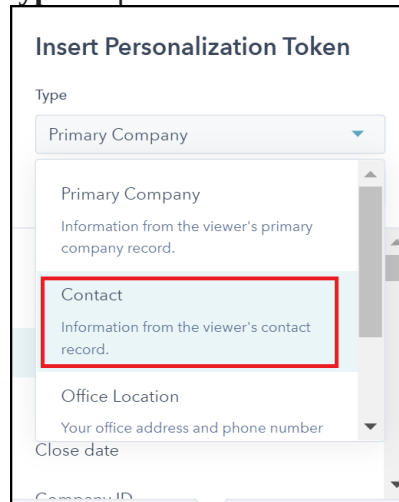

Note: Since you are not sending this email to a subscriber list, you do not need to update the remaining fields on this screen. Keep in mind, however, that you must select a subscription type and include an office location when sending marketing emails.

Step 5 (Optional): Personalize the subject line

If you want the subject line to display the recipient’s first name, you can insert a personalization token (HubSpot’s term for a personalization tag). You can also set this token to display the default text (called the “default value”) if the recipient has not provided a first name.

To add a token:

- Highlight the phrase “glasses lover” in the subject line and click *Personalize*.
- Select *Contact* from the **Type** dropdown menu.

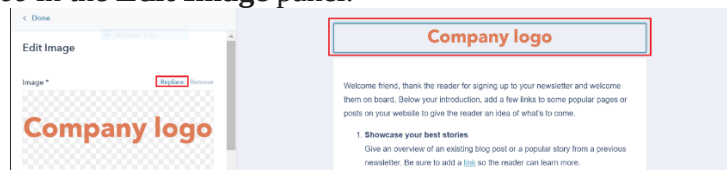

- Type “first name” in the **Search contact tokens** field.
- Type “glasses lover” in the **Default value** field and click *Insert*.
- Select the **Edit** tab to return to the email template.

Step 6: Add the Odos logo

The basic **Welcome** template contains two placeholder content elements: one for a logo image and the other for text. To add the Odos logo (below) to the template, you’ll first need to import it to your HubSpot photo library:

- Right-click the logo image above and select *Copy image address* (or *Copy image location*, depending on your browser).
- Select the **Company logo** element in the email template.
- Click *Replace* in the **Edit Image** panel.

- Select *Add image > From a URL*.
- Paste the URL in the **Enter URL** field and select *Preview*.
- Check the *Select all* box and click *Import selected (1)*.
- Choose the imported logo and add it to the email.
- Change the alt text to “Odos Eyewear logo” in the **Edit Image** panel.
- Click *Done*.

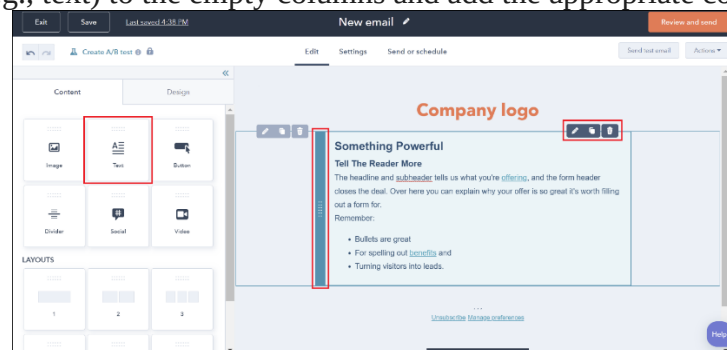

Note: If you have previously set a default logo, you can [override it](#) without affecting your settings.

Step 7: Add the email text and additional content elements

Copy the first section of text from the Odos email draft and paste it over the placeholder text in the template. (Note that the pasted text preserves the heading sizes and links from the email draft. These settings can also be modified through the text format menu bar.)

As you add the remaining email text, experiment with different elements (e.g., text, button, etc.) and layouts (single or multi-column). For example, from the **Content** menu, you can:

- **Add an element:** Drag an element from the **Edit** menu to the template.
- **Move an element:** Drag an element by the left edge and drop it in a new position.
- **Edit an element:** Click inside the element and make changes in the **Content** menu or text formatting toolbar (you don't need to finalize the formatting yet).
- **Duplicate or delete an element:** Hover over the element and select *Clone element* or *Remove element*.
- **Add a preset layout:** Drag a layout from the **Content** menu to the template; then drag elements (e.g., text) to the empty columns and add the appropriate content.

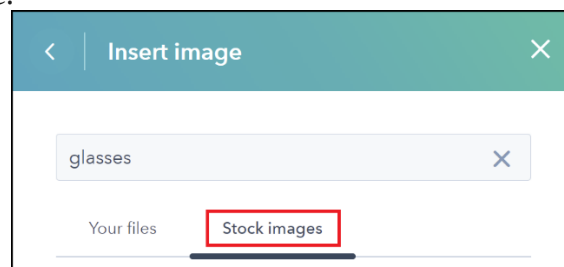

Note: Visit [HubSpot's Knowledge Base](#) to learn more about what you can do in the drag and drop email editor.

Step 8: Add stock images

HubSpot provides access to stock images you can use in your email. To add a stock image:

- Add a new **Image** element to the template.
- Click *Select image*.

- Use the search box to find images that relate to the email content (e.g., search for “glasses,” “eyeglasses,” “sunglasses,” “eye exam,” etc.).
- Select the **Stock images** tab to browse images.
- Once you’ve found an image you want to use, click *Insert*.
- If necessary, adjust the alt text to reflect the content of the email.

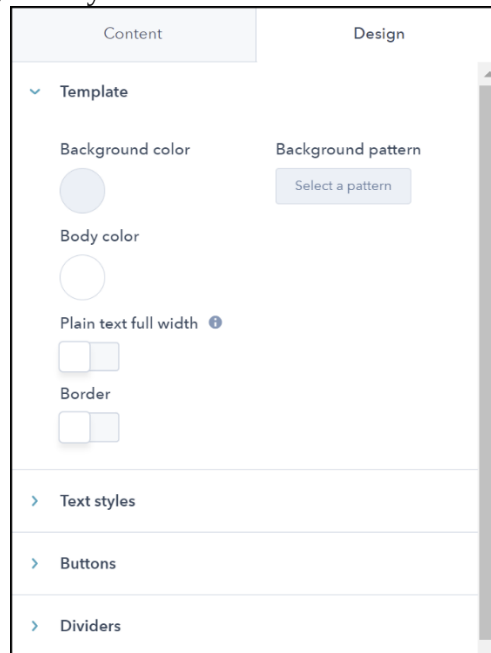

You can add and delete as many images as you like before making selections. Remember that your finished email should contain 1–2 stock images.

Step 9: Adjust the formatting and design

Once you have added all the content, try reformatting different elements to change the look of the email. You can format individual elements by clicking inside them and making adjustments in the menus that appear.

You can also customize the overall design in the **Design** menu. Some examples of design adjustments include:

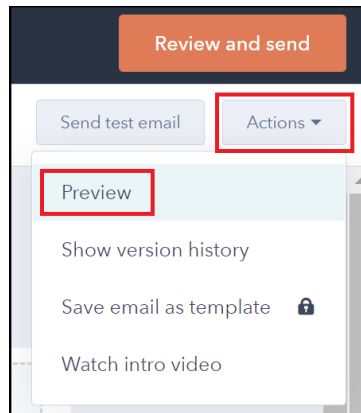

- Background color and pattern
- Body color
- Text size, color, or font
- Link color or style
- Button shape, color, and font
- Divider height, color, and style

When making design choices, consider Odos’ brand attributes (e.g., the tone of the message and the logo style), as well as the stock image(s) you selected. Keep experimenting with different styles, colors, and layouts until you are satisfied with the design.

Step 10: Preview the email

Before completing your adjustments, click *Actions > Preview* to find out how your email looks on desktop and mobile devices.

If your email includes a personalization token, test it by selecting a contact from the **Preview as specific contact** menu. The contact's name will replace the default text in your email subject.

Once you've finished, Return to the email editor to make any additional changes.

Note: When sending marketing emails to subscribers, you must also fill out the fields in the **Send or schedule** tab. Here, you can add or exclude contact lists. You can also choose to send the email immediately or schedule it for later.

Step 11 (Optional): Send a test email

If you'd like, you can also send yourself a test email to view it in your inbox:

- Click *Send a test email*.
- Make sure the **Choose one or more recipients** field contains the email address you want to use for the test.
- If you used a personalization token, select a contact from the **Receive email as specific contact** contact list.
- Click *Send test email*.
- Go to your inbox to view the message (check your spam filter if you don't receive the test email).

A screenshot of the 'Send a test email' dialog box. The title bar is teal with a close button (X). The main content area has a light gray background. It starts with a note: 'Make sure your email hits all the right notes. Send a test version to yourself or a colleague. Test emails are sent from noreply@hubspot.com. Learn more.' Below this is a 'Please note:' section with a bullet point: 'Test emails will only display default values for non-contact personalization tokens.' The 'Choose one or more recipients' section has a dropdown menu showing '*****@gmail.com' with an 'X' icon. The 'Receive email as specific contact' section has a dropdown menu showing 'Cool Robot (Sample Contact) <coolrobot@hubspot.com>'. There is a checkbox labeled 'Send plain text version' which is currently unchecked. At the bottom right, there is an orange button labeled 'Send test email'.

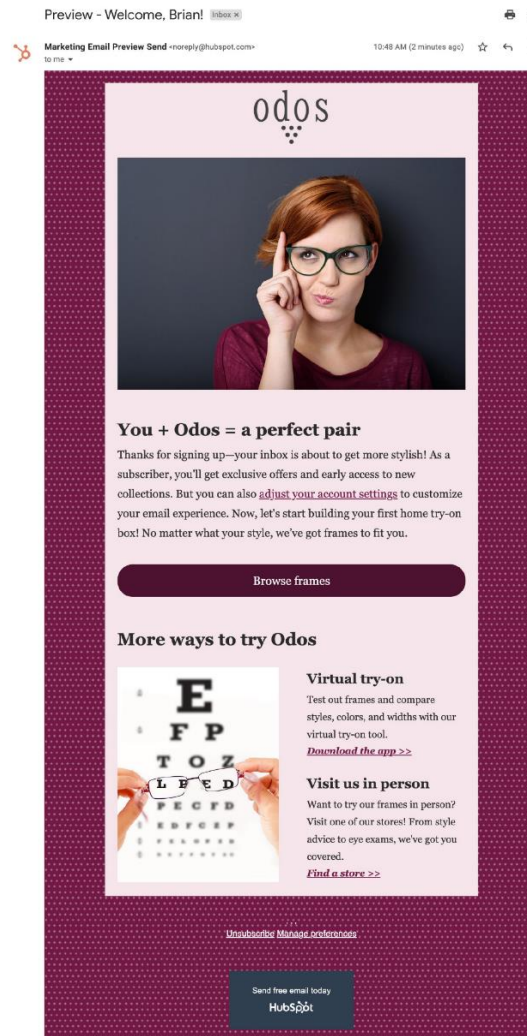

What to Include in Your Response:

Be sure to include the following elements in your completed email:

- The Odos Eyewear logo
- The subject line, preview text, and content from the Odos welcome email
- 1–2 stock images

Design choices that reflect Odos' brand attributes

Output:

Activity 2: Email Segmentation based on demographic information and geography.

use Constant Contact, an online marketing tool, to upload a list of contacts and then divide it into three segments based on demographic information and geography.

Segmenting is the act of dividing an email subscriber list into smaller groups based on specific criteria, like demographics, geography, or interests. When companies segment their email lists, they are able to deliver the targeted, relevant content to their subscribers.

Scenario: You are a digital marketing coordinator working for Clean and Bright Skincare, a skincare brand that uses all-natural ingredients. In order to prepare for three upcoming email marketing campaigns, you will upload a list of recent Clean and Bright Skincare subscribers to Constant Contact and create two list segments. The details of the upcoming campaigns—and the related list segments needed for each—are as follows:

1. **Campaign:** Clean and Bright Skincare is preparing to introduce a new line of hydrating products designed for dry skin. You will create an email campaign targeting people who live in the arid, desert climates of the Southwest United States. **Segment:** People who live in Arizona, California, New Mexico, Nevada, Texas, and Utah
2. **Campaign:** Subscribers are offered a 15% discount on all online orders during their birthday month. You will prepare an email presenting this offer to people with April birthdays. **Segment:** People who have birthdays in April

Step-By-Step Instructions

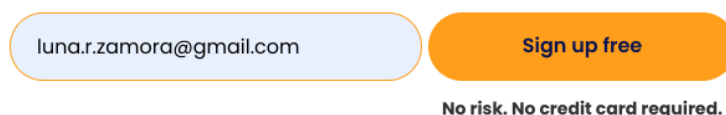

Step 1: Access supporting materials

The following supporting materials will help you complete this activity. **Download** and **save** the file attached below.

[Contact List.XLSX File](#)

Step 2: Open a free Constant Contact account

To open a free 60-day trial account, go to [ConstantContact.com](https://www.constantcontact.com), enter your email address where prompted, and click *Sign up free*.

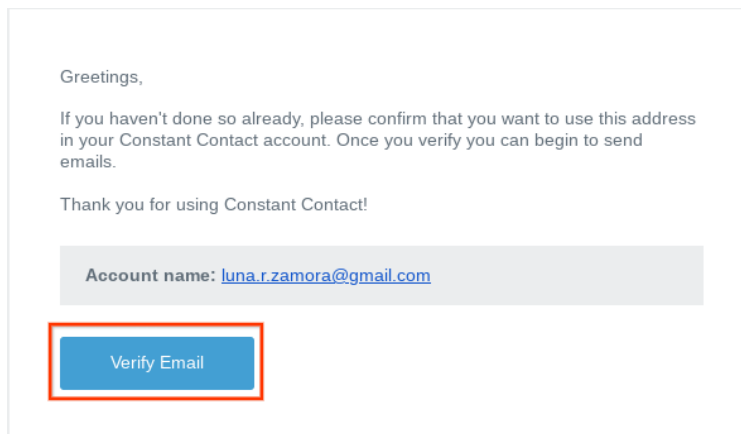

The image shows a digital form for signing up for Constant Contact. It consists of two rounded rectangular boxes side-by-side. The left box is light blue and contains the email address 'luna.r.zamora@gmail.com'. The right box is orange and contains the text 'Sign up free'. Below these boxes, centered, is the text 'No risk. No credit card required.'

Follow the prompts to enter your email address, password, first and last name, organization*, and phone number. (*For organization, you may enter “student.”)

Click *Go to my account*.

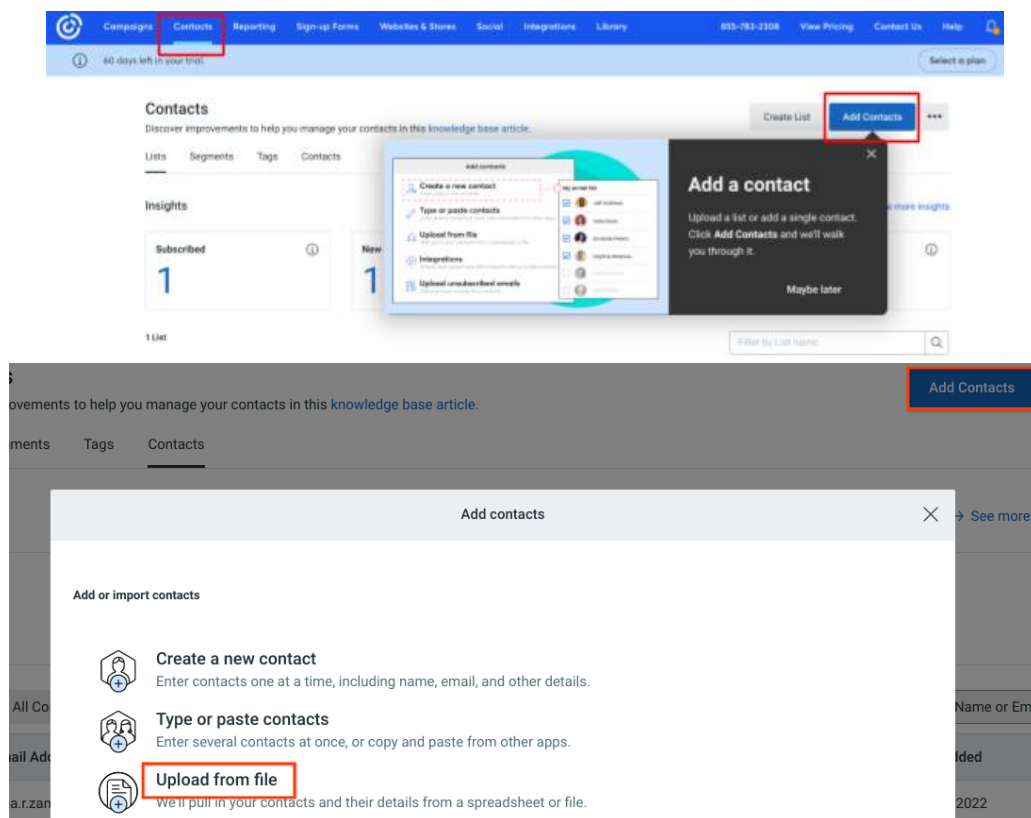

Then, go to your email account and verify your email address.

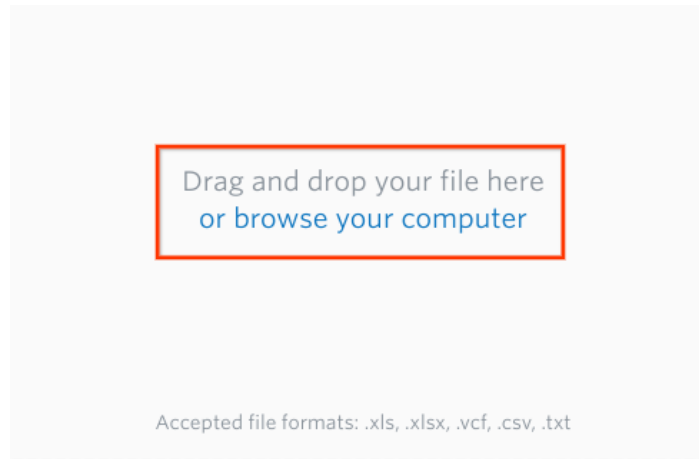

Step 3: Upload a contact list

To email customers through Constant Contact, you'll first need to add contacts.

Click *Contacts* in the menu, click the *Add Contacts* button, and then select *Upload from file*.

Drag and drop the **Contact List** spreadsheet you downloaded in Step 1 into the box, or click *browse your computer* to upload the file from your computer.

Step 4: Create custom fields

Many of the titles of column headers in the Contact List spreadsheet (e.g., first name, last name) will automatically be matched with corresponding field names in Constant Contact. However, you may have some unmatched field names for which you will need to add titles manually.

To create a custom field, select *Create new custom field* from the dropdown menu at the top of each unmatched column. Type in the associated field name (e.g., Age Range) and then click *Create*.

Create a new custom field

Field Type

Text Field ▼

Field Name

Age Range

Cancel

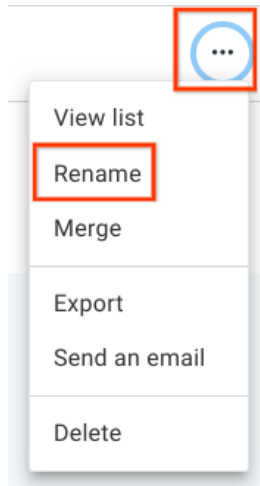

Create

Once all the fields are matched, click *Continue*.

Step 5: Rename your list

Giving your email list a unique name makes it easier to identify which contacts the list contains. As a reminder, the list you uploaded contains contacts who have recently subscribed to Clean and Bright Skincare's email list.

To rename your email list, click the three dots in the box and then click *Rename*.

Give the list a title that categorizes the people in the list. Then click *Save*.

A screenshot of a 'Rename list' dialog box. The dialog has a title bar 'Rename list' with a close button. Below the title bar is a text input field labeled 'List name' with a character count '0/255'. The input field is highlighted with a red rectangular box. At the bottom of the dialog are two buttons: 'Cancel' and 'Save'. The 'Save' button is highlighted with a red rectangular box.

Step 6: Create a segment

To prepare for the two upcoming email marketing campaigns, you will create two segments for your list:

1. People who live in the Southwest United States (Arizona, New Mexico, California, Nevada, Texas, or Utah)
2. People who have birthdays in April

To create your first segment, click *Segments* and then *Create Segment*.

Give each segment a name that describes the people in that segment (e.g., people who live in southwestern states).

Segment Name

46/80

People who live in the Southwest United States

Contacts whose **state** is California or Arizona or New Mexico or Nevada or Texas or Utah.

Step 7: Add contact details

Select *Choose a criteria block* from the dropdown menu. You can choose criteria blocks based on Contact Activity, List Membership, Contact Details, or Tags.

Add a block

Create segments based on email a

Choose a criteria block ▾

For this activity, select *Contact Details*.

Add details about people you want to include in each segment in the **Contact Details** section. For example, if you want to include people who live in the state of California, click the *Select details* dropdown menu and select *State* for the first box. Then select *is* for the second box and type "California" in the third box. To add contacts who live in different states, click *or* and repeat the process.

Contact Details

State ▾	is ▾	California
OR		
State ▾	is ▾	Arizona
OR		
State ▾	is ▾	New Mexico
OR		
State ▾	is ▾	Nevada
OR		
State ▾	is ▾	Texas
OR		
State ▾	is ▾	Utah
+ OR + AND		

When you're done adding contact details, click *Save and Preview*.

Step 8: Add additional segments

To create additional segments, click *Back to segments*.

Summary

Contacts whose **state** is California or Arizona or New Mexico or Nevada or Texas or Utah.

Follow the process described in **Steps 6 and 7** to create the remaining segment.

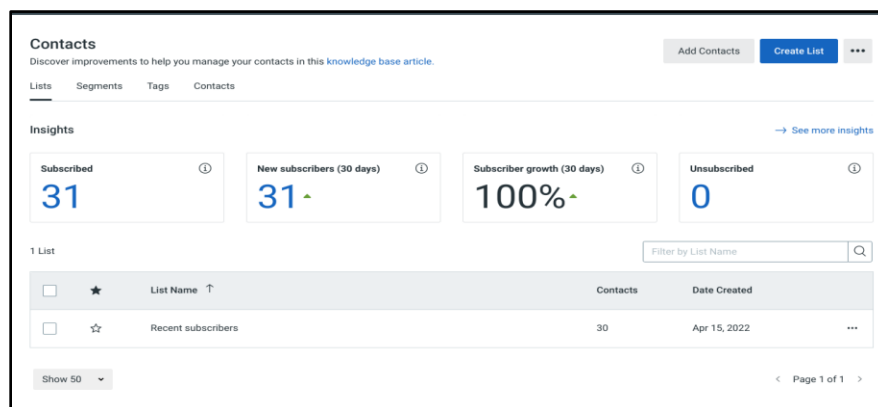

What to Include in Your Response

Be sure to address the following elements in your completed Lab Activity 2:

- A new Constant Contact account
- A list of contacts uploaded from the Contact List spreadsheet
- A new custom field created for Age Range
- A unique name for your email list

The following two list segments: people who live in southwestern states and people who have birthdays in April

Output: Email List and Segments

Activity 3: Set up an email campaign using Mailchimp.

Mailchimp is an email marketing and automation platform with a customizable email builder. By learning to create emails in this widely-used tool, you'll be better prepared to work on a variety of marketing campaigns.

***Note:** This activity uses Mailchimp's new email builder. If the builder is updated, the steps below may differ from your experience of the tool. For information on how to use the latest version (or the classic email builder), visit [the Mailchimp Help Center](#).*

If you prefer to use the classic email builder, learn about the latest version from [Mailchimp's Help Center](#).

Scenario:

Homework Helpers is a tutoring business that offers personalized educational services online and in person. As a member of their marketing team, you are helping to create an email campaign announcing sign-ups for the fall semester in Mailchimp.

Your team has provided a copy of the Homework Helpers' logo, two additional images, and a draft of the email text for you to use. The draft document contains:

- A subject line
- Preview text
- The email body (including headings, subheadings, and button text)
- Alt text for the logo and images

Your job is to use this content to design an email in the Mailchimp email builder. The finished email should reflect the brand's personality and attributes (logo style, colors, tone of voice, etc.). It should also contain at least one image in addition to the logo.

Step-By-Step Instructions

Step 1: Access supporting materials

The following supporting materials will help you complete this activity. Keep them as you proceed to the steps below.

Subject section

Homework Helpers email draft

Subject line	Book now for the fall semester
---------------------	--------------------------------

Preview text	Our expert tutors can help your child get ahead! Sessions available in-person or online.
---------------------	--

Content section

Email text	One-on-one tutoring for student success The fall semester is almost here! We're sharpening our pencils and getting ready to welcome students again. Whether you're new to Homework Helpers or you've worked with us before, we can't wait to help your child reach their potential. Spaces are limited, so book early to reserve your slot!
Button text	Book now
Email text	Who we are When you sign up for Homework Helpers, you'll be matched with a certified tutor who will create a custom program for your child. Find out why our tutors are the best in the business!
Button text	Meet our team
	What we do Our personalized tutoring services help young learners gain confidence and reach their academic goals. Whether in-person or online, we have options to fit your schedule.
Button text	Explore services

Email text	What parents are saying “Deonte is the best—so knowledgeable, patient, and kind. My daughter is happier and more confident in her classes. Thank you, Homework Helpers!” - Leo S. “I can’t say enough good things about Fiona! Since starting Homework Helpers, my son is actually excited to go to school! His grades are up and his teachers are so impressed with the progress he’s making.” - Edna R.
-------------------	---

Alt text for additional images

<tutors.png>	[Alt text: Homework Helpers tutors]
<hands.png>	[Alt text: Children raising their hands]

Step 2: Log in to Mailchimp or create an account

If you’ve used Mailchimp before, go to the login page to [access your account](#). If you’re new to Mailchimp, go to the sign in page and follow the prompts to [create a no cost account](#) for yourself or your business.

How you complete the signup process will depend on how you want to use Mailchimp in the future. If you intend to use Mailchimp for a business you currently own, fill out the information for your business. If you only want to use Mailchimp for this activity, you can enter your personal information.

During the signup process, you’ll be prompted to enter basic account information, including:

- **An email address:** If you are creating an account for a business you own, enter your business address. Otherwise, you can use a personal address.
- **A business name:** Use the name of your business or a placeholder, like “Test Business.”
- **A physical address:** Use your business or personal address.

You’ll also be asked a series of questions to create your profile. Select the responses that best fit your situation. Keep in mind that you can edit your responses later, so feel free to skip some questions if you’re not sure how to answer.

Step 3: Create a new email campaign

Once you’ve created an account or logged in, you can set up a new email campaign:

- Click *Create* in the sidebar menu.

- Expand the **Email** menu and select *Regular*.
- Name the email campaign, e.g., “Homework Helpers campaign.” (This name will only appear in Mailchimp, and will not be included in any emails you create.)
- Select *Begin*.

Step 4: Select recipients and personalize the message

Creating a new email will take you to a screen where you can add and customize the message settings and access the email builder. To add recipients:

- Select *Add Recipients* in the **To** section.
- Under **Audience**, select the name of your business.
- Under **Segment or Tag**, select *All subscribers in audience*. (Remember, you won’t actually send this email to any subscribers.)
- If you prefer not to select all subscribers because you have an active Mailchimp account, select *Group or new segment* and add your account email address under the **Paste Emails** tab.

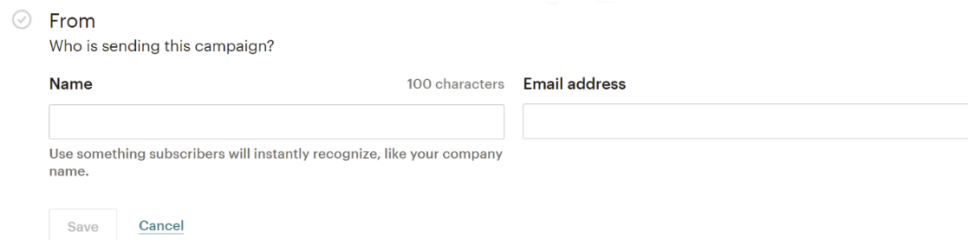

To select personalization options:

- Check the **Personalize the “To” field** box.
- Select **|FNAME|** or **|FNAME|* *|LNAME|** from the **Merge tag** menu.
- Click *Save*.

Step 5: Edit sender information

By default, the **From** section will contain the name and email address you used to create your Mailchimp account. To modify this section:

- Select *Edit From*.
- Enter “Homework Helpers” in the **Name** field.
- Click *Save*.

The screenshot shows the 'From' section of a Mailchimp campaign editor. At the top, there's a radio button selected next to 'From' with the subtext 'Who is sending this campaign?'. Below this are two input fields: 'Name' (with a '100 characters' limit) and 'Email address'. A note below the 'Name' field says 'Use something subscribers will instantly recognize, like your company name.' At the bottom are 'Save' and 'Cancel' buttons.

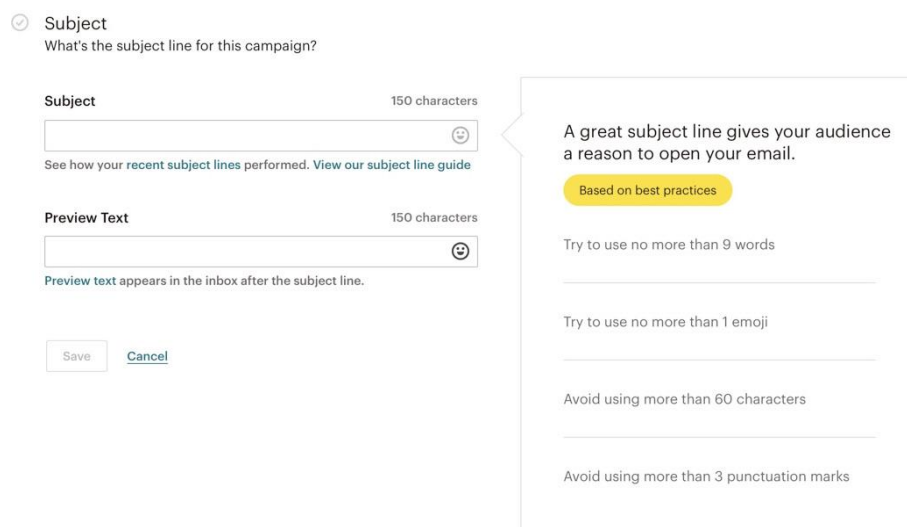

Note: If you would like to change the sender address, you can also adjust the **Email Address** field. Depending on your email client, you may be asked to verify the domain before creating a campaign. You can learn about [verifying a domain](#) in the Mailchimp help center.

Step 6: Add a subject line and preview text

To modify the **Subject** section:

- Copy the subject line from the Homework Helpers email draft.
- Paste it to the corresponding field in the **Subject** section.
- Repeat this process for the preview text.
- Click *Save*.

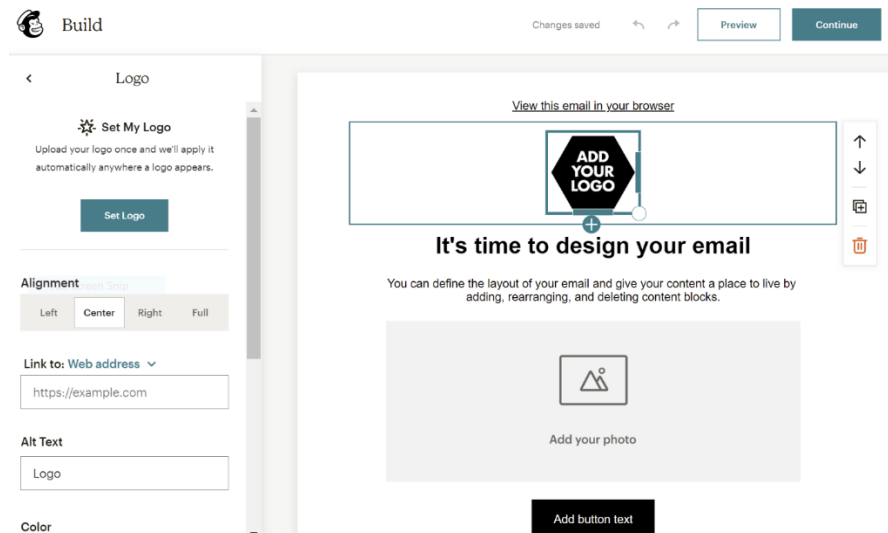

Optional: If you’d like, you can customize the subject line or preview text by adding an emoji. If you make any changes to these fields, be sure to follow Mailchimp’s suggested best practices.

The screenshot shows the 'Subject' and 'Preview Text' section of a Mailchimp campaign editor. The 'Subject' field has a '150 characters' limit and an emoji icon. Below it is a link: 'See how your recent subject lines performed. View our subject line guide'. The 'Preview Text' field also has a '150 characters' limit and an emoji icon. Below it is a note: 'Preview text appears in the inbox after the subject line.' At the bottom are 'Save' and 'Cancel' buttons. To the right, a callout box titled 'Based on best practices' lists four tips: 'Try to use no more than 9 words', 'Try to use no more than 1 emoji', 'Avoid using more than 60 characters', and 'Avoid using more than 3 punctuation marks'.

Step 7: Open the email builder and add a logo

In the **Content** section, select *Design Email*. If you are prompted to choose between the **Classic Builder** and the **New Builder**, select the **New Builder**. Mailchimp will load a basic email template containing several content blocks, including a logo block.

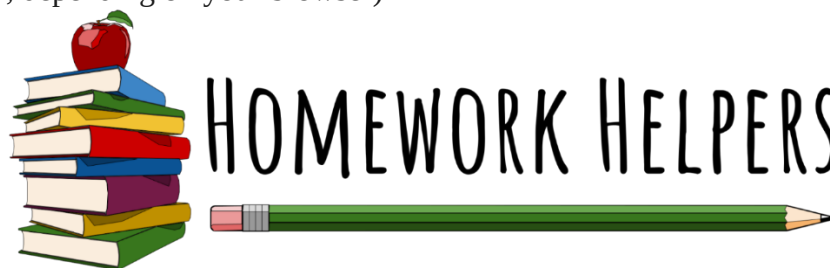

Since setting a logo with the logo block will affect other emails you create, you won't use it for this exercise. Instead, you will add the logo using a standard image block. To replace the logo block with an image block:

- Select the logo block and click the remove button (trashcan icon) to delete it.
- Hover over the top of the template and select the plus sign to open the content block menu.
- Choose *Image*.

To add the Homework Helpers logo:

- Right-click the logo image below and select *Copy image address* (or *Copy image location*, depending on your browser)

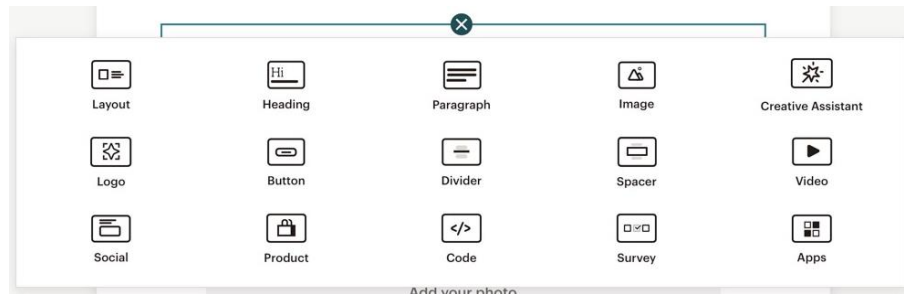

- In the email builder, click the image block you added and select *Browse Images* (or *Add > Browse Images* in the sidebar).
- Select *Import from URL* from the **Upload** dropdown menu.
- Paste the logo address in the **Import a file from a URL** field and click *Import*
- If necessary, reposition the logo with the move arrows.
- Change the alt text in the sidebar to "Homework Helpers logo."

Note: Mailchimp saves changes automatically. If you want to exit the email builder, click the Continue button. You can return to your email drafts by selecting Campaigns > All Campaigns in the sidebar.

Step 8: Choose additional blocks and add content

To make room for the full email, you will need to add, move, and delete content blocks in the template. Spend some time experimenting with different content blocks (e.g., buttons, headings, images) and layouts (e.g., text layouts, text and image layouts, etc.).

As you explore, add the Homework Helpers email content (text and images) to different blocks to find out how they fit together. To add the text, copy it from the email draft and paste it into the template. To add images, repeat the instructions in **Step 7** for one or both of the images below:

Depending on the layouts you choose, you may want to change an image's size or dimensions. To resize an image, click and drag the circle at its lower-right corner. To crop an image, click and drag the solid rectangles at its bottom and right edge. If a cropped image appears too small, change the alignment to *Full* in the sidebar.

Be sure to include at least one of the images above in your email, as well as all the headings and body text.

Step 9: Format the email

Once you have added all the content, try reformatting different elements to change the look of the email. To format the email, select content blocks and make changes in the menus that appear. When making adjustments, consider Homework Helpers' brand attributes (e.g., their logo style and colors, as well as the tone of the message).

Some examples of adjustments you can make include:

- Canvas and backdrop colors
- Image size, alignment, or links
- Text size, color, font, spacing, or alignment
- Button style, color, padding, or links
- Divider thickness, style, or color

Keep experimenting with different layouts and styles until you are satisfied with the design. To learn more about formatting options in the New Email Builder, visit the [Mailchimp Help Center](#).

- Click the back arrow in the sidebar to go to the **Templates** menu.
- Click the heart icon to save the design as a template.
- Name your new template and click *Save*.

When you are satisfied with your email, save it as a template that can be used for future campaigns:

Step 10: Preview the email

Before completing your adjustments, select *Preview* to find out how your email looks on desktop and mobile devices. Return to the email builder to make further changes, if necessary.

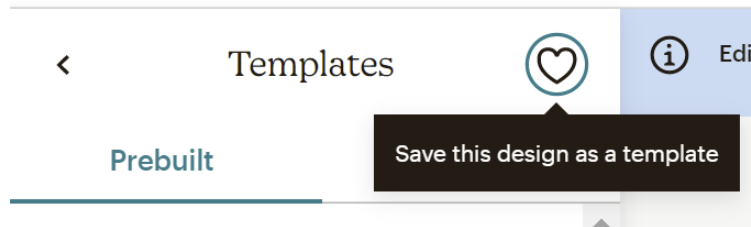

Optional: If you'd like, you can also send yourself a test email to view it in your inbox:

- Click *Send a Test Email*.
- Enter your email address and an optional message.
- Click *Send Test*.
- Go to your inbox to view the message (check your spam filter if you don't receive the test email).

Step 11: Create a template from the email

When you are satisfied with your email, save it as a template that can be used for future campaigns:

- Click the back arrow in the sidebar to go to the **Templates** menu.
- Click the heart icon to save the design as a template.
- Name your new template and click *Save*.

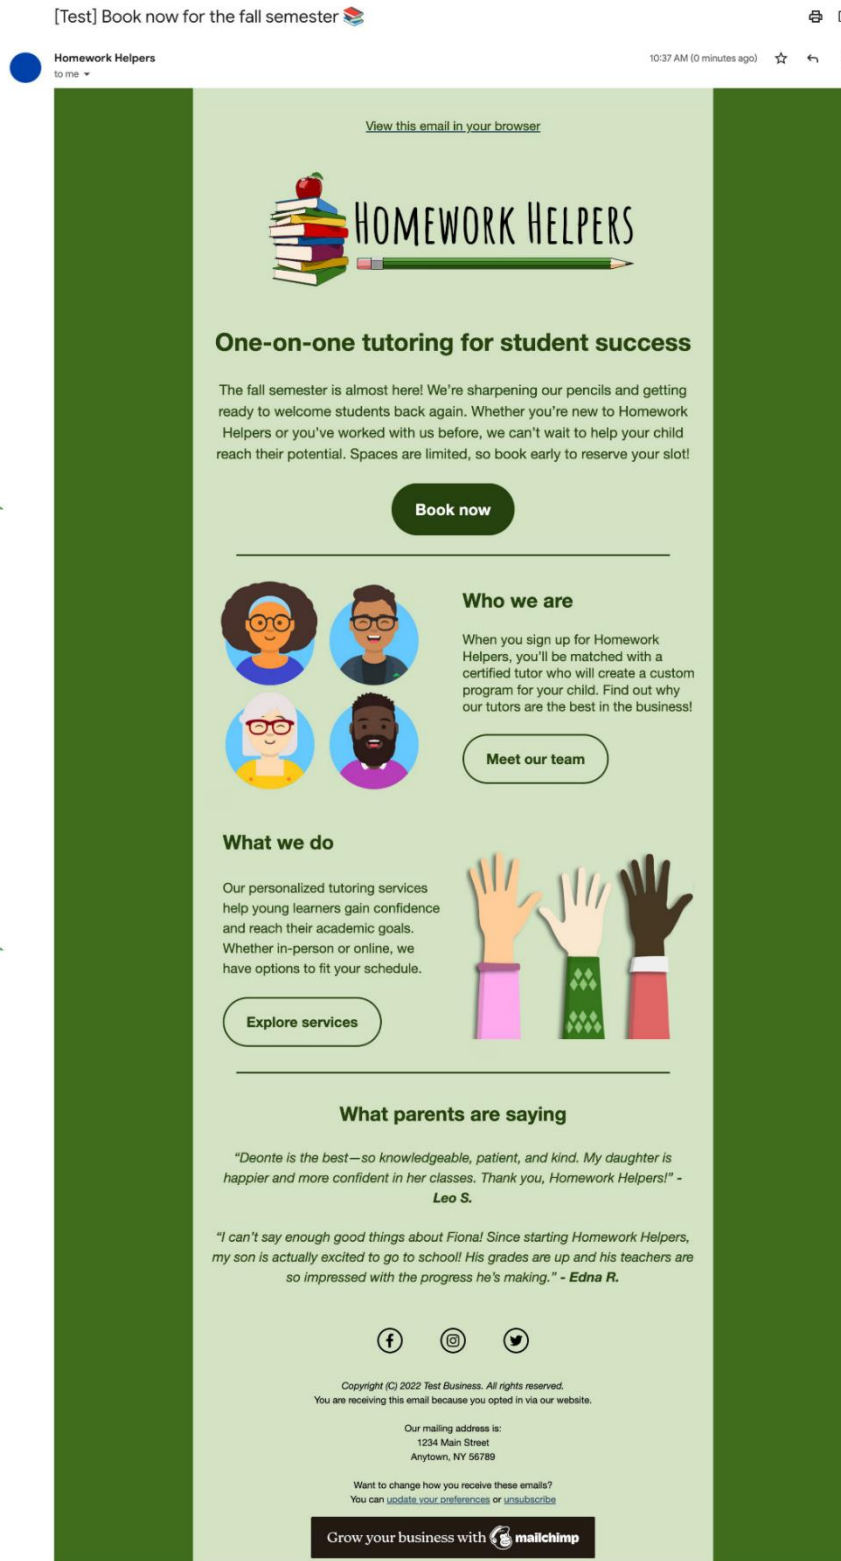

What to Include in Your Response:

Be sure to address the following elements in your completed email:

- The Homework Helpers logo
- The subject line, preview text, and content from the Homework Helpers email
- 1–2 additional images
- Design choices that reflect Homework Helpers' brand attributes

Output:

5) Graded Lab Tasks

Note: The instructor can design graded lab activities according to the level of difficult and complexity of the solved lab activities. The lab tasks assigned by the instructor should be evaluated in the same lab

Lab Task 1: Create two SMART goals for a fictional email marketing campaign.

Scenario:

You're part of the digital marketing team at Feels Like Home, an upscale furniture retailer that does most of its business online. The company is launching a new line of furniture called *For All*, which is designed to expand their customer base. The *For All* line features the brand's high level of craftsmanship, but at a lower price point than their previous offerings. Feels Like Home's main business goal for the *For All* line is to grow their total active customer base by 30% within a year of launch.

You're in charge of the email campaign for the launch of this new line. You and your team have set two email marketing goals to support Feels Like Home's overall business goal:

- **Goal 1:** Grow the email subscriber list by the end of September
- **Goal 2:** Increase the monthly email conversion rate

Your next task is to turn these goals into SMART goals. To do this, you'll use the information from the meeting notes below:

- The *For All* line will officially launch at the end of June, three months from today.
- The email subscriber list is currently about 100,000 people, and we currently add new subscribers at a rate of about 1,000 per month. There is high interest among target audiences, and market research indicates that 2,000 per month is a reasonable target.
- Only 35% of current email subscribers have ever made a purchase. Surveys indicate that the other 65% are interested in Feels Like Home's existing products, but the high price point has been the main obstacle to purchase.
- We estimate that a substantial number of new customers will come from our current subscriber list if we segment for the new product line.
- The average monthly conversion rate for email subscribers is currently 5%. Bringing that rate up to 7% per month within six months of launch will help us reach our business goal. An increase of this size is in line with industry benchmarks.
- Segmenting our email list will help us reach the right subscribers and maximize conversions.

Giving discounts to existing subscribers who refer friends or family members should help grow the email list. Social media and paid media specialists are also working to grow the list.

Goal One

Original goal	"Grow the email subscriber list by the end of September"
SMART goal	

Question	Response
What makes this goal specific?	
What makes this goal measurable?	
What makes this goal attainable?	
What makes this goal relevant?	
What makes this goal time-bound?	

Goal Two

Original goal	"Increase the monthly conversion rate"
SMART goal	

Question	Response
What makes this goal specific?	
What makes this goal measurable?	
What makes this goal attainable?	
What makes this goal relevant?	

What makes this goal time-bound?	
----------------------------------	--

Lab Task 2: Complete a Short Email Series Welcoming New Subscribers to an Email List.

As the digital marketer in charge of the email campaign for the launch of the *For All* furniture line, you've already set SMART goals and segmented your email list. Now you're planning the email content for your campaign.

One of your tasks is to write a series of three emails designed to welcome new subscribers and encourage them to make a purchase:

1. A **welcome email** with a discount code, sent to all subscribers immediately after signup
2. A **newsletter** that introduces subscribers to the *For All* line
3. A **promotional email** that remarkets products subscribers visited on the website and reminds them of the discount code

What to Include in Your Response

Be sure to address the following elements in your completed email series template:

- A welcome email subject line that uses clear language and aligns with the email body
- A newsletter body that introduces the *For All* line, highlights main features and benefits to the reader, and uses at least two specified keywords
- A promotional email call to action (CTA) that describes a specific action and encourages the reader to make a purchase

Feels Like Home welcome email

From: Feels Like Home To: <customer list> Subject: [Subject line]
